

LEATHER PROTECTOR

For Aniline and Protected Leather

A simple "Wipe-On" application penetrates easily into the fibers of leather providing a protective barrier between the leather and foreign spilled material such as oils, liquids, alcohol, normal dirt and soiling and much more. This barrier makes regular cleaning and maintenance much easier while keeping the leather looking like new.

Available in:

.946 L (1 U.S. Quart - Part # 2695-4762

DIRECTIONS:

1. Shake well before using.
2. Make certain that the leather is clean before applying. Apply Leather Protector to a slightly dampened dedicated microfiber cloth or soft colorfast towel and wipe the product evenly over the surface of the leather.
3. It is recommended to apply two coats to heavy use areas like the arms and seats of the leather. Speed drying leaves more of the protector on the surface of the leather where it is most needed.
4. Wait until the leather is dry before adding Leather Revitalizer. Keep the unit out of service until the leather is dry to the touch.

*If accidental freezing occurs, allow to thaw at room temperature, then shake vigorously.

**Keep this product out of reach of children. Read the Safety Data Sheet and Product Label before using.
Take the necessary precautions dictated by the label to ensure that your health and that of your customers' is protected.**
