

GLASS CLEANER

STREAK-FREE FORMULA

GLASS CLEANER

Glass Cleaner from OmniPro uses safer ingredients to create the world's best glass cleaner. The water used is cleaned, filtered and purified to remove all minerals that could cause streaking. This Glass Cleaner can be used in fire restoration situations for removing soot, fingerprints, etc. on glass and other non-porous fine hard surfaces.

- **Streak-free with no soil attracting residue**
- **Works best in tandem with microfiber cloths**

Part Number: 2689-0638

Contents: One U.S. Gallon (3.79 Litres)

Available in Gallons and 4 x 1 gallon cases

DIRECTIONS

1. The Glass Cleaner is ready to use for professional cleaners. It can be diluted with up to one part distilled water. If distilled water is not available then do not dilute. Dilution with soft or hard water significantly impacts the cleaning performance, which is not justified by saving a few pennies.
2. Spray a fine mist directly on the glass or other non-porous hard surfaces starting at the top. Wipe off and

buff using a specialized microfiber glass cleaning cloth. Depending on the soil level one cloth may need to be reserved for the wiping and another cloth for the buffing. Repeat as necessary.

3. Do not use fabric softener when laundering microfiber cloths as it removes the charge, which attracts soils into the cloth.
