Flex

Heavy-Duty Traffic Lane Cleaner

Flex

Flex will wrestle even the toughest soils off the carpet! Heavy greases, oils, and other tough soils are no match for Flex. Unequaled in the industry, Flex’s surfactants, alkaline builders, and solvents come together to provide you with the toughest cleaner available.

Fast: Flex goes to work the second it comes in contact with soil in the carpet. High performance surfactants and solvents quickly suspend and emulsify even the most stubborn soils.

Economical: Even when purchased in small quantities, Flex offers you savings and power! Purchase Flex in larger quantities to save even more.

To be used as a traffic lane prespray on carpets in need of extreme cleaning. Should be extracted after use. Flex is not designed to be used on 5th generation fibers. Flex is designed for use in the Hydro-Force sprayer, electric sprayers, and other types of pump sprayers.

- “Nuke it” to clean it high powered carpet prespray for severely soiled carpets
- As soon as you apply it, you can start to see it dissolve soil right before your eyes
- Complies with all VOC laws including California
- Ideal prespray for apartments, synthetic commercial carpets, and bringing dead carpets back to life
- Special blend of surfactants, alkaline builders, and solvents

Part Number: CC22GL

RTU pH - 12.0

Dilution Ratio: 1:16 | Extreme Soil - 1:8

Contents: One U.S. Gallon (3.79 Litres)

Available in Gallons and 4 x 1 gallon cases, 5 gallon pails and 55 gallon drums

DIRECTIONS

For use with Hydro-Force sprayers: Add Flex directly to the 5 quart container. The proper dilution is automatically achieved.

Revolution, Pump or Electric Sprayers: 1 part Flex to 8 parts hot water (16 oz. Flex to 1 gal. hot water).

Extra Heavy Soil: Add 8 oz of Citrus Solv to 5 quart container when using the Hydro-Force. Add 1 ounce Citrus Solv to each gallon of ready to use solution for other sprayer systems.
