MSA
The Safety Company

About MSA

MSA-U® Online Training Center

MSA-U offers over 120 free online programs that cover MSA products, MSA product technologies, general industry safety standards, and more. Our comprehensive training materials are updated regularly and are available in a variety of formats, including videos, interactive animations, slide presentations, and podcasts.

it's all about 

As an MSA-U student, you have 24/7 access to:

- MSA product care & use programs.
- MSA product training videos & presentations.
- White papers, application solutions, & safety industry standards.
- Sales presentations with features & benefits, FAQs, & competitive comparisons.

Individualized Learning

MSA-U offers a unique learning environment:

- Log in at any time of day or night.
- Learn at your own pace.
- Track your progress.
- Receive a Certificate of Completion for each course passed.

Team Learning

MSA-U empowers you to:

- Create study groups.
- Develop your group's curriculum.
- Invite other students to join your group.
- Request customized content for your group.
- Review progress reports for your group's students.*

Register Today!

Visit <http://msau.msanet.com>.

Questions?

E-mail msau@msanet.com for help.

*Base functionality (individual testing and tracking) is FREE. Fees are applicable to the following additional features:

- Group-specific training: \$49/course/year
- Group-specific testing: \$29/test/year
- Group-specific record-keeping: \$19/person/year

95+ Years of Products, Service and Expertise

MSA offers more than safety

Promoting Protection is Part of our History

Mine Safety Appliances Company was founded in 1914 by two mining engineers who designed or improved safety, rescue and protective gear. MSA has continued to help protect people from hazards great and small, and today helps protect millions of workers in many industries worldwide. MSA has sold gas masks for military use since World War I. We have always understood the demands placed on crucial protective equipment in extremely hazardous conditions. MSA historically and steadfastly has helped first responders before, during, and after emergencies, from small house fires to multiple explosions at chemical plants, from hazardous materials spills to hurricanes.

MSA makes and markets respiratory protection, gas-and-flame-detection instruments, head, eye, face, and hearing protection, fire and police helmets, fall protection, thermal imaging cameras, ballistic protection, and mining, emergency, and specialty equipment via a national network of trained distributors, product specialists and knowledgeable contacts. MSA has been a global company for decades, protecting millions of people around the world. What have we done for YOU lately?

MSA Offers More than Safety on the Job

Great Products

MSA began making high-quality safety products in 1914.

Technology enhances our innovation in product development, with computer-aided design and the latest rapid prototyping capability. MSA responds quickly as your needs change. Within most product groups is a wide selection of models, sizes, colors, materials, options, accessories and prices. Many components of MSA products are formulated, machined,

tooled or molded in-house from raw materials, allowing for

greater manufacturing control as well as quality assurance. MSA processes are certified as meeting ISO 9001-2000 quality assurance requirements of the International Standard Organization (ISO).

Great Plans for the Future

MSA continues to enhance our operations and expand/ improve our product lines by acquiring companies and/or new capabilities to better serve our customers. In 2002, MSA began manufacturing specialized helmets for military and law-enforcement use, and in 2004 added passive and electronic hearing protection. In 2005, MSA created a new ballistic protection product line, offering ballistic vests to protect law enforcement and military personnel.

Great People and Resources

Your personalized MSA service starts with a trained MSA-authorized distributor near you and the largest team of field representatives in the safety industry. They understand your hazards and the regulations with which you must comply, and will help to analyze your safety requirements and recommend solutions. MSA-authorized distributors are knowledgeable, well-trained and proficient at providing the services you need and also can assist in training your in-house trainer. Training your employees properly in the use, care and maintenance of our products is easy with MSA University, our on-line application for 24/7 training. See pages 189-190 for a partial list of available programs. New programs are being added regularly.

MSA's website includes on-line product information offering the basics of most products in this printed catalog, plus links to PDF versions of printed literature and other materials that you can print yourself. Go to www.MSAnet.com. To send us an e-mail message, use info@MSAnet.com.

Customer Service

Award-Winning Customer Service

Every customer wants it. Every good business has it.

Our multiple-award-winning Customer Service Center (CSC) proves that MSA strives for continuous improvement in customer satisfaction. Every year brings positive changes: better-trained representatives with more advanced computer programs, resulting in improved service and faster solutions. Each Customer Service Rep's computer workstation can simultaneously handle a variety of applications, and an automated call distributor monitors and routes call flow to ensure peak performance. The CSC continues to look for ways to improve our relationship with customers via input from sales personnel and field customers themselves. We're aiming for TOTAL customer satisfaction!

Ask us the name of your nearest authorized MSA distributor, who can:

- Place your orders
- Obtain prices and quotes
- Provide product information and technical assistance
- Check delivery and expedite shipments
- Order catalogs and product literature
- Obtain return authorizations

Great International Sales

MSA's international sales capabilities start with MSA Sales Representatives who assist in choosing the right products for your applications and local approvals. Our extensive network of distributors, representatives and MSA-affiliate companies covers most major cities worldwide. Highly-trained international customer service representatives guide your export orders from placement to delivery. MSA uses all major air and ocean freight forwarders and courier services due to their ability to consolidate multiple orders and minimize freight expenses. Our CSRs understand international inspections, certifications, licensing and other customs issues necessary for successful importation.

To contact MSA International or to find the MSA affiliate company or distributor nearest you, please contact MSA International:

At MSA, we are connected to our customers

New Yorkers use a lot of water, about a billion gallons a day. It's piped into the city through tunnels from reservoirs in upstate New York. Construction of a new tunnel began in 1970, eleven years before Jason Jonker was born.

Thanks to his V-Gard® Protective Cap there's a good chance he'll be around when it's done in 2013.

Jason is helping Skanska, a global civil contractor, build the Croton Water Filtration plant in the Bronx. When it's finished, it will process about 20% of New York City's water supply.

While stripping concrete forms from a newly poured floor, a worker on a scissor lift bumped an unsecured Z-beam.

The 50-pound beam fell and struck the back of Jason's helmet.

"He needed a few stitches," said Michael Caterina, Skanska's Site Safety Manager, "but the hard hat absorbed much of the blunt force, lessening the severity of the injury."

Skanska has one of the best safety records in the world. Angelina, Jonathon, and Martiniano make suspensions that help industrial helmets absorb impact forces.

Juan Zamora (left) and Stephanie Green didn't think of themselves as detectives until Zamora found a diamond and ruby ring in an OptimaAir® TL Powered Respirator hood box. He and Green set in motion a cross-country investigation that ended happily in MSA/Jacksonville.

Zamora suspected that the ring must have come from MSA's factory in North Carolina. He gave the ring to Green for safekeeping. Green gave it to Plant Management, who gave it to the Respiratory Protection Program Manager, who gave it to MSA's Paul Steiger.

The ring belonged to Naida Drews and was a gift from her sister. Naida hadn't seen it since December when it must have slipped off her finger as she sealed boxes.

Returning the ring had special significance. A group from Hanford visited Jacksonville a few months earlier to discuss ways to improve the OptimaAir TL PAPR.

They got to know the MSA associates who make the products they rely on every day.

"It became much more meaningful to them to try to find the owner of the ring," said Mary Faulkner, Quality Manager at MSA Jacksonville, "they actually met many of the associates who worked on the OptimaAir PAPR production line—so it became more personal to them."

Pete Engelbert
President, Job Safety Associates, LLC

Zane Frund, PhD
Manager of Material Science and Chemical Research
MSA/Headquarters

When it comes to worker safety, Pete Engelbert describes himself as "...a fairly detailed person."

When someone asked OSHA if stickers were allowed on protective helmets, OSHA's response was missing an important detail, one that Pete needed to help keep his customers safe.

According to OSHA, stickers were allowed if their adhesive didn't affect the helmet's shell.

But which adhesives were safe? The OSHA letter didn't say. Only the manufacturer knew that.

Or did they? Annette Ryan, MSA Customer Service, searched the product information and came up empty. She forwarded Pete's question to Eric Buzard, MSA Customer Development Manager, who promised an answer within a week.

Eric had similar results and that week turned into nearly a month.

Finally, Zane Frund, PhD., Materials Science Product Engineering Manager, provided the details Pete needed.

"He gave me exact, plain English wording that answered my question," recalled Pete. He added with a chuckle, "To date no other hardhat manufacturer answered that question."

Pete's loyalty to MSA didn't begin with this episode. To learn more about how a Skullgard® Helmet helped kick off his career see *Spotlight on Safety*, Volume 12, Issue 2.

Mike Petteplace
Senior Territory Sales Manager
MSA/Canada

Martin Mooy
Radiation Protection Assistant
Bruce Power Plant, Tiverton, Ontario

Martin Mooy is working to provide energy for a new generation.

The two Bruce Power reactors he is helping to refurbish will provide 1,500 megawatts of clean electricity to power consumers in Ontario for another 25 years and beyond.

As a husband, father and grandfather, Martin knows the importance of working safely and protecting himself from hazards.

Some radioactive particles cannot penetrate skin or even pass through a sheet of paper, but they can be carcinogenic if inhaled or ingested.

That's why sales manager Mike Petteplace recommends the OptimAir® TL Powered Respirator.

"We plan our jobs to keep the radiation dose as low as reasonably achievable," explains Martin. "Personal protective equipment is an important factor in making sure we don't exceed company or regulatory limits for safe exposure."

Mike's dad worked at the Bruce Power plant during original construction in the early 1970s. He's now retired but still talks about it... when he's not on the golf course.

About Respirators

Types of Respirators

Respirators fall under two classifications: **air-purifying** and **air-supplied**.

Air-purifying respirators are used against particulates, gases, and vapors. These are categorized as negative-pressure respirators that use chemical cartridges and/or filters; gas masks; and positive-pressure units such as powered air-purifying respirators (PAPRs). Air-supplied devices rely on a primary air source to deliver a steady flow of respirable air to the user's facepiece. These consist of Self-Contained Breathing Apparatus (SCBA) and air-line devices.

MSA Air-Purifying Respirators (APRs) range from low-maintenance half-mask facepieces with cartridges and/or filters to the more complex PAPRs with full-facepieces, or hoods.

- APRs for particulates use filters to capture dusts, mists, and fumes. Filters do not protect against gases or vapors, and generally become less effective as particles accumulate on the filter and plug spaces between the fibers. Filtering APRs require filter replacement when the user finds it difficult to breathe through them.
- Gas and vapor APRs employ chemical cartridges or canisters to remove hazardous gases or vapors from the air. They do not protect against airborne particles. Made to protect against specific gases or vapors, they provide protection only as long as the cartridge's absorbing capacity is not depleted.

The service life of a chemical cartridge depends upon many factors and can be estimated in various ways. Cartridges and canisters require an end-of-service-life indicator (ESLI) or a change schedule, based on objective information or data that will ensure that canisters and cartridges are changed before the end of their useful life. You can access the MSA Cartridge Life Calculator on our website (MSAnet.com). Click [Resources](#), then [Tools](#), then [Cartridge Life Calculator](#).

- Combination APRs, fitted with both particulate filters and gas/vapor cartridges, are worn in atmospheres that contain hazards of both particulates and gases.

Supplied-Air Respirators (SARs), comprise air-line respirators, SCBA, and combination (supplied-air) respirators.

- Air-Line Respirators are used for extended periods in non-IDLH atmospheres. They use an air-line hose to deliver clean breathing air from a stationary source of compressed air for prolonged periods of time. Although comparatively lightweight, air-line respirators can limit users' mobility because of the air-line hose that must be attached.
- Self-Contained Breathing Apparatus (SCBA) have an open-circuit design that provides air rated for 30 to 60 minutes. They consist of a wearable, clean-air supply and a tight-fitting facepiece, and are used for short duration entrance or escape from atmospheres that are or may be IDLH. They offer relatively unrestricted movement.
- Combination SARs are air-line devices used for extended work periods in atmospheres that are or may be IDLH. They have an auxiliary self-contained air cylinder that can be used if the primary air supply fails. The air cylinder can also be used for entry into or escape from IDLH atmospheres, such as confined spaces.

Respirator Selection

All respirators in use must be NIOSH-approved (NIOSH 42 CFR Part 84). Selecting respirators entails knowing what level of respiratory protection employees need, as well as which size respirator is right for any face and facial contours.

Respiratory protective devices vary in design, application, and protective capability. Thus, the user must assess the inhalation hazard and understand the specific use limitations of available equipment to assure proper selection.

If your calculation shows that exposure concentrations exceed recommended limits and engineering/administrative controls do not reduce exposure below the permissible limit, tailor your respiratory protection program to your specific conditions based on:

- Toxicity (TLV or TWA)
- Maximum Expected Concentration
- Oxygen level
- IDLH concentration
- Warning properties (adequate or not)
- Sorbent limitations
- Facepiece fit
- Mobility requirements
- Type of use (routine, escape, or emergency entry)
- OSHA-assigned protection factor of respirator

Half-Mask Respirators

Completely Latex-Free!

Advantage® 420 Half-Mask Respirator

The innovative Advantage 420 Respirator, the latest addition to MSA's Advantage Respirator family, offers users exceptional comfort and sophisticated design. The Advantage 420 Respirator raises the bar for ease of use, as users can quickly adjust the mask according to their individual needs.

Top 5 reasons why you should purchase the Advantage 420

- Patent-pending one-piece UniBond over-mold facepiece** offers stability, comfort, and superior fit. The intelligent design eliminates multiple leak paths and with only three major components, the Advantage 420 significantly reduces the cost of ownership.
- AnthroCurve™ II face-seal** adapts perfectly to multi-ethnic head sizes and facial contours. The facepiece design is based upon the new proposed NIOSH fit test panel and provides users in many global regions with excellent fit, and superior comfort.
- Patent-pending yoke and harness design** enables quick and easy switch between lock-down and drop-down modes. Drop-down mode allows user to remove facepiece and rest it safely against the chest while maintaining use of head protection. Lock-down harness mode allows the user to lock in a personal fit; respirator can be donned without further adjustments.
- Low-profile design integrates extremely well with other personal protective equipment (PPE)**, such as hardhats, eyewear, goggles, and faceshields. Unique, one-piece ComfortTop headband and harness assembly eliminates pressure points when head protection is worn.
- Comfort and adjustability** with our form-fitting neck buckles and wide straps that eliminate discomfort around the neck, and the adjustable crown strap which adapts to different head sizes.

3-Step Donning Process

Flexible, patent-pending, one-piece easy-don head harness assembly simplifies donning and doffing.

1

Place cradle on head

2

Place facepiece into position and lock down

3

Attach neck buckle

Advantage 420 Respirator

Description	Small	Medium	Large
Advantage 420 Assembly (includes facepiece, head cradle, elastic straps, buckle set, yoke with lever, two (2) inhalation valves, one (1) exhalation valve)	10102182	10102183	10102184

Advantage 420 Respirator Spare Parts and Accessories

10097807	Harness Assembly with Buckles (includes head cradle, elastic straps, and buckle set)
10097883	Maintenance Valve Set (includes one (1) exhalation valve and two (2) inhalation valves)
10097886	Advantage 420 Maintenance Kit (includes harness assembly with buckles, one (1) exhalation valve, and two (2) inhalation valves)
10097810	Yoke with lever
10097881	Lever, package of 5
10097888	Inhalation valve, package of 10
10097891	Exhalation valve, package of 10
10097884	Buckle set, package of 5
10097887	Storage poly bag

10056424	Advantage Quantitative Fit Test Adapter
10097899	Instruction Manual, CD format

See page 15 for bayonet-style filters and cartridges and page 16 for flexible pad-style filters. See page 16 for threaded filters and cartridges.

For more information, please see bulletin 1012-36-MC/July 2009.

Air-Purifying Respirators

Half-Mask Respirators

Evolutionary AnthroCurvell Sealing Surface Face Seal

Compared to other half-mask respirators available on the market today, the Advantage 420 Respirator is designed to fit a much broader range of users who have unique facial features and dimensions. Through years of research and facial measurements of different ethnicities, the National Institute of Occupational Safety and Health (NIOSH) has developed a new fit test panel shown here. MSA is proud to say that the Advantage 420 face seal design is based upon this panel.

What it means to you is a higher degree of protection for a larger number of workers!

	Features	Benefits
Simplicity	Only three major components	Reduced cost of ownership (fewer parts, ease of maintenance)
	Patent-pending unique harness assembly	Three simple donning steps
	User-friendly drop-down harness option	Allows user to remove facepiece and rest it safely against chest while maintaining use of head protection
	Personal fit lock-down harness option	Provides user with option of locking in a size; respirator can be reused without further adjustments
Comfort	Curved neck buckles	Adds greater comfort and reduces neck abrasion
	Smooth design	ComforTop headband eliminates pressure points on head when head protection is worn
	Multi-ethnic faceseal based on proposed NIOSH fit test panel	Fits a broad range of facial shapes globally
	Wide comfortable straps	Minimizes twisting and retains shape after multiple washings
	Chin cup with built-in moisture release	Reduces slippage of facepiece in hot, humid conditions
	Latex-free	Eliminates latex-related allergic reaction
Safety	UniBond one-piece facepiece made of soft over-molded LIM silicone and rigid nylon	Eliminates multiple leak points and offers excellent stability on user's face
	Textured inner facepiece seal	Maintains secure facepiece fit and reduces slippage
	No loose or dangling straps after donning	Eliminates interference and provides greater visibility
	Indirect exhalation valve	Provides downward path of exhaled humid air; reduces fogging on faceshield lens
Flexibility	Innovative yoke and harness design	Enables quick and easy switch between lock-down and drop-down options
	Low-profile design	Integrates extremely well with other PPE, such as eyewear, goggles, head protection, and faceshields
	Adjustable ComforTop headband and three facepiece sizes	Provides precise adaptation to different head sizes and facial contours
	NIOSH-certified for use with both plastic Advantage bayonet and metal threaded cartridges	Allows respirator customization to meet user preferences

Half-Mask Respirators

Advantage 200 LS with P100 particulate filters

Advantage 200 LS with combination chemical cartridges

Advantage 200 LS Respirator

The Advantage 200 LS Respirator's lighter and softer facepiece is made from a clear blue formulation of thermoplastic rubber to give workers more comfort and stability than ever.

Extensive anthropometric research led to the Advantage 200LS Respirator's unique design. MSA's engineers examined facial form data of over 8,000 people and, with CAD technology, developed the AnthroCurve™ Sealing Surface, which instantly conforms to each wearer's unique facial characteristics.

The unmatched fit and comfort start with a soft, pliable combination of rubber and plastic that provide a virtually customized fit. These are key components in the patented MultiFlex® System that equalizes pressure on the face seal area, while delivering exceptional stability, so the respirator will not collapse during wear.

Advantage 200 LS (Facepieces only)

Description	2-Piece Neckstrap	Single Neckstrap
Advantage 200 LS, small	815696	815448
Advantage 200 LS, medium	815692	815444
Advantage 200 LS, large	815700	815452

Advantage 200 LS Facepiece with Cartridge

Description	OV-N95 Cartridge	Multigas R95 Cartridge
Advantage 200 LS, small	816943	816701
Advantage 200 LS, medium	816939	816697
Advantage 200 LS, large	816947	816705

See page 15 for bayonet-style filters and cartridges and page 16 for flexible pad-style filters.

For more information, see Bulletin 1012-10.

Comfo Classic® Respirator

The Comfo Classic Respirator features SoftFeel® facepiece material, which is an MSA-exclusive formulation that improves pliability and softness. Like earlier Comfo Respirator models, the Comfo Classic Respirator features a unique face seal design that gives wearers an exceptional fit.

Comfo Classic Facepieces

Material	Color	Small	Medium	Large
SoftFeel Hycar	Black	808075	808074	808076
SoftFeel silicone	Black	808072	808071	808073

See page 16 for threaded filters and cartridges.

Full-Facepiece Respirators

Advantage 3200 Respirator with rubber harness and chemical cartridges

Advantage® 3000 Series Respirators

The Advantage 3000 Full-Face Respirator features a wraparound lens combined with a soft, pliable silicone facepiece that provides a total solution to your air-purifying respirator needs.

Its fit technology is based on the proven face seal of the Ultra Elite Facepiece, which was based on facial measurements from more than 8,000 people.

The Advantage 3200 Respirator uses Advantage cartridges and filters.

The Advantage 3000 Respirator enhances worker performance through a new design that allows even lower breathing resistance and includes a standard nose cup that reduces fogging in low temperatures or high humidity conditions.

In addition, the facepiece lens has a scratch resistant coating and has been engineered to be optically correct, giving you superior visibility and peripheral vision. The Advantage 3000 Respirator meets all performance requirements of ANSI Z87.1 (protective eye and face protection).

Donning the mask is made easier with pre-adjustable rubber straps. With the Advantage 3000 Respirator, you can set the position of the upper straps to receive a consistent fit, time after time. In addition, the preset upper straps prevent uncomfortable snags during donning and doffing, and also provide a tighter, more secure seal. Wearers also can choose the new European-style Advantage harness, which dons like a catcher's mask.

Advantage 3200 Respirator with European-style harness

For more information, see Bulletin 1012-10.

Advantage 3200 Facepieces (Twin Port)

Description	Small	Medium	Large
Advantage 3200 Twin Port Respirator, w/rubber harness	10028996	10028995	10028997

Advantage 3100 Single Port Respirator, w/rubber harness	10028999	10028998	10029000
Advantage 3100 Single Port Respirator, w/Advantage European-style harness	10031343	10031342	10031344

See page 15 for bayonet-style filters and cartridges and page 16 for flexible pad-style filters.

Full-Facepiece Respirators

Advantage 4200 Respirator with polyester net head harness and GMA/OV cartridges

Advantage® 4000 Series Respirator

The new Advantage 4200 Twin Port Full-Face Respirator raises the performance of industrial full-facepiece respirators to a new level. Based on the Advantage 3000 Facepiece, the respirator features a wraparound lens combined with a soft, pliable Hycar or silicone facepiece that provides a total solution to your air-purifying needs.

Its fit technology is based on the proven face seal of the Ultra Elite Facepiece. The Advantage 4200 Respirator uses Advantage cartridges and filters.

In addition, the facepiece lens has scratch-resistant coating and has been engineered to be optically correct, giving you superior visibility and peripheral vision. The Advantage 4200 Respirator also meets the performance requirements of ANSI Z87.1.

The Advantage 4200 Respirator enhances worker performance through a new design that allows low breathing resistance and includes a standard nosecup that reduces fogging in low temperatures or high humidity conditions.

Options include spectacle kits for corrective lenses, cover lens and welders adapter.

Donning the mask is made easier with a comfortable net-type harness with a four-point adjustable suspension. Wearers also can choose pre-adjustable rubber straps.

Full-Facepiece Respirators

Advantage 1000 Respirator with P100 particulate filters

Advantage® 1000 Respirators

The Advantage 1000 Full-Face Respirator features a wraparound flexible lens that offers excellent fit and comfort with increased vision. It weighs 40% less than conventional full-face respirators and uses the same cartridges as the Advantage Family Respirators. The Advantage 1000 Respirator is constructed of super-soft Hycar rubber that provides the feel and comfort of silicone but has better permeation resistance. The facepiece, which is available in three sizes, has a unique inturred lip seal that provides an exceptional seal against a wide range of facial contours. The Advantage 1000 facepiece also features a distinctive, flexible urethane lens that is integrally bonded to the facepiece, eliminating the need for rigid lens retainers that can cause unwanted pressure points.

Standard equipment includes a speaking diaphragm, for clear, short-range communications, and a nose cup, to reduce lens fogging in low temperatures or high-humidity conditions.

Advantage 1000 Facepieces

Description	Small	Medium	Large
Black, with speaking diaphragm and nose cup	805414	805408	805420

See page 15 for bayonet-style filters and cartridges and page 16 for flexible pad-style filters.

Ultra Twin Respirator with GMC cartridges

Ultra-Twin® Respirators

The Ultra-Twin Full-Facepiece Respirator has an inturred lip around the edge for a secure, comfortable seal against the face. A large chin cup makes it easy to position. Five suspension headstraps and roller buckles hold the facepiece in place while minimizing hair entanglement. The wide polycarbonate lens is coated to resist scratching and chemical attack. The lens is held in place by a two-piece lens ring which is color-coded to indicate the size of the facepiece. Uses the full line of threaded cartridges and filters.

Standard equipment includes a speaking diaphragm for clear, short-range communications and a nose cup, to reduce lens fogging in low temperatures or high-humidity conditions.

Ultra-Twin Facepieces

Material	Color	Small	Medium	Large
Hycar	Black	471298	471286	471310
Silicone	Black	480263	480259	480267

See page 16 for threaded filters and cartridges. See page 14 for accessories, and page 17 for fit test kits.

Ultra Elite Respirator with cartridge adapter and P100 particulate filters

Ultra Elite® Twin-Cartridge Respirators

The demand version of the Ultra Elite Facepiece from MSA can be used as a twin-cartridge air-purifying respirator for full-face respiratory protection. The unique lens design provides a high level of peripheral and downward vision. It is available in three sizes and has large adjustment tabs for easy donning and doffing. Choose one of two facepiece materials—SoftFeel® Hycar rubber or silicone—to enhance wearer comfort. A speaking diaphragm in front of the wearer's mouth improves communication so that speech is not blocked. A nose cup reduces lens fogging in low temperatures or high-humidity conditions.

Ultra Elite Facepiece with Twin-Cartridge Adapter

Material	Color	Small	Medium	Large
SoftFeel silicone	Black	10016755	10016756	10016757

Ultra Elite Facepiece less Twin-Cartridge Adapter

Material	Color	Small	Medium	Large
SoftFeel Hycar rubber	Black	493064	493020	493108
SoftFeel silicone	Black	493072	493028	493116

See page 16 for threaded filters and cartridges. See page 14 for accessories, and page 17 for fit test kits.

Note: Ultra Elite Facepieces must be fitted with a Twin-Cartridge Adapter (see p 14) to be used as a twin-cartridge respirator.

R95 Snap-On Prefilter and Cover	815397 Box of 20 815401 Reusable Snap-On Cover, 2 in a Package		An appropriate cartridge change-out schedule must be developed by a qualified professional, unless the cartridge/canister utilizes an end-of-service-life indicator. The change-out schedule must take into account all factors that may influence respiratory protection including specific work practices and other conditions unique to the worker's environment. If using against substances having poor warning properties, there is no secondary means of knowing when to replace the cartridges/canister. In such cases, take appropriate additional precautions to prevent overexposure, which may include a more conservative change-out schedule or using an air-supplied respirator or SCBA. Failure to follow this warning can result in serious personal injury or death. As a reference, below is a partial list of substances having poor warning properties:																																											
Definitions			<p>N95-Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil; time use restrictions may apply.</p> <p>R95-Particulate Filter (95% filter efficiency level) effective against all particulate aerosols; time use restrictions may apply.</p> <p>P100-Particulate Filter (99.97% filter efficiency level) effective against all particulate aerosols.</p>

- Notes**
- Do not use in atmospheres containing less than 19.5 percent oxygen, in atmospheres containing gases or vapors or in atmospheres immediately dangerous to life and health.
 - Do not use in atmospheres containing less than 19.5 percent oxygen, or in atmospheres immediately dangerous to life and health.
 - Do not wear for protection against organic vapors with poor warning properties or those which generate high heats of reaction with the sorbent material in the cartridge.
 - 99.97 percent efficient against 0.3 micron DOP.

Air-Purifying Respirators

Threaded Respirator Cartridges

The Comfo line of particulate, chemical and combination cartridges is NIOSH-certified (to 42 CFR, Part 84). Cartridges fit Comfo Classic, Ultra-Twin, Ultra Elite Twin-Cartridge and Duo-Twin Respirators, and certain half-mask and full-face Advantage Respirators with Adapter (P/N 809999).

Flexi-Filter® Pads for Advantage Respirators

These low-profile, flexible pads fit well under a welding hood and with other personal protective equipment. They offer great balance and weight distribution for maintaining a good face seal, while their swept-back design provides improved vision and comfort.

Qualitative Fit-Test Kits and Other Accessories

Facepiece Fit-Test Kits

The Occupational Safety and Health Administration (OSHA) requires fit tests to ensure proper fit for workers who use respirators. Quantitative testing methods rely on objective data to determine a proper fit. Qualitative fit-test methods are subjective in nature and rely on the judgment of the test subject.

Powered Air-Purifying Respirators (PAPRs)

OptimAir Mask-Mounted PAPR Assembly with Advantage 4100 Facepiece

OptimAir® Mask-Mounted PAPR with Type HE OptiFilter® XL Filter

The OptimAir Mask-Mounted Powered Air-Purifying Respirator (PAPR) is designed for abatement, nuclear, lead and other hazardous particulate environments. The PAPR filters particulates from ambient air and provides a constant flow of respirable air to the Advantage 3100, 4100, Ultravue or Ultra Elite Facepiece. The mask-mounted motor/blower with HEPA filter has a low profile design that enhances user maneuverability and simplifies decontamination.

The PAPR includes a small, lightweight, water-resistant nickel metal hydride (NiMH) battery pack that will operate for eight hours of continuous use. Weighing only 12.5 oz., it measures only 3"x 5"x 1". The low-profile unit fits close to the wearer's body. The sealed battery pack is water-resistant for easy shower decontamination. Another advantage: NiMH batteries do not have the "memory effect" associated with NiCad batteries. The standard Dual-Rate Battery Charger will recharge a fully discharged battery in less than three hours. Metal connectors on cable ends provide a durable and secure fit to the battery and blower housing. NIOSH approved as mask-mounted PAPR and also approved as a negative-pressure APR for egress.

Complete OptimAir Mask-Mounted PAPR Assemblies (with facepiece)

All assemblies include: motor/blower, NiMH battery, dual-rate battery charger, cable, one Type HE OptiFilter XL Cartridge, belt, and choice of Advantage 3100 or 4100 Facepiece.

OptimAir® TL PAPP

The OptimAir TL PAPP is NIOSH-certified with loose-fitting hoods and a variety of full facepieces to protect against particulates, toxic gases and vapors, or a combination. "Smart" features set flow rates automatically through built-in sensors. Unit offers audible and visual alarms for added worker safety. Audible alarms travel up the breathing tube close to the user's ear.

MSA's OptimAir TL PAPP incorporates a sleek, low-profile design for user comfort never before offered in a PAPP. All components including the motor blower, cartridges and battery are packaged in a single hip-hugging housing. Improved motor blower electronics allow for optimum air flow and filter resistance while the compact and ergonomic battery pack affords lightweight comfort and fit. Flow control sensors are activated by insertion of the cartridges and breathing hose to the blower housing. The unit automatically adjusts for altitude via an internal pressure switch.

Superior design features permit fast, accurate changeout of cartridges, hoods and batteries. Slim, curved PAPP housing helps to minimize fatigue and permits work in tight confined areas. OptimAir TL PAPP kits include motor blower, smart charger, battery, decon belt, and hose.

NOTE: cartridges and other accessories on next page.

NIOSH-Approved

Available with variety of full facepieces and hood materials, styles and configurations including DuPont Tychem SL and QC with single and double bib. A choice of hose connection is also available. Unit has an APF of 1,000 (Assigned Protection Factor) when used with hood or facepiece.

Smart Design Features

- Crush proof breathing tube
- Automatic setting of flow rates
- Audible and visual alarms for low flow indication and low battery voltage
- Less bulk and better weight distribution improves worker efficiency
- Every cartridge has its own sealing gasket

Cartridges and Accessory Options

- P100
- Acid gas/organic vapor plus P100
- Acid gas/ammonia/formaldehyde plus 100
- Comfort waist belt
- Extended life battery
- Shoulder strap

Other Accessories

Welder's Adapter for Ultra Elite Facepiece

Kevlar Welder's Hood

Welder's Adapter for Full-Facepiece Respirators

MSA Welder's Adapters are molded of polycarbonate plastic, which has high resistance to impact, heat, and welding splatter. The clip-on adapter attaches to the facepiece by molded-in clips. The integral adapter is attached by removing the facepiece lens and replacing it with the adapter. A large vision area—4-1/2" x 5-1/4"—provides an unobstructed view of work. The Welder's Adapter is supplied with an impact-resistant cover lens; the desired filter plate is ordered separately. Rayfoe™ Filter Plates are available in four standard shades—6, 10, 12, 14.

The heat-resistant Welder's Hood is designed to protect the welder's head, neck, and shoulders from welding splatter and sparks. The Kevlar hood has a rubber seal which fits snugly over the Welder's Adapter. The hood also helps protect cartridges when an air-purifying respirator is used in welding operations.

Online Response® Respirator Selector

Available on the internet at www.MSAnet.com/response

- Helps identify the proper respirator you need
- Has broadest range of respiratory protective devices available
- Recommends respirators for more than 700 chemical hazards
- Has nearly 3,000 chemical synonyms
- Lists up to 27 categories of respirators, with MUCs
- Is generic in nature

MSA-U®, MSA's premier online training center, offers a wide range of training and informational materials. Register today at <http://msau.msanet.com>

Cartridge Life Expectancy Calculator

Available on the internet at www.MSAnet.com/msanorthamerica

Drag your mouse onto Resources, then Tools, then Cartridge Life Calculator

MSA's interactive web pages help users determine the life expectancy of specific respirator cartridges in various hazardous situations. This information provides guidance for how long a cartridge should be used before it must be replaced.

Chin-Type Gas Masks

Advantage 4000 Facepiece
(with canister)

Advantage 3100 Facepiece
(with canister)

Ultravue Facepiece
(with canister)

Ultra Elite Facepiece
(with canister)

The Chin-Type Gas Mask is a protective system consisting of a full facepiece and canister. The small, round plastic canister attaches directly to the facepiece. The system is designed to permit downward head movement.

The Chin-Type Gas Mask is designed for respiratory protection against a specific gas or group of gases as indicated by canister identification. See the canister table for specific canister approvals. From a practical standpoint, gas masks are generally suitable for ventilated areas with relatively stable contaminant concentration levels. They should never be used in confined spaces or where oxygen deficiency and high gaseous concentrations may occur. Gas masks may also be used for escape only from atmospheres in which the contaminant concentration does not exceed the maximum use condition of the gas mask.

Facepieces

Whether you choose the Advantage 4000, Advantage 3100, Ultravue or Ultra Elite facepiece, all four are available in three sizes to accommodate a wide range of users. The Advantage 3100 facepiece has a silicone rubber facepiece, while the Advantage 4000, Ultravue and Ultra Elite facepieces are available in a choice of silicone or Hycar rubber. All have a scratch-resistant polycarbonate lens that provides a wide field of vision. Optional lens cover accessories provide even greater scratch resistance. All three facepieces feature a nose cup that helps reduce lens fogging in low temperature conditions or in high-humidity conditions.

Belt-Mounted Version

The belt-mounted version of the Chin-Type Gas Mask allows the wearer to mount the chin-style canister on a support belt. This shifts the weight of the canister to the hip, providing greater comfort for some wearers. The belt-mounted version is also recommended for welding or grinding operations, as the canister can be positioned away from sparks or molten metal. An optional spark cover is available to protect canister from spark damage. The additional parts needed are listed on page 23. See page 21 for Welders Adapters, lenses and protective hood.

Respirators for Riot Control

The Millennium Riot Control Mask and the Advantage 1000 Riot Control Mask are NIOSH-approved for protection against CN and CS Riot Control Agents, and P100 particulate efficiency level.

Millennium® Riot Control Gas Mask

A Hycar version of the reliable military-style gas mask (MCU-2/P Mask, used by the U.S. Air Force in Desert Storm) that combines high performance, customized fit, comfort, and cost efficiency.

- Flexible, 1-piece polyurethane lens with wide field of vision is bonded to durable Hycar rubber facepiece
- Dual-canister mount (NATO 40mm thread) allows weapon sighting from either shoulder
- Drinking tube provides connection for fluid ingestion in contaminated atmospheres
- Fully elastic, 6-point head harness promotes easy on/off, easy adjustment, no hair pulling
- Internal nosecup with 2 check valves deflects air from the lens, reduces fogging
- Standard mechanical speaking diaphragm included, or add MSA's optional ESP® II Communications System
- NIOSH-approved (No. TC-14G-0254) for protection against chloroacetophenone (CN), chlorobenzylidene (CS), P100 particulate efficiency level, and particulates

Millennium Riot Control Mask

With nosecup, drinking tube, and clear polycarbonate outsert. Order canisters separately.

Millennium Riot Control Canisters

Millennium RC Canisters, box of 6	818264
-----------------------------------	--------

Advantage® 1000 Riot Control Gas Mask

A clean, simplified respirator with Hycar facepiece (based on a proven facepiece design developed for the U.S. Armed Forces) that's up to 40% lighter than conventional full-face respirators and gives high performance, customized fit, comfort, economy, and user acceptance.

- Flexible, 1-piece polyurethane lens with wide field of vision is bonded to durable Hycar rubber facepiece
- Dual-canister mount (bayonet mount) allows weapon sighting from either shoulder
- Fully elastic, 6-point head harness promotes easy on/off, easy adjustment, no hair pulling
- Standard nosecup helps eliminate lens fogging
- Standard mechanical speaking diaphragm included, or add MSA's optional ESP II Communications System
- NIOSH-approved (No. TC-14G-0235) for protection against chloroacetophenone (CN), chlorobenzylidene (CS), P100 particulate efficiency level, and particulates

Respirators for Homeland Security

Millennium® CBRN Gas Mask

The NIOSH government CBRN standard for full-facepiece gas masks was issued on March 7, 2003. After extensive testing to that standard, MSA's Millennium CBRN Gas Mask was first to receive NIOSH certification as "compliant against CBRN". A Hycar version of the reliable military-style gas mask (MCU-2/P Mask, used by U.S. Air Force in Desert Storm) that combines high performance, customized fit, comfort and cost efficiency.

- Flexible, 1-piece polyurethane lens with wide field of vision is bonded to durable Hycar rubber facepiece.
- Dual-canister mount allows weapon sighting from either shoulder
- Drinking tube provides connection for fluid ingestion in contaminated atmospheres
- Fully elastic, 6-point head harness promotes easy on/off and adjustment, with no hair pulling
- Internal nose cup with 2 check valves, deflects air from the lens, reduces fogging
- CBRN canister containing a P100 filter to remove aerosols, radionuclides, and solid particulates, and an impregnated activated carbon bed to adsorb (filter out) gases and vapors.
- Standard mechanical speaking diaphragm included, or add MSA's optional ESP II Communications System
- NIOSH-approved (No. TC-14G-0270) for protection at a CBRN Cap 1 rating

For Millennium Gas Mask accessories, see p. 24.

Ultra Elite® CBRN Gas Mask

Safety

- Super-soft black Hycar rubber exceeds the CBRN permeation requirements
- Large lens with 83% unimpeded vision
- Centrally located inlet port for secure, comfortable fit and feel
- Centrally located mechanical speaking diaphragm for clear communications
- Optional ClearCommand® Amplifier for increased communication capabilities

Simplicity

- Available with a 5-point rubber or Speed-ON head harness
- Identical sealing surfaces for both SCBA and Gas Mask facepieces—eliminating the need for redundant fit testing
- Simplified respiratory protection training program

Reliability

- The Ultra Elite facepiece is fire-service proven, with over a decade of trusted use
- MSA has been making gas masks since World War I
- Largest supplier of gas masks to the law enforcement market

Air-Purifying Respirators

Responder™ CBRN PAPR (Powered Air-Purifying Respirator)

A belt-mounted powered air-purifying respirator with choice of 2 proven tight-fitting facepieces in 3 sizes. The motor/blower provides constant air flow of a minimum 115 lpm to the facepiece via the breathing tube. Can be used with CBRN cartridge or with the OptiFilter XL or PAPR GME Multigas HE cartridge for tactical operations.

- Protects wearers for up to 8 hours under many hazardous conditions
- First CBRN-approved PAPR with a tight-fitting facepiece
- Choice of 2 proven positive-pressure facepieces, the MSA Millennium and the MSA Ultra Elite
- Choice of CBRN cartridge or multi-gas / particulate chemical cartridges for non-CBRN use

MSA's Responder CBRN PAPR system is ideal for military and special operations personnel who need non-IDLH respiratory protection for an extended period of time.

Industry trusted, with over 50,000 units fielded in various U.S. military programs, the C420 Motor-Blower is ideal for filtering contaminants from ambient air and providing a constant airflow of at least 115 lpm to the user's facepiece, providing a twenty times greater OSHA assigned protection factor than APR.

The Responder CBRN PAPR is available with 2 batteries that have the ability to be "hot-swapped" during warm environment use. The Lithium-Sulfur Dioxide mission battery has an 8 hour run-time. The Nickel Metal Hydride rechargeable battery has a 4 hour run-time. The motor / blower will not interfere with radio communications as it is EMI shielded to MIL-STD-461C.

The Responder CBRN PAPR comes complete with the motor-blower, belt, airflow indicator and breathing tube.

Responder CBRN PAPR Complete Systems

You must choose Responder CBRN PAPR Kit, facepiece, and cartridge for complete system.

About the CBRN PAPR Standard

NIOSH released a CBRN standard for powered air-purifying respirators (PAPRs) in October 2006. NIOSH conducted product testing and issued approvals to MSA's Responder CBRN PAPR, which was the first PAPR to pass the NIOSH requirements.

Safe Escape™ CBRN 15-minute Escape Respirator

Safe Escape Respirator in Hextreme Case

When escaping from CBRN agents, every second counts. Depend on the Safe Escape Hood from MSA. The hood gives your employees the protection they need to escape from a terrorist situation safely, quickly and easily — whether they work in high-profile office environments, for government agencies or embassies, or as law enforcement or first responders. The MSA Safe Escape Hood is the equipment of choice for today's diverse workforce.

Engineered for Maximum Performance

Manufactured with a high-performance laminate material, the hood is designed to provide you with the latest in head and neck coverage with respiratory protection against CBRN agents. The soft, high-stretch rubber neck seal conforms to irregular neck contours, allowing a secure fit on a wide variety of users. Its unique sized nosecup helps reduce lens fogging and carbon dioxide buildup by directing airflow inside the hood.

The Safe Escape Hood canister features a high-efficiency particulate filter and activated carbon to combat aerosols, gasses and vapors. In fact, the canister used in the hood contains 50% more carbon than similar canisters used by the U.S. military.

Designed for Comfort

In addition to designing the hood for maximum protection, MSA also took into account the comfort factor. A user who is potentially under stress requires ease of donning and use. The large lens and translucent hood allow better visibility, face recognition and help reduce claustrophobia. The nose cup allows communication superior to that of conventional devices, which require wearers to breathe through a mouth bit. With the integrated nose cup, wearers can breathe and speak normally to provide potentially life-saving communications. The hood also features cradle-type self-adjusting head straps that allow for quick, no assistance donning in the event of an emergency.

A Guide to Air-Line Systems

Description

Type C Supplied-Air Respirators, more commonly referred to as air-line respirators, are designed to provide long-duration respiratory protection.

They generally consist of a full-facepiece or half-mask facepiece connected by an air-supply hose to an air source (either a compressor or bank of large air cylinders). When connected to the air source, the respirator delivers a supply of respirable air to the user.

Accessory equipment, such as pressure regulators, pressure relief valves, carbon monoxide monitors and filters for air compressors, may be necessary to ensure that the air is at the proper pressure and quality for breathing. Air quality must be Quality Verification Level Grade D or better as defined in ANSI Standard Z-86.1-1973 (Compressed Gas Association Specification G-7.1 Commodity Specification for Air).

Current air-line systems fall into two categories:

Pressure-Demand and **Constant Flow**. The difference between the two is how the air is supplied.

Pressure-demand systems deliver air only when the user necessitates it. Thus, pressure-demand devices afford greater breathing efficiency.

In contrast, with a constant flow device, air flow to the respirator is continuous. However, because the air flow is continuous, constant flow air-line systems are generally used only with a compressor for a virtually unlimited air supply.

Type C Supplied-Air Respirators are approved by the National Institute for Occupational Safety and Health (NIOSH) for use in atmospheres not immediately dangerous to life and health (IDLH) or from which the wearer can escape without wearing the respirator.

“Not immediately dangerous to life and health” means any hazardous atmosphere which may produce physical discomfort immediately, chronic poisoning after repeated exposure, or acute adverse physiological symptoms after prolonged exposure. (42 CFR, Part 84 subpart A, 84.2(x)).

This limitation is necessary because the air-line respirator depends entirely on an air supply not carried by the wearer. Therefore, if the air hose were severed or crimped, or the air compressor failed, the air supply to the wearer would be shut off. The wearer would be without respiratory protection and might not be able to safely escape from an IDLH atmosphere.

Another limitation of air-line respirators is that the air-supply hose limits the wearer to a fixed distance from the air source. As an air-line respirator user, it is your responsibility to supply the respirator with breathable air—Grade D or better. The following pages show complete hook-ups of various air-line systems, both pressure-demand and constant flow, from the air source to the respirator. The following information is a guide designed to aid you in hooking up your own air-line system.

Pressure-Demand Air-Line Respirators

Pressure-Demand Air-Line Respirators are designed to maintain a slight positive pressure of air inside the facepiece whether the wearer is inhaling or exhaling. This helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

Pressure-Demand Air-Line Respirators are designed specifically for non-IDLH toxic atmospheres. The exception is if the respirator is equipped with an egress cylinder of air to use during escape.

Pressure-Demand Air-Line Units require an air supply from an uncontaminated compressed-air source as stipulated in General Industry Safety and Health Regulations, Part 1910.134 (OSHA) with the delivered air conforming to at least Grade D of ANSI Standard Z86.1.

A common air source for pressure-demand systems is a cylinder of air (or bank of large air cylinders) which can be set up in remote sites that might otherwise be impossible to reach with a large stationary compressor.

Another air source option for pressure-demand respirators is a cylinder cascade system. A cascade system consists of several air cylinders joined together in a bank by means of coupler tees. Generally, the banks consist of three or more cylinders of either 244 cubic-feet or 330 cubic-feet-capacity. One or more workers can breathe from a cascade system.

If using a compressed air or a compressor system, each respirator generally requires 1.5 cfm per person and needs to maintain the inlet (working) pressure specified in the respirator instruction manual.

At a normal rate of consumption, a three-cylinder bank used with a pressure-demand unit will provide between 12 to 16.5 man-hours of air, depending on cylinder capacity.

MSA Pressure-Demand Air-Line Units Include:

PremAire® Cadet Respirator
(for non-IDLH atmospheres)

PremAire® Cadet Escape Respirator

- with Escape Cylinder
(for egress from IDLH atmospheres)

PremAire® Air-Line Respirator System:

- with Escape Cylinder
(for egress from IDLH atmospheres)
- with Vortex Tube
(for suit-cooling applications)
- with Dual-Supply
(to eliminate additional hose lengths)

Constant Flow Air-Line Respirators

Constant Flow Air-Line Respirators also maintain a slight positive pressure of air inside the facepiece whether the wearer is inhaling or exhaling. This helps prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal.

Constant Flow Air-Line Respirators maintain air flow at all times, rather than only on demand. Because of this, constant flow units almost always use a compressor as their air source. A constant flow unit would quickly exhaust the air from a cylinder or cascade system.

There are two types of Constant Flow Air-Line Respirators: one uses a tight-fitting facepiece; the other, a loose-fitting hood or helmet. Inlet air pressure must be able to maintain at least 4 cfm for a tight-fitting facepiece and 6 cfm for a loose-fitting hood.

The inlet pressure for Constant Flow Air-Line Respirators varies between 10-15 psig for low pressure systems and 35-40 psig for high pressure systems.

For Constant Flow Air-Line Hoods, the inlet pressure usually ranges between 10-15 psig and 85-100 psig, depending on the type. Also, depending on the inlet pressure, the length of approved air-supply hose for these systems is usually between 8-50 feet for low-pressure systems and 8-300 feet for high-pressure systems. Consult the instruction manual for your respirator to determine the specific inlet pressure and hose length.

MSA Constant Flow Respirators with Loose-Fitting Hoods Include:

- Versa-Hood™ Air-Supplied Hood

MSA Constant Flow Respirators with Tight-Fitting Facepieces Include:

- Constant Flow Air-Line Respirator
- Constant Flow Duo-Twin™ Air-Line Respirator
- Constant Flow Duo-Flo™ Air-Line Respirator
- Abrasi-Blast™ Supplied-Air Respirator

PremAire® Cadet Supplied-Air Respirator

The PremAire Cadet Respirator is a pressure-demand, Type-C, supplied-air respirator with a mask-mounted regulator that responds quickly to wearer's changing breathing requirements. The respirator can serve as a basic air-supplied device, or it can be easily upgraded to the versatile, state-of-the-art PremAire System. Designed for a variety of applications, PremAire Cadet Respirators can be used in non-IDLH (Immediately Dangerous to Life or Health) environments only. Operating inlet pressure is 60-100 psig. NIOSH approved.

Facepieces

MSA offers choice of two facepieces, the proven Ultra Elite Facepiece or the new industrial Advantage 4000 Facepiece for the PremAire Cadet Respirator. Choose from three facepiece sizes (small, medium, or large) in either Hycar or silicone rubber. Nosecups are available in two sizes, standard and large.

The **Ultra Elite Facepiece** features:

- A one-way check valve preventing exhaled air from entering the mask-mounted regulator
- A rugged polycarbonate lens with scratch-resistant coating
- A mechanical speaking diaphragm for short-range communications
- Five adjustable rubber straps for exceptional head comfort, security, and safety
- Optional heat-resistant Kevlar net-style head harness

PremAire Cadet Kits

NEW!

These PremAire Cadet Respirator K kits include PremAire Cadet Respirator with Advantage 4000 Facepiece (medium size, Hycar Rubber, polyester net head harness) with Push-To-Connect FireHawk MMR, nylon belt assembly, listed quick disconnect for connecting respirator to air-supply hose, neoprene air supply hose 50-foot section complete with corresponding plug to attach air-supply hose to air source.

Description	Part No.
PremAire Cadet Air-Line Respirator with Foster Steel quick-disconnects, neoprene air supply hose 50-foot section with Foster Steel Plug	10108493
PremAire Cadet Air-Line Respirator with Snap-Tite Aluminum quick disconnects, neoprene air supply hose 50-foot section with Snap-Tite Aluminum Steel Plug	10108594
PremAire® Cadet Air-Line Respirator with TransportAire™ Portable Air-Supply Assembly: kit includes a PremAire Cadet Respirator with an Advantage 4000 Facepiece (medium size, Hycar™ Rubber, polyester net head harness) with Push-To-Connect FireHawk® MMR and nylon belt assembly, Snap-Tite Quick Disconnect and a low-pressure TransportAire Portable Air Supply with 30-minute carbon fiber cylinder, and eight-foot coiled nylon air supply hose.	10108495

The **Advantage 4000 Facepiece** features:

- Available adapters to convert the Advantage Facepiece to a Twin-Cartridge Respirator (using Advantage Cartridges) or an RD40 Facepiece
- A one-way check valve preventing exhaled air from entering the mask-mounted regulator
- A rugged polycarbonate lens with scratch-resistant coating
- Four-point silicone head harness for exceptional comfort and security
- Optional polyester net or Kevlar net head harness

PremAire® Cadet Escape Respirator

Applications
 Chemical and petrochemical
 Hazardous materials
 Confined space entry
 Firefighting operations

Combination Supplied-Air Respirator with Escape Cylinder

Features and Benefits

- New one-piece first-stage regulator and cylinder valve;
 - *Combination cylinder valve and first stage pressure reducer*
 - *Very small size and profile*
 - *Regulator uses many of same parts as MSA FireHawk SCBA*
- Regulator body protects cylinder gauge — no need for rubber gauge guard, reduces size!
- Choice of cylinder hip placement allows workers freedom and versatility
- Two harness materials:
 - *Standard Nylon—ideal for chemical resistance*
 - *Kevlar—ideal in high heat environments or in areas with potential for sparks*
- Two attachments for keeping cylinder secure on belt
 - *Sturdy metal cylinder support bands*
 - *Nylon or Kevlar cylinder bags available for carbon fiber cylinders*
- Shoulder support strap incorporates hose keeper; regulator hose stays in place close to body, reduces chance of snagging
- Bracket/holder for second stage pressure regulator

Size, Simplicity, and Economy

The PremAire Cadet Escape Respirator is designed to be versatile, comfortable, and affordable. A streamlined new design offers a first-stage regulator and cylinder valve within one assembly, creating a very small size and profile that is less likely to snag when working in tight places.

Low-profile escape cylinders can be worn on either the right or left hip. The Ultra Elite Pressure-Demand Facepiece or Advantage 4000 Facepiece with APR conversion capability offer choice of sizes and nose cups. The Firehawk® MMR Regulator let users choose

from Push-To-Connect (PTC) or Slide-To-Connect (STC) attachments. All regulators feature a bypass and a choice of solid cover or purge.

The economical PremAire Cadet Supplied-Air Respirator with Escape Cylinder is a cost-effective respiratory protection solution for many industries. For ordering ease and flexibility, these systems will be sold as part-numbered kits or through MSA's Assemble-To-Order (ATO) System. The PremAire Cadet Supplied-Air Respirator with Escape Cylinder is NIOSH-approved as a combination supplied-air respirator and self-contained breathing apparatus.

Facepieces

MSA offers choice of two facepieces, the proven Ultra Elite Facepiece or the new industrial Advantage 4000 Facepiece for the PremAire Cadet Respirator. Choose from three facepiece sizes (small, medium, or large) in either Hycar or silicone rubber. Nosecups are available in two sizes, standard and large.

The **Ultra Elite Facepiece** features:

Approvals

The PremAire Cadet Escape respirator is approved by the National Institute for Occupational Safety and Health (NIOSH) as an Open-Circuit, Pressure-Demand, Escape, Self-Contained Breathing Apparatus or Combination, Open-Circuit, Pressure-Demand, Escape, Self-Contained Breathing Apparatus and Type C, Supplied-Air Respirator (TC-13F-542,543,544,545). The respirator is approved for use at temperatures above -25°F. The compressed-air container shall be fully charged with air meeting the requirements of CGA C-7.1 Grade D or higher quality. When supplied with respirable air through an air supply hose; the air supply pressure range shall be 70-90 psig, the hose length shall be 8-300 feet, and the air supply shall meet the requirements of CGA C-7.1 Grade D or higher quality.

10108592	PremAire Cadet Escape Air-Line Respirator, 10-minute aluminum egress cylinder, with Hansen Brass Quick Disconnects, one 50 foot section of neoprene air supply hose with Hansen Brass Plug.

The Assemble-To-Order System

Thousands of possible combinations let workers select just the right PremAire Cadet Escape Respirator for the job. The ATO System works by allowing users to create their own part numbers. Each digit of an ATO part number will represent a specific component, so that the entire part number represents a finished respirator built exactly to the desired specifications. Advantages of the ATO System include: you get the exact model of PremAire you need; no special orders, because all orders are customized; fresher cylinders from our continually rotated inventory; simplified ordering process; and timely delivery.

PremAire® Air-Supplied Respirator System PD

**PremAire System
with Escape
Cylinder**

The PremAire Supplied-Air Respirator System is one of the most advanced air-line respirators available. Designed to provide the utmost in versatility, the modular system allows users to order the respirator configured for their specific application.

A lightweight mask-mounted regulator provides high air flow and responds quickly to changing breathing requirements.

The basic PremAire Respirator includes the patented manifold and can be upgraded with any of the three following options:

1. an Escape Cylinder that permits emergency escape from Immediately Dangerous to Life and Health (IDLH) atmospheres. (Please see Note 2 below ordering information.)
2. a Dual-Supply option that lets workers connect from one pressurized continuous air source to another without losing continuity of air flow.
3. a Vortex Tube option that delivers whole-body temperature control for added worker comfort.

The PremAire Respirator is a full-face, pressure-demand, Type-C supplied-air respirator with a patented waist-mounted manifold.

In addition to the flexibility offered by the manifold, the PremAire Supplied Air Respirator System is available with the Firehawk® Mask-Mounted Regulator (MMR).

Fully Configured PremAire Manifold

This revolutionary 2nd-stage regulator, offered in push-to-connect (PTC) and slide-to-connect (STC) versions, combines user-friendly connections and unbeatable care and maintenance. The Ultra Elite Pressure-Demand Facepiece or the Advantage 4000 Facepiece with APR conversion capability offer choice of sizes and nose cups. The Firehawk® MMR Regulator lets users choose from Push-To-Connect (PTC) or Slide-To-Connect (STC) attachments. All regulators feature a bypass and choice of solid cover or purge. For more information, please reference Bulletin 0114-20 or call MSA Customer Service at 1-800-MSA-2222.

Traditional MSA Part Numbers

See the following page for Assemble-To-Order information. For customers who require faster delivery, the most popular PremAire system combinations can still be ordered with a traditional MSA part number. These assemblies come with a medium Hycar Ultra Elite Facepiece and nose cup with rubber harness. For these assemblies, Quick-Disconnects must be ordered separately (see p. 42; you need a male plug with female 1/4" NPT (column 2), and a female socket assembly (column 5)).

Complete Assemblies with Firehawk STC Regulator

Complete Assembly w/ Firehawk STC, 5-minute 3AL aluminum cylinder, right-hip model, with case	10045164
Complete Assembly w/ Firehawk STC, 10-minute 3AL aluminum cylinder, right-hip model, with case	10045165

PremAire System User's Guide

The PremAire System User's Guide provides a comprehensive core instruction manual covering the basic PremAire Supplied-Air Respirator, plus four sub-manuals covering each of the PremAire System options (escape cylinder, Duo-Twin, dual-supply and (vortex tube.) The User's Guide also includes an illustrated parts list, a quick-reference chart showing the various PremAire Respirator configurations available, and a hard-cover binder with tab pages to house and organize these materials.

All these manuals are available on our website: www.MSAnet.com

MSA-U®, MSA's premier online training center, offers a wide range of training and informational materials. Register today at <http://msau.msanet.com>

8 10-Min Left Hip Aluminum		Note: Must choose No Bypass option when ordering PremAire less an escape cylinder				8 Advantage 4000 Kevlar Net	I Foster Brass				
								J Cejn Chrome			

*Note: This matrix must only be used for ordering complete PremAire Systems. This matrix cannot be used for ordering individual components (i.e., facepieces, escape cylinders, etc.). Please order components separately using their standard MSA part number.

‡For applications strictly limited to non-IDLH atmospheres, NIOSH requires that the respirator system be configured without a bypass on the Fire Hawk Mask-Mounted Regulator (MMR). Please contact MSA Customer Service for more information.

* Unit requires use of a quick-disconnect for connection to air-line to maintain approval. All quick-disconnects listed are non-locking except for the Cejn chrome (J).
Note: See page 44 for air-line hoses.

SAR/Air-Line Respirators

Duo-Twin™ Respirators and Duo-Flo™ Respirators

Above: Duo-Twin Respirator with Advantage 4000 Facepiece
Below: Ultravue Duo-Twin Plug

Duo-Twin Respirator

The Duo-Twin Respirator comes in a Constant-Flow version; Constant-Flow respirators are normally used where an ample air supply is available, such as that provided by an air compressor. The MSA Duo-Twin Respirator features an air-purifying cartridges, which also protect against a variety of contaminants. If the air supply should ever fail on the Constant-Flow unit, the user is automatically protected by the air-purifying cartridge.

This product is popular in the pharmaceutical, chemical, petrochemical, and nuclear industries. This MSA respirator should not be used in atmospheres containing less than 19.5% oxygen. NIOSH approved.

Duo-Twin Respirator

Complete Assembly*

Complete with facepiece, breathing tube, adapter assembly/regulator, web belt and Foster steel plug and socket assembly.

Constant Flow Duo-Twin Respirator with Advantage 4000 Facepiece	10105705
Constant Flow Duo-Twin Respirator with Ultravue Facepiece	484087

Duo-Twin Plug for Ultravue Facepiece

Allows conversion of an Ultravue Duo-Twin Facepiece to a Twin-Cartridge Respirator.

Duo-Twin Plug	486637
---------------	--------

* Cartridges must be ordered separately. See pages 15–16 for ordering information.

Duo-Flo Respirator

The Duo-Flo Respirator comes in a Constant-Flow version; Constant-Flow Respirators are normally used where an ample air supply is available, such as that provided by an air compressor. Duo-Flo Respirators use the MSA Ultra Filter, a compact round filter cartridge that has a large effective filter area to provide low-breathing resisting. This cartridge has a P100 classification. Duo-Flo Respirators are popular in the pharmaceutical, chemical, petrochemical, and nuclear industries. This MSA respirator should not be used in atmospheres containing less than 19.5% oxygen. NIOSH approved.

Abrasi-Blast™ Supplied-Air Respirator

The Abrasi-Blast Respirator provides respiratory and upper body protection for workers in shipbuilding, the construction industry, utilities, and other applications where blasting with abrasives is performed.

A complete Abrasi-Blast Respirator is made up of a hood, facepiece with lens housing, breathing tube, cover lens cartridge assembly, flow-control device, approved air-supply hose, and support belt. Users can choose between a standard Constant Flow Advantage 4000 Facepiece, a Duo-Flo Advantage 4000 Facepiece (designed to handle both air-supplied and air-purifying—particulate only—modes of operation) or an Ultravue Facepiece.

During blasting operations, the lens of the Abrasi-Blast Respirator is protected by 2 to 4 flat glass cover lenses mounted in a special foam material. Each cover lens is removed by integral pull tabs when it becomes so abraded that vision is reduced. There is no need to stop to change lenses, as is necessary with most conventional blasting hoods. Approved by NIOSH.

For more complete information, see Bulletins 0112-37 and 0112-41.

Complete Assemblies with Advantage 4000 Facepiece *NEW!*

(Includes hood, medium facepiece with net head harness (10089910), lens housing, one lens cartridge (three 0.12" untempered glass cover lenses per cartridge), breathing tube (470734), web belt (9961), and adjustable Snap-Tite (AL) valve connector with socket assembly). Order air supply hose separately.

Hood Style	Flow-Control Device	Complete Assembly
Waist	35-40	10089177
Shoulder	35-40	10089210

Complete Assemblies with Duo-Flo Constant Flow Advantage 4000 Facepiece *NEW!*

(Includes hood, medium facepiece with net head harness (10089910), lens housing, one lens cartridge (three 0.12" untempered glass cover lenses per cartridge), breathing tube (457158), web belt (9961), and adjustable Snap-Tite (AL) valve connector with socket assembly).

Hood Style	Flow-Control Device	Complete Assembly
Waist	35-40	10116961
Shoulder	35-40	10116962

Complete Assemblies with Ultravue Facepiece

Includes one lens cartridge consisting of four 0.06-inch untempered glass cover lenses, flow control device, Snap-Tite aluminum quick-disconnect fitting, valve-connector body, facepiece (medium) with dual exhalation valves and lens housing, breathing tube, web belt, and air-hose connector.

Inlet Pressure Range	Hypalon Hood with Collar	
	Waist-Length	Shoulder-Length
10-15 psi	468716	468720
35-40 psi	468718	468722

SAR/Air-Line Respirators

Constant Flow Air-Line Respirator

Constant Flow Air-Line Respirator with Advantage 4000 Facepiece

Constant Flow Air-Line Respirator with Ultra Elite Facepiece

Constant Flow Air-Line Respirator with Ultravue Facepiece

Constant Flow Air-Line Respirator with Comfo Facepiece

Constant Flow Air-Line Respirator with Welder's Comfo Facepiece

Constant Flow Air-Line Respirators are designed to maintain a slight positive pressure of air inside the facepiece, whether the wearer is inhaling or exhaling. This helps to prevent contaminants from seeping in around the facepiece, even if there should be small breaks in the face-to-facepiece seal. The complete respirator assembly is available with Advantage 4000, Ultravue or Ultra Elite Full

Facepiece, Comfo Half-Mask Facepiece, or Comfo Welder's Facepiece; breathing tube; web support belt; and air-flow control valve with quick-disconnect assembly. The Constant Flow Respirator is used in non-IDLH environments. NIOSH approved. For more complete information, see Bulletin 0112-38.

Complete Assemblies

Choose facepiece, control valve, and quick-disconnect assembly. Comes with breathing tube and a web support belt. For optional PVC belt, see Accessories on page 45.

Quick-Disconnect	Advantage 4000 Facepiece	Ultra Elite Facepiece	Ultravue Facepiece	Comfo Facepiece	Welder's Comfo Facepiece
High-Pressure Control Valve (35-40 psig inlet pressure for 8-300 ft of hose)					
Snap-Tite aluminum	10088132	810829	460863	460865	460862
Foster steel	10088134	810831	461717	480466	480600
Hansen brass	10088136	†	486258	†	†
CEJN Locking chrome-plated brass	10088135	810832	480629	480631	480671
Low-Pressure Control Valve (10-15 psig inlet pressure for 8-50 ft of hose)					
Snap-Tite aluminum	10088107	806775	463300	463302	463281
Foster steel	10088109	806776	480472	480474	480468
Hansen brass	10088121	806779	484836	484837	†
CEJN Locking chrome-plated brass	10088110	806777	480637	480639	480645

Note: Facepieces can also be ordered in silicone instead of Hycar rubber. Three sizes of facepieces are available. For belts, MSA Air-Supply Hose and other accessories, see pages 44–45. For separate quick-disconnect plugs and sockets, see page 42. See pages 40–41 for typical Pressure Demand Air-Line and Constant Flow Air-Line Systems setup.

† Available by special order only. High-pressure control valves are also available with the following special order quick-disconnects: Snap-Tite brass or stainless steel, Foster brass, and Hansen brass, or stainless steel. Low-pressure control valves also available with: Snap-Tite brass or stainless steel, Foster brass, and Hansen brass. Please call your nearest MSA distributor for complete ordering information.

Constant Flow Air-Line Respirator Kits NEW!

These Constant Flow Air-Line Respirator Kits include a Constant Flow Air-Line Respirator with an Advantage 4000 Facepiece (medium size, Hycar Rubber, polyester net head harness) with a High or Low Pressure Flow Control Valve, breathing tube and nylon belt assembly, the listed quick disconnect for connecting the respirator to the air supply hose, a 50 foot section of neoprene air supply hose complete with the corresponding plug to attach the air supply hose to your air source.

Constant Flow Air-Line Respirator, Low Pressure Control Valve, with Foster Steel quick disconnects, 50 foot section of neoprene air supply hose with Foster Steel Plug	10108494
Constant Flow Air-Line Respirator, High Pressure Control Valve, with Foster Steel quick disconnects, 50 foot section of neoprene air supply hose with Foster Steel Plug	10108593

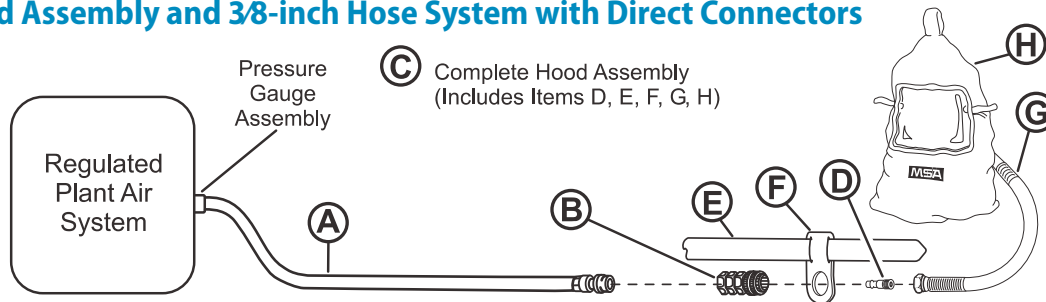

Versa-Hood™ Air-Supplied Hood CF

The Versa-Hood Air-Supplied Hood is an inexpensive hood respirator which may be used anywhere a Type-C air-supplied hood is required. This versatile hood is available in two lengths (shoulder- and waist-length) and two materials (Tyvek and Saranex). All Versa-Hood respirators can be used with either a plant air system or personal air compressor.

When head protection is needed, a special three-point Velcro system secures the hood to an MSA V-Gard Cap. The hood suspensions (basic or ratchet versions) are easily adjustable and stable, minimizing the need for a chin strap. The hood is designed to be disposable, thus eliminating the need for cleaning, and a twin-lens system extends the life of the hood. MSA also offers a package of ten replacement lenses. An air-distribution system keeps the lens fog-free. NIOSH certified. For more complete information, see Data Sheet 01-02-01.

Versa-Hood Assembly and 3/8-inch Hose System with Direct Connectors

Versa-Hood Assembly and 3/8-inch Hose System w/Direct Connectors

Air-Supply Hose— see page 44 (A)

Cool only vortex, less Quick-Disconnect (requires 15 cfm at an inlet pressure between 75 to 90 psi)	494392

Portable Air Supply Systems

Industrial Air Cart

Provides air for up to four pressure-demand air-line respirators

The Industrial Air Cart permits up to 4 NIOSH approved air-line respirators to be connected to 2 one-hour 4,500 psig breathing apparatus cylinders (not included).

Features:

- Two-wheel poly powder-coated cart, two sets of double-cylinder straps, air-line hose rack and adjustable pull handle.
- A 5,500 psig pressure regulator reduces the 4,500 psig cylinder air to the proper air-line respirator inlet pressure.
- Low-pressure cylinder alarm whistle.
- An outlet pressure gauge operates in 0-125 psig range.
- Four-outlet manifold is available with 4 outlet fitting options.

Cart Weight and Dimensions

Size: 35" H x 21" W x 15.25" D

Unit weight: 38.5 pounds without cylinders

For more complete information, see Bulletin 0114-28.

MSA-U®, MSA's premier online training center, offers a wide range of training and informational materials. Register today at <http://msau.msanet.com>

Industrial Air Cart

Part No.	Description
10107537	Industrial Air Cart equipped with union adapters
10107779	Industrial Air Cart equipped with Snap-Tite Aluminum Quick Disconnects
10107780	Industrial Air Cart equipped with Foster Steel Quick Disconnects
10107811	Industrial Air Cart equipped with Hansen Brass Quick Disconnects

Technical Rescue Cart

Provides air for up to four pressure-demand air-line respirators and unique rescue tools that are used by the Fire Service and HazMat Teams

The Technical Rescue Cart is a steel cart with a color-designated control panel that allows one side of the panel to be used for primary respirator breathing air and one side for tool/ secondary air requirements. Two 1-hour cylinders are used to provide air for respirators. High-pressure cascade (fire truck) cylinder air is used to operate pneumatic tools. The standard features of the Technical Rescue Cart make it a unique and very versatile air cart for the fire service and HazMat industries.

Features:

Breathing Air Segment includes:

- Two-wheeled, poly-coated steel cart, two sets of double-cylinder straps, air-line hose rack and adjustable pull handle
- Low-pressure cylinder bell alarm
- Four-outlet manifold—available with four outlet fitting options

Tooling Air Segment includes:

- CGA-347 fitting to attach to an auxiliary remote high-pressure air source
- Low-pressure pneumatic alarm whistle
- Four-outlet manifold with Quick Disconnects

Cart Weight and Dimensions

Size: 35" H x 21" W x 15" D

Unit weight: 54.5 pounds without cylinders

For more complete information, see Bulletin 0114-28.

10107819	Technical Rescue Cart equipped with Hansen Brass Quick Disconnects

TransportAir System: Low-Pressure Configuration

The TransportAir™ System

The TransportAir System is available in two versions: one for high-pressure cylinders and one for low-pressure cylinders. Both versions consist of an impact-resistant handle with urethane-coated nylon straps that fit around a standard MSA SCBA air cylinder (purchased separately), a regulator, and a regulator-to-hose adapter. An Audi-Larm device is provided standard on the high-pressure system and is available as an option for the low-pressure system. Both systems are designed for use with MSA supplied-air respirators equipped with a dual-supply option.

A major advantage of the dual-supply option is improved mobility; workers need not remain tethered to a single air-supply hose throughout a work period.

For more complete information, see Bulletin 0114-21.

The PortAir® System

The PortAir System holds two standard SCBA air cylinders to provide firefighters, industrial personnel, confined-space workers, and others with a portable, compressed-air source any time an air-line device is required.

Designed for use with MSA pressure-demand supplied-air respirators, including dual-purpose self-contained breathing apparatus (SCBA), the PortAir System consists of a compact air-pressure regulating system housed in a lightweight, yet durable, anodized aluminum frame.

For more complete information, see Bulletin 0114-21.

Aluminum	30-minute	2216 psig	18lb. 0 oz.	809872

All weights shown are approximate.

*These cylinders are capable of custom options.

Typical Air-Line Systems: Pressure Demand System

Note: DO NOT use teflon sealing tape on straight threaded connections with O-ring seals.

Note: Cascade cylinders are not normally used with a constant-flow system due to excessive air usage—one large (300 cu ft) cylinder would last one working person only about 15 minutes. Therefore, using cascade cylinders with a pressure-demand system is recommended.

Pressure Demand System

Quick-Disconnects for Air-Line Respirators and Air-Supplied Hoods

Quick-disconnect assemblies connect air-supply hoses to the manifold and to the air source. If you want to use a quick-disconnect to interconnect lengths of air supply hose, you must use a locking-type quick disconnect—specifically,

the locking quick disconnects listed in the yellow box at the bottom of this page. For more complete information, see the Pocket Guide to Air-Line Systems (Bulletin 0114-14-MC).

Quick-Disconnects and Adapters AL-Aluminum; S-Steel; SST-Stainless Steel; BR-Brass

A Pocket Guide to Air-Line Systems

This pocket-size booklet shows complete hook-ups of the various MSA air-line systems, both constant flow and pressure demand, from the air source to the respirator connection. Below each illustration, the individual parts of the system are identified by title and part number. The reader is then referred to other pages in the guide for more information about the specific MSA components. To order your copy, request Bulletin 0114-14-MC.

Air-Line Respirator Accessories

NEW!

Breathing Air Distribution System Filtration Box

The Breathing Air Distribution System filtration box is housed in a rugged polymer case. It is equipped with three-stage filtration, a pressure regulator, a four-outlet manifold and a continuous flow 115 VAC carbon monoxide monitor. The filtration box may be used in a portable or stationary position.

Features

- Two models of filtration boxes are available – one box provides 50 cubic feet of air per minute and a second provides 100 cubic feet of air per minute.

Three-stage filter:

- First-stage particulate/ bulk liquid separation filter element
 - Filter Change Indicator changes from green to red color
 - Removes 95% of bulk particulates and liquids at 5 microns
 - Auto drain removes liquids from bowl
- Second-stage oil-coalescing and ultra-fine particulate filter element
 - Filter Change Indicator changes from green to red color
 - Removes oil and particulates to 99.99% at 0.01 micron
 - Auto drain removes liquids from bowl
- Third-stage activated charcoal filter element
 - Filter Change Indicator changes from green to red color
 - Removes organic vapors, odors and tastes
- Pressure regulator and gauge operate in 1-125 psi range.
- Four-outlet manifold – available with four outlet fitting options.
- Carbon monoxide monitor continuously monitors for carbon monoxide in the breathing air. The monitor operates on 115 VAC and has two 9 VDC batteries for the carbon monoxide sensor and to act as back-up in the event of an AC power failure.
- Protective case is constructed of a corrosion-resistant polymer.

Portable Grade-D filtration system provides breathing air for up to four air-line respirators

Filtration Box Dimensions and Weight

50 CFM Filtration Box

Size: 23.5" L X 16.75" H X 8.5" D

Unit weight: 24.6 pounds

Maximum air flow:

50 scfm @ 110 psi

100 CFM Filtration Box

Size: 26.25" L X 20.75" H X 9" D

Unit weight: 38.8 pounds

Maximum air flow:

100 scfm @ 110 psi

See Bulletin 0112-39 for further information.

Air-Line Respirator Accessories

Breathing Air Distribution System—Point of Attachment Box

The Breathing Air Distribution System point of attachment box is housed in a rugged polymer case. It is equipped with one-stage filtration, a pressure regulator and a four-outlet manifold. The point of attachment box may be used in a portable or stationary position.

Features

One-stage filter:

- First-stage particulate/bulk liquid separation filter element
 - Filter Change Indicator changes from green to red color
 - Removes 95% of bulk particulate and liquids @ 5 microns
- Pressure regulator and gauge operate in a 1-125 psi range
- Four-outlet manifold – available with four outlet fitting options
- Protective case is constructed of a corrosion-resistant polymer

Portable Grade-D filtration system provides breathing air for up to four air-line respirators

Point of Attachment Dimensions and Weight

Size: 23.5" L X 16.75" H X 8.5" D

Unit weight: 24.6 pounds

Maximum air flow: 50 scfm @ 110 psi

See Bulletin 0112-40 for further information.

Cascade System Accessories

The following components are used to assemble a 2400 psi cascade system, which consists of a bank of respirable-air cylinders (user-supplied) that supply a flow of air to pressure-demand air-supplied respirators. Air-supply hoses are listed separately at right.

Cascade System Accessories	
Audi-Larm™ Warning Device, low-pressure (CGA 346), 0–3000 psig	85078
Audi-Larm™ Warning Device, high-pressure (CGA 347), 0–5500 psig	492307
Air Coupler Tee – low-pressure CGA 346, 0–3000 psig	68850
Air Coupler Tee - high pressure CGA 347, 0-5500 psig	10081206
Air Pigtail – low-pressure CGA 346, 0–3000 psig	68851
Air Pigtail - high pressure CGA 347, 0-5500 psig	10081205
Air Cylinder Pressure Regulator, dual-gauge, 0-3000 psig	68858
High-Pressure Air Cylinder Regulator, dual-gauge, 0-5500 psig	633352
Male Air-supply Hose Adapter for Foster Quick-Disconnects (for PVC hose)	55716
Union Adapter (required to attach male plug)	69542

Manifolds

Required when using multiple (2–4) respirators from a single air source; some of these manifolds have quick-disconnect assemblies with automatic shut-off outlets. Note: Gauge required when greater than 10' between airline point of connection and the regulator.

Manifolds

No. of Outlets	Foster Quick-Disconnect	Snap Tite Quick-Disconnect	less Quick Disconnect
4	47370	486053	488914
2	84416	93931	84418

Support Belts

MSA PVC belts are easy to decontaminate. If decontamination is not a factor, users may opt for an uncoated nylon web belt.

Support Belts

Polyurethane-coated Nylon Support Belt, black	492827
PVC Support Belt, clear	473902
Web Support Belt (uncoated)	9961

Inlet Pressure Gauge

MSA offers an inlet pressure gauge that enables a user to check pressure at the inlet of the MSA Air-Supply Hose, thereby assuring that air pressure is within the certified range. The gauge is supplied with Quick-Disconnect fittings.

Inlet Pressure Gauge

w/ Snap-Tite fitting	w/ Foster or Schrader fitting	w/ Hansen fitting	less Quick-Disconnect**
476734	476735	476737	492586

**See Column 4 plug and Column 3 union on page 42.

Pressure Regulator

MSA's pressure regulator is used with a plant air compressor system to reduce compressor pressure to the desired operating pressure. The regulator maintains pressure on the outlet side until readjusted for use with inlet pressure of up to 125 psig.

Pressure Regulator

Pressure Regulator	66716
--------------------	-------

Air-line Filter

The MSA air-line filter removes a minimum of 99% of 0.3 micron and larger particulates, including dusts, mists, fumes, smoke, and petroleum vapors. Caution: It does not remove carbon monoxide. The air-line filter can be used at inlet pressures up to 125 psig.

The pressure drop is one psig at a maximum rated air flow of 25 cfm.

Air-Line Filter

Air-line Filter - with 1/2" NPT female inlet and outlet	81857
Air-line Filter - with 3/4"-16 straight threads	488041
Replacement Filter Kit	484923

TransAire® 5, TransAire® 10, and Custom Air V® Escape Respirators

Quick Escape from IDLH Atmospheres

When you need to bail out quickly, the TransAire 5 and TransAire 10 Escape Respirators deliver a consistent air supply at 40 lpm (liters per minute). This standard-flow rate makes for a smooth escape in normal aerobic escape applications. The TransAire 10 Escape Respirator is pressurized to 3000 psig, and the TransAire 5 Escape Respirator is pressurized to 2216 psig. The compact units employ aluminum cylinders that can withstand exposure to temperatures from 0° to 160°F. Despite their durability, the units are extremely lightweight.

The Custom Air V Escape Respirator is designed with a high flow rate and meets stringent air flow requirements for extremely aerobic escape applications. It provides a five-minute, constant air flow at 72 lpm and is available with either an aluminum or a carbon fiber cylinder.

TransAire and Custom Air V Complete Assemblies

TransAire 5 Escape Respirator complete (includes aluminum cylinder, carrier, hood tube, hood assembly)	10008292
TransAire 5 Escape Respirator complete, less air (includes aluminum cylinder, carrier, hood tube, hood assembly)	10066739
TransAire 10 Escape Respirator complete (includes aluminum cylinder, carrier, hood tube, hood assembly)	10008293
TransAire 10 Escape Respirator complete (includes fully-wound carbon fiber cylinder, carrier, hood tube, hood assembly)	10083327
TransAire 10 Escape Respirator complete, less air (includes aluminum cylinder, carrier, hood tube, hood assembly)	10066740
Custom Air V Escape Respirator complete (includes fully-wound carbon fiber cylinder, carrier, hood tube, hood assembly)	484353
Custom Air V Escape Respirator complete (includes aluminum cylinder, hood tube, hood assembly)	802197

Accessories

Single-unit wall-mounting case	696192
Two-unit wall-mounting case	696193
Single unit carrying case, yellow polyethylene, with handle, for all escape respirators	10012530

Two unit and single unit wall mounting case - chemical resistant ABS plastic case resist weathering, moisture, and corrosion to ensure escape respirators stay in ready-to-use condition.

Single unit carrying case

SAR/Self-Contained Breathing Apparatus

AirHawk® II Industrial Air Mask

Industrial SCBA with enhanced options to fit many budgets.

The new AirHawk II Air Mask is built upon MSA's established AirHawk MMR Air Mask and is a lightweight, durable, and economical SCBA for many industrial IDLH (immediately dangerous to life or health) applications. This SCBA fits any budget by keeping its lower-cost options while offering many new choices not offered with any other industrial air mask. In addition, the AirHawk II Air Mask is available in both low-pressure and high-pressure versions.

MSA's AirHawk II Air Mask is a pressure-demand apparatus designed to maintain a slight positive air pressure inside the facepiece during inhalation and exhalation. Positive pressure helps to prevent contaminants from seeping in and around the facepiece, even if small breaks in the face-to-facepiece seal should occur. The AirHawk II Air Mask is built from six major components: facepiece, carrier and harness assembly, cylinder, first-stage regulator, mask-mounted regulator, and End-of-Service-Time-Indicator (EOSTI).

Facepiece

MSA offers you the choice of two facepieces, the proven Ultra Elite Facepiece or new industrial Advantage 4000 Facepiece for the AirHawk II Air Mask. Choose from three facepiece sizes (small, medium or large) in either Hycar Rubber or silicone rubber. Nosecups are available in two sizes, standard and large.

The Ultra Elite Facepiece features:

- a one-way check valve preventing exhaled air from entering the mask-mounted regulator
- a molded polycarbonate lens
- a mechanical speaking diaphragm for short-range communications
- five adjustable rubber straps for exceptional head comfort, security, and safety
- optional heat-resistant Kevlar hairnet-style head harness

Ultra Elite Facepiece

The Advantage 4000 Facepiece features:

- adapters to convert the Advantage Facepiece to a Twin-Cartridge Respirator (using Advantage Cartridges) or an RD40 Facepiece
- a one-way check valve preventing exhaled air from entering the mask-mounted regulator
- a molded polycarbonate lens
- four-point silicone head harness for exceptional comfort and security
- optional polyester net head harness

Advantage 4000 Facepiece

Airframe Carrier and Harness Assembly

MSA's durable AirFrame Carrier and Harness assembly comes standard with large side handles and a central attachment point to pull workers to safety in rescue scenarios. The AirFrame Carrier and Harness distributes the SCBA's weight over the user's hips for comfort and stability. The composite backplate is made of glass fiber-reinforced thermoset plastic and is ergonomically designed with a spine strain relief. Key components are detachable without special tools.

The assembly's harness components are available in nylon or high-strength Kevlar. Shoulder straps feature easy-to-release friction buckles to positively retain pull straps. A center-pull waist belt system is also incorporated into its design. This harness also provides optional shoulder pads, lumbar pad, and chest strap, making this unit the most comfortable industrial air mask on the market today.

The cylinder band is available in nylon or Kevlar and is secured by an adjustable nylon buckle, allowing the band to retain various cylinder sizes. An optional open-form stainless steel cylinder band provides rapid drop-in cylinder replacement, eliminating webbing adjustments and clips.

Cylinders

MSA offers a choice of three low-pressure (2216 psig) 30-minute-rated cylinders for use with this SCBA. Choose carbon-wrapped, fiberglass hoop-wound, or all-aluminum construction cylinders. High-pressure (4500 psig) carbon-wrapped cylinders are available in 30-, 45- or 60-minute durations.

First-Stage Regulator

The PR-14 Regulator is designed with the fewest number of parts in the industry, with Teflon-coated anodized valve bodies to minimize internal component friction and maximize service life. The PR-14 Regulator has only 14 replaceable parts and can be maintained without special tools.

Mask-Mounted Regulator

The second-stage Firehawk Regulator features a slide-to-connect (S-T-C) or push-to-connect (P-T-C) regulator attachment to meet the

widest preference ranges. An integrated shut-off prevents cylinder air loss when disconnecting the second-stage regulator from the facepiece. The FireHawk Regulator has only 22 replaceable parts and can be maintained without special tools.

EOSTI

MSA's Audi-Larm™ Audible Alarm is an air-actuated continuously-ringing warning bell that automatically sounds when the air-supply cylinder reaches 25% of its rated service life.

Options

- Optional air-line port, designed to accept an air-line connection from an independent air source
- Optional wireless Heads-Up Display provides the user with the remaining volume of cylinder air through four colored LEDs
- Optional Rapid Intervention Crew (RIC) System enables quick refilling (less than a minute) of an SCBA cylinder from a mobile compressor or cascade system, or you can also transfill between two SCBA wearers
- Optional Emergency Egress Rescue Belt, integral to the SCBA waist belt, features a Kevlar line (50 ft. or 75 ft.) and rappelling hardware
- Optional shoulder-mounted Quick-Fill System EBS accessory offers SCBA cylinder refill from a mobile compressor or cascade system and also allows transfilling between two SCBA wearers
- Optional ICM Tx Integrated PASS/HUD Transmitter features the Personal Alert Safety System (PASS) and the HUD Transmitter combined within a single housing

SAR/Self-Contained Breathing Apparatus

FireHawk® M7 Air Mask

MSA's **FireHawk M7 Air Mask** represents a true technological achievement in critical personal protection. As firefighters determined the safety requirements that would be needed to meet the NFPA 1981 and 1982–2007-edition standards, MSA's engineering teams began designing the solutions.

The FireHawk M7 Air Mask has seven **life-safety** design components built on a **modular** Air Mask platform, developed to **exceed the new NFPA 2007** requirements and provide firefighters with the highest-quality SCBA currently available.

Designed to meet **NFPA 2007**-edition standard.
Determined to exceed your
safety equipment expectations!

1. TAKING THE HEAT

Although MSA PASS alarms have performed in extreme temperatures for more than a decade, a top priority was to design an alarm that could **really take the heat!** The M7 alarm (*patent pending*) was developed in cooperation with prominent university acoustic experts, resulting in an emitter that exceeds 95 decibels with solid performance at the NFPA 500F test! Once again, giving you that lifesaving edge in the face of danger.

2. VIRTUALLY "BULLET-PROOF" ELECTRONICS

Like an armor shield, the M7 HUD, Power Module, and Control Module are encased in a proprietary high-temperature impact-grade polymer, providing the highest possible protection against impact and water ingress. Electronics enclosures are permanently sonically **welded** to a hermetic standard to ensure a consistent water-tight seal. M7 electronics are virtually **"bullet-proof"** against fire-ground hazards.

3. STRAIGHT-TALK COMMUNICATIONS

We've got you covered with communications, starting with a **high-performance mechanical speech diaphragm**, with performance that exceeds the 2007 NFPA requirements as a stand-alone solution. Backing the mechanical diaphragm is an **electronic amplifier** with an internal facepiece microphone for ultimate clarity. The ClearCommand® Communication System provides clear communication during the most critical times. This Air Mask speaks loud and clear when it comes to communications.

4. FIREGROUND MANAGEMENT

Firefighter accountability systems have never before been as practical, complete, and user-friendly as the **MSA M7 Accountability System**. Based on the ICM TxR Unit introduced in mid-2006, it displays a full array of visual and audible information for up to 100 firefighters within a one-mile-line-of-site—exactly what incident commanders wanted. Record keeping is also made easy by downloading reports. This crown jewel is available only from MSA!

5. EXTENDED PROTECTION

The FireHawk M7 Air Mask is not your typical SCBA. Firefighters need to be prepared for the unexpected, and emergency egress from a 2nd-floor or higher can be impossible without the right safety equipment. That's why the FireHawk M7 Air Mask offers an NFPA-compliant integrated rappelling system, called the Rescue Belt, providing firefighters with one more lifesaving option in the face of danger.

"Above and beyond" protection is also provided with the CBRN FireHawk MMR. The CBRN FireHawk includes a positive-protection Tetraplex™ shield, to prevent contact between chemical warfare agents and the most vulnerable component of regulators, their thin elastomeric diaphragm. Other "air-wash" approaches may pass in laboratory conditions. The Tetraplex shield provides positive protection against all potential conditions.

External hazards are bad enough without having concerns of spreading illness among firefighters through shared-use SCBA. The Ultra Elite® facepiece protects you against user cross-contamination with MSA's inhalation check-valve: a "must have" in modern safety equipment.

6. LIGHTWEIGHT AND EASY TO USE

Firefighters already have enough weight to carry and gear to maintain, so MSA engineers set out to lighten the load of components, reduce parts counts, **simplify maintenance**, maximize user comfort, and **modularize** the design. The FireHawk M7 Air Mask has a lightweight polymer backplate, with quick-release harness straps, an error-proof cam-lock cylinder attachment, fast change-out electronic components, a large swiveling lumbar pad, and regulators that will fit in the palm of your hand (**less than 30 parts** for the MMR and 14 for the 1st stage). Our time-tested Ultra Elite facepiece has unbeatable comfort, visibility, communications, cross-contamination protection, fit, and seal.

FireHAWK M7 Air Mask

7. PLATFORM FOR THE FUTURE

The FireHawk M7 Air Mask is designed to accept **future technology upgrades**. Included in every M7 electronics ensemble is a 2.4GHz **personal wireless network**, a network that transmits and receives encrypted information over a short-range on a firefighter's body.

This new wireless feature provides the capability to add on future technology that can provide additional information back to incident command through the FireHawk M7 Accountability System. You never have to worry about radio interference either—we have you covered with a thoroughly-tested RFI shield design that protects against all fireground radio signals. The new FireHawk M7 Air Mask provides you with the best technology today and positions you for well into the future.

			6 45' Carbon less Air										
			7 45' Carbon Low-Profile less Air										
	8 60' Carbon less Air												

A-M7

Part Number

Quantity

SCBA Key Components

Ultra Elite Facepiece

Heads-Up Display (HUD)

When you open your Air Mask's cylinder valve, the HUD automatically activates, displaying the cylinder pressure reading in 25% increments.

ClearCommand® Communications System

MSA's ClearCommand Communications System is designed specifically to meet the modern communications needs of firefighters. It features an internally mounted microphone coupled with a large-diameter (50mm) amplified speaker for optimal clarity and volume. Using a proprietary circuit design, the system delivers more than twice the volume of a facepiece alone. Mounted in an "out-of-the-way" position, the ClearCommand System doesn't block vision or mechanical communication. The Ultra Elite's mechanical voicemitter is still fully functional, even with the system installed.

Facepiece Assemblies for FireHawk M7 Air Masks

Ultra Elite® Facepiece

The MSA Ultra Elite Facepiece offers an effective combination of comfort and performance.

Designed to provide exceptional peripheral and downward vision, the Ultra Elite Facepiece features a super-soft facepiece texture for a smooth and comfortable fit. It also resists chemical attack and temperature extremes, and withstands rugged day-to-day use without tearing and ripping.

The design of the Ultra Elite Facepiece is based on extensive anthropometric studies of the face-length, temple-width and chin-width data from more than 8,000 individuals. The result is a facepiece that provides improved seals against a wide range of facial contours.

To provide a secure, comfortable fit, the facepiece utilizes five adjustable straps with stainless steel, field-replaceable buckles that resist chemical attack. The straps also feature slightly larger adjustment tabs that are easier to manipulate, even with gloves on.

For slip-on convenience, the Ultra Elite Facepiece can be equipped with the Speed-ON® Facepiece Harness. Made of flame- and heat-resistant Kevlar Fabric, the harness features a hair-net type, five-point suspension that can be easily and securely adjusted at each point.

Lenses on MSA full facepieces are molded from polycarbonate, and a special super hardcoating provides a tough, durable facepiece lens to resist scratching.

Firehawk® MMR

The Firehawk MMR, MSA's mask-mounted regulator assembly, is available with two different attachment systems, the Firehawk MMR truly redefines ease-of-use and ease-of-maintenance, combined with outstanding performance.

The Firehawk second-stage regulator features a unique Slide-To-Connect (STC) attachment system that allows firefighters to hang the regulator on the facepiece in the "ready position," then simply push it into the facepiece when SCBA air is needed. Doffing of the regulator, while wearing gloves, is also easy with two large release buttons that automatically turn-off the flow of air as the regulator is doffed. A dual-swivel feature on the pressure hose provides maximum freedom-of-head movement and the silicone hose material ensures hose flexibility even at very cold temperatures.

In addition to the STC system, MSA also offers a second connection option for the Firehawk Regulator, the Push-to-Connect (PTC). The PTC's Adapter self-centers the Firehawk regulator and the loud dual sound of the regulator engaging onto the facepiece provides you with confidence that the Firehawk PTC is securely attached to your facepiece—an action that takes just seconds, when seconds count!

Maintenance is also a breeze, considering the Firehawk design requires no tools, adhesives, or sealants, and has approximately 70% fewer parts as compared to other regulators on the market. Additionally, there are no internal adjustments required. Any adjustments to the regulator may be accomplished at a single adjustment point through the outlet port of the regulator.

Ease of use and maintenance, combined with outstanding performance, makes the Firehawk MMR clearly the product of choice.

Ultra Elite M7 Facepiece, Speed-ON Head Harness, Nosecup and M7 HUD Bracket

SAR/Self-Contained Breathing Apparatus

SCBA Key Components

Emergency Egress System

Rescue Belt

The M7 Rescue Belt is the first fully integrated NFPA-compliant emergency egress system for the Fire Service. The belt can be integrated into the carrier and harness assembly of the MSA Vulcan or Airframe Carrier and Harness assemblies. A 50 foot or 75 foot Kevlar line with a descender and carabiner is weaved into the belt to allow a trapped fire fighter to escape to either the ground or to a floor below the fire.

The belt is available in three lengths, standard (56 inches), mid-size (66 inches) and long (76 inches).

Rescue Belt

	Standard Size Rescue Belt	Mid-Size Rescue Belt	Long Rescue Belt
50' Kevlar Line	10052766	10071003	10052767
75' Kevlar Line	10052768	10071004	10052769

Carrier & Harness Assembly

FireHawk M7 Carrier and Harness Assembly

The one component of any SCBA that has the most impact on firefighter comfort is the carrier and harness assembly. The FireHawk M7 Carrier and Harness assembly places an emphasis on firefighter comfort while maintaining the robustness and reliability that is expected in the fire service. The carrier comes standard with large side handles and a central attachment point for pulling firefighters to safety in rescue scenarios. The swiveling lumbar pad provides maximum freedom of movement and comfort when crawling or climbing.

The assembly utilizes the proven pieces from previous generations of Air Masks such as the tunneled shoulder straps for hose containment, and tri-bar slides for easy removal/installation of the waist belt and shoulder straps.

All units are equipped with double-pull waist belts and an optional chest strap is available.

Cylinders

Carbon-Wrapped Cylinders

Carbon-wrapped Cylinders are the lightest SCBA air cylinders ever developed by MSA. They feature a unique outerwrap made of lightweight, high-performance carbon fibers, which reduces cylinder weight by two to six pounds when compared to fiberglass-wrapped cylinders and as much as ten pounds when compared to aluminum cylinders. They are available in five models to accommodate a wide range of applications.

Cylinders for SCBA

Part No.	Cylinder Type (Cylinder & Valve)	NIOSH Service Rating Life	Pressure	Weight** (empty)
807586	L-30* Carbon-Wrapped	30-minute	2216 psig	8 lb – 0 oz.
816115	L-30+* Carbon-Wrapped	30-minute	3000 psig	9 lb – 8 oz.
807587	H-30* Carbon-Wrapped	30-minute	4500 psig	7 lb – 4 oz.
807570	H-45* Carbon-Wrapped	45-minute	4500 psig	9 lb – 7 oz.
10035644	H-45 Low-Profile* Carbon-Wrapped	45-minute	4500 psig	9 lb – 10 oz.
807588	H-60* Carbon-Wrapped	60-minute	4500 psig	11 lb – 12 oz.
469619	Fiberglass Hoop-Wound	30-minute	2216 psig	13 lb. – 0 oz.
809872	Aluminum	30-minute	2216 psig	18 lb. – 0 oz.

*These cylinders are capable of custom options.

**All weights shown are approximate.

For more information see Bulletin 0108-11-MC. See Bulletin 0108-13-MC for information on **custom-logged cylinders** for your MSA Air Mask.

MSA Accountability System

Accountability is key to every firefighter's safety on a fire scene. MSA's optional Accountability System revolutionizes fireground safety by combining the latest computer software with a high-performance radio module and the field-proven technology of MSA's ICM Tx Integrated PASS.

A new way to monitor vital information

- Each MSA base station can monitor up to 50 firefighters, and you can use multiple base stations on a single computer.
- The FireHawk M7 Air Mask with telemetry transmits to incident command the firefighter's name, team assignment, cylinder pressure, service-time remaining, PASS alarms (motion or manual), thermal alarms, battery status, radio connectivity, and evacuation acknowledgement.

A fireground management system

- Personalized ID tags for each firefighter tell incident command exactly who is on scene.
- An integrated PAR (personnel accountability report) timer helps manage radio calls to each team.
- Incident command can manually add firefighters who are not wearing an SCBA or mutual aid firefighters, so all personnel can be accounted for.

Intuitive and easy to use

- Assign firefighters to teams by clicking on a firefighter's icon and dragging it to another team.
- A volume of critical information is available at a glance of the screen, due to the large number of firefighters that can be displayed and the pictorial format of the information.
- Receive both audible and visual indications of critical events such as PASS alarms or low-pressure alarms.

Accountability System Base Station Kits

10072240	Accountability Base Station Kit (includes software, magnetic antenna kit, USB cable, wall-mount cable, and 8-24 volt power cable)
10098767	Accountability Base Station Kit (includes software, fixed antenna kit, USB cable, wall mount cable, and 8-24 volt power cable)

MSA's M7 Accountability System revolutionizes fireground safety by combining the latest computer software with a high-performance radio module and the field-proven technology of MSA's ICM TxR Integrated PASS.

Field Maintenance and Repair

MSA offers a complete program for maintenance and repair of MSA Air Masks. The program is supported with personalized training tailored to customers' needs and taught in the field by MSA-authorized personnel.

User maintenance covers procedures necessary to conduct general cleaning, inspection, and limited maintenance in accordance with the Occupational Safety and Health Administration (OSHA), National Fire Protection Association (NFPA), and the American National Standards Institute (ANSI) standards.

C.A.R.E. Certified Air Mask Repair Education covers all maintenance for both low- and high-pressure SCBA. Air Mask inspection and maintenance can be performed by MSA or a factory-authorized service center.

Or, individuals can obtain training for C.A.R.E certification from MSA. By having a C.A.R.E-certified technician on staff, fire departments and other facilities with a large number of Air Masks can perform all inspection and maintenance in-house.

- All repairs and maintenance can be done in the field.
- A selection of overhaul kits, spare parts, and tool kits is available.
- Users may conduct periodic performance testing using an authorized MSA regulator tester.

A two-way evacuation feature

- Incident command is assured that firefighters receive all evacuation messages. When incident command transmits the alarm through the FireHawk M7 Air Mask, they'll know the firefighter received it, because the unit automatically sends a confirmation message to the base station.
- By simply pressing a button on his/her own control module, a firefighter can send a manual confirmation to acknowledge that they have received and understand the critically important evacuation message.
- Firefighters will hear the evacuation alarm on their own personal PASS device. Also, visual indications in the HUD and an icon on the control module will alert the firefighter that it is time to evacuate.
- An individual firefighter, a team of firefighters, or all firefighters can be evacuated with the click of a button.
- Although certain concrete and steel commercial structures can challenge any radio signal, MSA's Accountability System coverage with radio technology provides highly reliable performance for a 1-mile line-of-sight range.
- Due to the spread-spectrum design, it does not interfere with other high-band radio frequency equipment.
- For additional safety, both base station and firefighter modules have an icon message to inform users if a firefighter falls out of radio signal range, so that alternate accountability measures, such as voice radio contact with teammates, can be taken.

Accountability System

10083876	M7 Control Module Reader / M7 ID tag writer
10083875	M7 ID tags
10075756	Antenna kit with magnetic base
10098766	Antenna kit with fixed base

10047342	Wall mount power cable

SAR/Self-Contained Breathing Apparatus

Emergency Breathing Systems

The Quick-Fill® System

The patented Quick-Fill System lets MSA Air Mask users refill and transfill air cylinders while the SCBA is worn, without removing the air cylinder—even in IDLH atmospheres. Use this MSA-exclusive option to:

- Fill an SCBA cylinder from a mobile compressor or cascade system in less than a minute.
- Transfill between two cylinders, providing an Emergency Breathing System.
- Extend the air supply over longer durations, using a remote compressed-air source.

Because performance is not affected, MSA Air Masks retain NIOSH certification during use of the Quick-Fill System.

Air Masks compliant to recent NFPA standards have the Quick-Fill URC fitting located at the Audi-Larm warning device. A Quick-Fill hose with a quick-disconnect connects the air source to the adapter for air transfer. See Bulletin 0105-92-MC for a Question & Answer overview of Quick-Fill Systems.

The Quick-Fill System

Replacement Parts for the Quick-Fill System

10111642	Quick-Fill Hose Kit in Pouch, 3-foot emergency transfill hose	New!
485331	Emergency transfill hose, less Kevlar pouch	
10111404	Replacement Pouch for Quick-Fill or ExtendAire II	New!
485391	Male stainless steel quick-disconnect with SAE-10 thread, complete with dust cover (also for use as a fitting for customized refilling systems)	
485392	Female quick-disconnect with SAE-4 thread, complete with dust cover	

Quick-Fill Hoses

25-ft lengths are stocked; other "custom lengths" are available on a special material basis. All SAE Fittings are for high-pressure service. Female quick-disconnect fittings have dust covers.

RescueAire™ II Portable Air-Supply System

The RescueAire II Portable Air Supply System is designed to meet the needs of Rapid Intervention Teams (RITs). The system consists of a lightweight Carbon-Wrapped cylinder, Quick-Fill® emergency breathing system, ExtendAire™ emergency breathing system, and an MMR regulator, supported by a flame- and heat-resistant harness. The RescueAire II is a complete system that can provide emergency breathing air for most any victim.

The RescueAire II System is available in both low-pressure (2216 psig) and high-pressure (4500 psig) versions. An optional-use shoulder strap is also provided for hands-free carrying.

RescueAire™ II Portable Air-Supply System

with L-30 cylinder	less cylinder	Low-Pressure (2216 psig)
10100096	10100095	RescueAire II w/Firehawk Responder MMR
10041196	10041198	RescueAire II, Firehawk STC MMR
10041230	10041232	RescueAire II, Firehawk PTC MMR
with H-60 cylinder	less cylinder	High-Pressure (4500 psig)
10100097	10100094	RescueAire II w/Firehawk Responder MMR
10041195	10041197	RescueAire II, Firehawk STC MMR
10041199	10041231	RescueAire II, Firehawk PTC MMR

The ExtendAire™ System

The ExtendAire System can be used as both an emergency breathing system and a dual-purpose device for MMR SCBA to allow firefighters to quickly and easily connect to an air-line.

The new ExtendAire II offers an integrated rescue hose into the PR14 1st stage regulator with both a male and female quick connect fitting.

The ExtendAire™ System

812958	ExtendAire Air-line Hose with foster plug
812973	40" Rescue Hose
10031798	ExtendAire Upgrade Kit for Threaded Firehawk MMR
10031797	ExtendAire Upgrade Kit for Quick-Connect Firehawk MMR

Technical Rescue Cart

The Technical Rescue Cart is a steel cart with a color-designated control panel that allows one side of the panel to be used for primary respirator breathing air and one side for tool/secondary air requirements.

Two 1-hour cylinders are used to provide air for respirators. High-pressure cascade (fire truck) cylinder air is used to operate pneumatic tools.

The standard features of the Technical Rescue Cart make it a unique and very versatile air cart for the fire service and HazMat industries.

Cart Weight and Dimensions

Size: 35" H x 21" W x 15" D

Unit Weight: 54.5 pounds without cylinders

Features

Breathing-Air Segment includes:

- Two-wheeled, poly-coated steel cart, two sets of double-cylinder straps, air-line hose rack and adjustable pull handle
- Low-pressure cylinder bell alarm
- Four-outlet manifold – available with four outlet fitting options

Tooling-Air Segment includes:

- CGA-347 fitting to attach to an auxiliary remote high-pressure air source
- Low-pressure pneumatic alarm whistle
- Four-outlet manifold with Quick Disconnects

NEW!

Technical Rescue Cart

10107535	Technical Rescue Cart equipped with union adapters
10107818	Technical Rescue Cart equipped with Snap-Tite Aluminum Quick Disconnects
10107820	Technical Rescue Cart equipped with Foster Steel Quick Disconnects
10107819	Technical Rescue Cart equipped with Hansen Brass Quick Disconnects

The Technical Rescue Cart is sold without air cylinders. The following MSA cylinders can be used with the cart:

- 60-minute, H-60 carbon-wrapped cylinder
- 45-minute, H-45 carbon-wrapped cylinder
- 30-minute, H-30 carbon-wrapped cylinder

See p. 54 for ordering information. A 60-minute cylinder will provide maximum air supply.

SAR/Self-Contained Breathing Apparatus

Communication Systems

ClearCommand® HCS Helmet Communication System

The Helmet Communication System from MSA is a state-of-the-art radio interface device which significantly improves the user's ability to receive and send messages even in loud ambient-noise environments. It goes wherever you go. The system consists of a helmet-mounted microphone and ear speaker assembly that weighs 5.3 ounces and easily snaps onto the user's fire helmet's ratchet suspension. The helmet mic/ear speaker assembly connects to a lapel microphone or optional stand-alone PTT (push-to-talk) unit. The lapel microphone and PTT are permanently fitted with a connector for attachment to the specific radio of choice. The Helmet Communication System also offers a plug-in truck communication adapter that can be used by firefighters, along with their helmet microphone assembly, on the way to a fire scene or other incident. Once the firefighter arrives at the scene, the truck system cable is unplugged from the helmet microphone, and the helmet microphone cable end is connected to the user's lapel mic or PTT.

The user of the Helmet Communication System has uninterrupted communication from the time the alarm sounds until the incident is over.

For more complete information, see Bulletin 3639-01-MC.

Helmet Microphone Assembly

10042902 | Helmet Microphone Assembly (includes Custom Fitted Flannel Headband Liner)

See p. 59 for label mics, PTTs, and accessories.

Features and Benefits

- Incorporates a "noise-eliminating" bone-conduction voice transmitter that virtually eliminates high ambient noise levels.
- Custom user-fitted ear speaker brings all incoming communication directly to the user's ear. No need to lift your lapel mic up to your ear to hear transmission.
- Easily snaps onto the ratchet suspension of fire helmets or industrial-style helmets. The unit can be easily transferred to other users, and no tools are required for removal.
- Can be used over facepiece head harnesses, hoods and liners without losing the quality of the transmission.
- The bone-conduction microphone is made of soft silicone material, which makes it comfortable to wear, with no pressure points.
- The helmet microphone assembly can be reversed on the helmet suspension to position the ear speaker on either ear.
- The helmet mic system, when used with the lapel mic or PTT, is powered by the battery from the radio. No need to replace or re-charge dry cells.
- Special connectors suitable for most common radios are available for the lapel microphone and PTT, which allows users to adapt the system to their existing radios.
- The helmet mic is NFPA-certified which allows its use while fighting fires.
- Intrinsic safety approvals allow the use of the Helmet Communication System in hazardous environments.
- The stand-alone PTT unit is designed for use under hazardous material suits. The large button makes it easy for the user to depress and communicate.
- The helmet mic incorporates a cable keeper which allows for storage of the cable when it's not connected to the lapel mic or PTT.

ClearCommand® Communications System for Ultra Elite Facepieces

MSA's ClearCommand Communications System is designed specifically to meet the modern communications needs of firefighters. Because it's available in two versions, amplifier and amplifier with radio interface, firefighting teams can be properly fitted for the job at hand. Also, the systems are designed for "shared-use" of the amplifier with a unique "bus-bar" arrangement, so individual issue is not required.

The ClearCommand systems feature an internally mounted microphone coupled with a large-diameter (50mm) amplified speaker for optimal clarity and volume. Using a proprietary circuit design, the system delivers more than twice the volume of a facepiece alone. Mounted in an "out-of-the-way" position, the ClearCommand System doesn't block vision or mechanical communication. The Ultra Elite's mechanical voicemitter is still fully functional, even with the system installed.

The radio interface version features the same amplifier as the amp-only version, combined with an ear-speaker for incoming radio messages and a lapel mic assembly for interface with over 100 radios. The lapel mic can be used as a component of the ClearCommand system or as a stand-alone hand mic.

Both the amplifier and radio interface models are intrinsically safe, and meet the applicable requirements of NIOSH and NFPA 1981, 2002 edition.

APR Adapter

MSA's APR adapter provides firefighters with the versatility they need to perform all tasks at the fire ground with one common facepiece. From fire-fighting to overhaul to homeland security, firefighters can switch from a positive-pressure facepiece to a negative-pressure air-purifying respirator simply by engaging the APR Adapter. The APR Adapter uses MSA's comprehensive family line of air-purifying cartridges; select from the Advantage cartridges or our CBA/RCA canisters to protect against a multitude of airborne contaminants.

The APR Adapter is designed for use in non-IDLH environments and is NIOSH-approved. Contact MSA for more information.

Spectacle Kit for Full-Facepiece Respirators

For use by workers who must wear corrective lenses, the Spectacle Kit can be easily inserted into the facepiece. The kit includes a wire support, rubber guide, and pair of metal-frame spectacles. There are two kits for the Ultra Elite

Side-Support Spectacle Kit for Ultra Elite Facepiece

Center-Support Spectacle Kit for Ultra Elite Facepiece

facepiece; one uses a side wire support to hold the lenses in the facepiece, while the other uses a center support to position the unit. Desired adjustment is obtained by moving the spectacles in and out of the rubber guide and up and down the wire support. One size of spectacle frame is used (S-7 shape, 48-mm lens size) with Universal Bridge Corrective Lenses that can be obtained from local sources. The Spectacle Kit can be used with a nosecup.

Spectacle Kits

804638	Ultra Elite Spectacle Kit (side wire support)
493581	Ultra Elite Spectacle Kit (center support)

Nosecups

Molded from a soft rubber compound that is resistant to facial oils, the optional nosecup helps reduce the possibility of lens fogging. The nosecup is particularly effective under conditions of high humidity and/or low temperatures by inhibiting contact of moist exhaled air with the facepiece lens. A nosecup can be easily affixed to the facepiece without tools. Any size nosecup may be installed in any size Ultra Elite Facepiece for a customized, more comfortable fit.

Nosecups

495188	Medium Black Nosecup
495189	Large Black Nosecup

Shop Online for MSA Gear

MSA FireSlayer and Be Ready promotional items are available to anyone via MSA's Internet site.

Sporting appropriate logos are shirts, duffels, caps, golf items, mugs, money clips, lighters and more. The Fireslayer logo helps promote MSA to the firefighting market, while the Be Ready logo is aimed at Homeland Security. Look for the "MSA Gear" link in the Resources & Info area after selecting MSA North America; MSA United States from the MSA homepage at MSA.net.com.

After making your selections, complete the shipping information and furnish a credit card number. Your order will be processed, and you should receive it within a week. Express service is also available.

Cairns® Fire Helmets

Cairns Fire Helmets: Quality Craftsmanship Since 1836

Since 1836, Cairns has been the original manufacturer of leather firefighting helmets. Today, Cairns leather helmets retain the same authentic look and quality that generation after generation of firefighters have relied upon. And now, these helmets are also made with the added protection necessary for today's standards of safety in the firefighting industry.

Cairns also applies the same tradition of excellence to its newer lines of firefighting helmets. Both traditional and modern designs feature the very best

in contemporary high-tech materials, such as lightweight but durable fiberglass/Kevlar composites and tough, high-temperature thermoplastic.

All helmets are available with many options, including choice of colors, chinstraps, earlap material, etc. Also, a variety of accessories is available to complement Cairns fire helmets. Faceshields, goggles, ear/neck protection, and fronts can all be selected to configure the exact helmet you need.

Leather Helmets

The original leather helmet, individually hand-crafted to meet today's OSHA and NFPA standards with over 175 years of dependable performance.

Leather Helmet Features & Benefits

- Hand-crafted, 100% leather shell.
- Insurance against fireground damage with Cairns' 5-year shell replacement warranty.
- Non-corroding, high-temperature, glass-filled polymer faceshield/goggle hardware.
- Faceshield wing protectors for extra faceshield reinforcement.
- Nomex chinstrap with one-hand quick release buckle and postman slide allows quick and easy adjustment.
- Choice of Nomex or PBI/Kevlar earlap for increased neck/ear coverage and protection.
- High-temperature foam impact cap increases thermal and impact protection.
- High-temperature impact cap liner resists distortion at high temperatures.
- Comfortable fit for all head sizes between 6-3/8 inches and 8-3/8 inches.
- Large diameter helmet hanger fits on larger hooks and racks.

Traditional Helmets

Traditional style combined with high-tech performance.

Traditional Helmet Features & Benefits

- Cairns exclusive Defender Visor for Cairns 1010 and Cairns 1044 fire helmets.
- Simple rear ratchet height adjustment to fit all head sizes.
- Market-leading 5-year shell replacement warranty.
- Non-corroding, high-temperature-resistant, faceshield/goggle hardware.
- Rugged, high-temperature edge will not melt or drip.
- Easy front headband adjustment for proper SCBA mask fit.
- Headband (6 3/8 to 8 3/8) fits a wide variety of head sizes.
- Durable helmet hanger fits on large hooks and resists bending.
- Minimal parts for lower service cost and easier maintenance.
- Exclusive shell release system for an extra margin of safety
- Unique tube-lock system absorbs the shock of an impact.

For ordering information, replacement parts and accessories, contact your MSA Distributor.

SAR/Self-Contained Breathing Apparatus

Cairns® Fire Helmets

660C Metro®

Invader™ 664

Structural 360S®

Modern Helmets

Different models for applications such as structural firefighting and EMS/rescue.

Modern Helmet Features & Benefits

- Defender Visor now available on 660C Metro and Invader 664!
- Market-leading 5-year shell replacement warranty.
- Non-corroding, high-temperature-resistant, faceshield/goggle hardware.
- Rugged, high-temperature edge will not melt or drip.
- Easy front headband adjustment for proper SCBA mask fit.
- Simple rear ratchet height adjustment to fit all head sizes.
- Headband (6 3/8 to 8 3/8) fits a wide variety of head sizes.
- Durable helmet hanger fits on large hooks and resists bending.
- Minimal parts for lower service cost and easier maintenance.
- Exclusive shell release system for an extra margin of safety (except 360S and HP3).
- Unique tube-lock system absorbs the shock of an impact (except 360S).

For ordering information, replacement parts and accessories, contact your MSA Distributor.

Rescue 360R

Commando® HP3

Rescue 360R-13

Cairns Rescue Helmets

Rescue Helmets Features & Benefits

- Defender Visor now available on Commando HP3!
- Market-leading 5-year shell replacement warranty.
- Non-corroding, high-temperature-resistant, faceshield/goggle hardware.
- Rugged, high-temperature edge will not melt or drip.
- Easy front headband adjustment for proper SCBA mask fit.
- Simple rear ratchet height adjustment to fit all head sizes.
- Headband (6 3/8 to 8 3/8) fits a wide variety of head sizes.
- Durable helmet hanger fits on large hooks and resists bending.
- Minimal parts for lower service cost and easier maintenance.

For ordering information, replacement parts and accessories, contact your MSA Distributor.

Cairns® Fire Helmets

Now compliant
as primary eye
protection!

Defender® Visor for Cairns Traditional and Modern Helmets

MSA's Defender Visor for Cairns 1010 and 1044 Traditional Helmets and 660C Metro, Invader 664, and Commando HP3 Modern Helmets offers eye protection from dust, dirt, and grit. Sleek and attractive construction allows for fast, easy raising and lowering of your visor even with gloved hands. Visor stays clean inside your helmet until needed for eye protection during overhaul and non-IDLH search-and-recovery. The Defender Visor exclusive integral design is retractable for the ultimate in compact convenience. Standard clear and amber Tuffshield visor options are NFPA-compliant.

If you're looking for a new Cairns Traditional or Modern Helmet, or if you've thought about replacing your existing impact cap, consider the streamlined advantage of the new NFPA-compliant MSA Defender Visor. Cairns Traditional and Modern Helmets offer the perfect combination of durability and performance in lightweight, high-performance designs. Cairns once again integrates the latest technological advances expected by firefighters.

New Cairns 1010 and 1044 Helmet assemblies or 660C Metro, Invader 664, and Commando HP3 Helmets incorporating the Defender Visor may be ordered through Traditional or Modern Helmets Assemble-To-Order Matrices. A user-installable upgrade kit (includes new impact cap) lets you install the Defender Visor yourself.

Features and Benefits

- Available on Cairns 1010/1044 Traditional and 660C Metro, Invader 664, and Commando HP3 Modern Helmets
- Standard clear and amber Tuffshield visors are compliant with NFPA 1971; all Defender Visors meet ANSI Z87.1+ Standard
- Retractable eyewear system that's ready when you need it
- Available with new helmets or as user-upgrade kit
- Quick-disconnect for fast lens change-out without tools
- Never lose or misplace your goggles again
- Optically correct lens eliminates peripheral distortion
- Now compliant as primary eye protection!

Standard 1010 Defender Configurations

1010DS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Clear Defender Visor
1010DD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Clear Defender Visor
1010TS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Tuffshield Defender Visor
1010TD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Tuffshield Defender Visor

Standard 1044 Defender Configurations

1044DS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Clear Defender Visor
1044DD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Clear Defender Visor
1044TS	Includes Standard Flannel Cushion Liner, Yellow Nomex Earlap, Silk-Screened 6" Eagle Front Holder and Tuffshield Defender Visor
1044TD	Includes Leather Cushion Liner, Flannel Crown Pad, PBI/Kevlar Earlap, Carved 6" Eagle Front Holder and Tuffshield Defender Visor

Standard Fronts

Made with your choice of high-gloss patent leather or dull-finish genuine leather reinforced with a high-temperature, shrink-resistant back layer and sewn with high-temperature, fire-retardant Nomex thread.

The Choice Is Yours!

Standard fronts offer over 27 million possible configurations! Design your own standard front by choosing from the options and then indicating your preferences by calling 1-877-MSA-FIRE to place your order.

Crash Fire Rescue (CFR) Proximity System

- Easy to don and doff, this CFR System is compliant with NFPA 1971-2007.
- Designed and approved for use with the Metro 660C, Invader 664, Cairns 1010 and Cairns 1044 Fire Helmets, it will not interfere with the SCBA while in use.
- Components consist of an aluminized PBI/Kevlar layer, vapor barrier and inner layer.

Understanding Environmental Surveillance

Battery-powered, direct-reading instruments are classified as two groups—single-gas instruments or multiple-gas instruments—typically monitoring one or a combination of the following atmospheric conditions:

1. oxygen deficiency or enrichment;
2. the presence of combustible gas; and
3. the presence of certain toxic gases.

Depending on the capabilities of the instrument, monitoring can be conducted simultaneously for oxygen and combustible gas, or for oxygen, combustible gas and toxic gases. These devices are commonly referred to as 2-in-1, 3-in-1, 4-in-1 or 5-in-1 alarms.

No matter which type of instrument is used to check environmental gas concentrations, regular monitoring should be performed because a contaminant's level of combustibility or toxicity might increase even if it initially appears to be low or non-existent. In addition, oxygen deficiency can occur unexpectedly.

Atmospheric Composition

To determine the composition of an atmosphere, reliable instruments should be used to draw air samples. If possible, do not open the entry portal to the confined space before this step has been completed. Sudden changes in atmospheric composition within the confined space could cause violent reactions, or dilute the contaminants in the confined space, giving a false low initial gas concentration.

When testing permit-required spaces for acceptable entry conditions, always test in the following order:

1. oxygen content
2. flammable gases and vapors
3. potential toxic air contaminants

Comprehensive testing should be conducted in various locations within the work area. Some gases are heavier than air, and tend to collect at the bottom of a confined space. Others are lighter, and are usually in higher concentrations near the top of the confined space. Still others are the same molecular weight as air, so they can be found in varying concentrations throughout the space. This is why test samples should be drawn at the top, middle and bottom of the space to pinpoint varying concentrations of gases or vapors (see **Figure 1**).

The results of the atmospheric testing will have a direct impact on the selection of protective equipment necessary for the tasks in the area. It may also dictate the duration of worker exposure to the environment of the space, or whether an entry will be made at all. Substance-specific detectors should be used whenever actual contaminants have been identified.

Combustible Gases

In order for combustion to occur, there must be three elements:

1. fuel
2. oxygen to support combustion
3. heat or a source of ignition

This is known as the fire triangle, but if you remove any one of the legs, combustion will not occur (see **Figure 2**).

The percentage of combustible gas in the air is important, too. For example, a manhole filled with fresh air is gradually filled by a leak of combustible gas such as methane or natural gas, mixing with the fresh air. As the ratio of gas to air changes, the sample passes through three ranges: lean, explosive and rich (see **Figure 3**). In the lean range, there isn't enough gas in the air to burn. On the other hand, the rich range has too much gas and not enough air. However, the explosive range has just the right combination of gas and air to form an explosive mixture. Care must be taken, however, when a mixture is too rich, because dilution with fresh air could bring the mixture into the flammable or explosive range. An analogy is the automobile that won't start on a cold morning (a lean atmosphere because the liquid gasoline has not vaporized sufficiently), but can be flooded with too much gasoline (a rich atmosphere with too much vaporization). Eventually, when the right mixture of gas and air finally exists (explosive), the car starts.

How Combustible Gas Monitors Work

To understand how portable combustible gas detection instruments work, it is first important to understand what is meant by the Lower Explosive Limit (LEL) and Upper Explosive Limit (UEL). When certain proportions of combustible vapors are mixed with air and a source of ignition is present, an explosion can occur. The range of concentrations over which this reaction can occur is called the explosive range. This range includes all concentrations in which a flash will occur or a flame will travel if the mixture is ignited (see **Figure 3**). The lowest percentage at which this can happen is the LEL; the highest percentage is the UEL.

Most combustible instruments display gas concentrations as a percentage of the LEL. Some models have gas readouts as a percentage by volume and others display both percent of LEL and percent combustible gas by volume. What's the difference? For example, the LEL of methane (the major component in natural gas) is 5 percent by volume, and the UEL is 15 percent by volume. If we slowly fill a room with methane, when the concentration reaches 2.5 percent by volume, it is 50 percent of the LEL; at 5 percent by volume it is 100 percent of the LEL. Between 5 and 15 percent by volume, a spark could set off an explosion.

Different gases need different percent by volume concentrations to reach 100 percent of the LEL (see **Figure 4**). Pentane, for example, has an LEL of 1.5 percent. Instruments that measure in percent of the LEL are easy to use because, regardless of the gas, you are most concerned with how close the concentration is to the LEL.

Single-Gas Monitors for Oxygen Deficiency

Oxygen indicators measure atmospheric concentrations of oxygen. Concentrations are generally measured over a range of 0 to 25 percent oxygen in air, with readings being displayed on either digital readout or an analog meter.

Oxygen indicators are calibrated with uncontaminated fresh air containing a minimum of 20.8 percent oxygen. With some models, an alarm is activated when oxygen levels drop below 19.5 percent.

Single-Gas Monitors for Combustible Gases

Single-gas instruments for monitoring combustible gases and vapors are generally calibrated on pentane and are designed for general-purpose monitoring of hydrocarbon vapors. Such instruments operate by the catalytic action of a heated platinum filament in contact with combustible gases (see **Figure 5**). The filament is heated to operating temperature by an electric current. When the gas sample contacts the heated filament, combustion on its surface raises the temperature in proportion to the quantity of combustibles in the sample. A Wheatstone bridge circuit, incorporating the filament as one arm, measures the change in electrical resistance due to the temperature increases. This change indicates the percentage of combustible gas present in the sample.

Single-Gas Monitors for Toxic Gases

Compact, battery-powered devices can be used to measure levels of such gases as carbon monoxide (CO) or hydrogen sulfide (H₂S), depending on the model selected. Toxic gas monitors use electrochemical cells (see **Figure 6**). If the gas of interest enters the cell, the reaction produces a current output proportional to the amount of gas in the sample. With these instruments, audible and visible alarms sound if the gas concentration exceeds a preset level. These devices are well suited for use in confined spaces containing motors or engines, which can generate large quantities of CO, as well as in sewers, waste treatment plants and "sour crude" processing stations which tend to have hazardous volumes of H₂S.

Multiple-Gas Monitors for Oxygen and Combustible Gas

In applications where it is necessary to determine oxygen and combustible gas levels simultaneously, 2-in-1 diffusion-type devices can be used. Sensors measure 0 to 100 percent of the LEL and oxygen from 0 to 25 percent. Remote sampling requires either a pump module or an aspirator bulb adapter.

Multiple-Gas Monitors for Oxygen, Combustible and Toxic Gases

Toxic gases and vapors, which can be inhaled or absorbed through the skin, are frequently found in confined spaces. Sometimes, these atmospheric hazards can also displace oxygen and may incapacitate the body's ability to maintain respiration. Some toxic gases and vapors can also cause long-term physical damage to the body in cases of repeated exposure.

A number of instruments are available to assist in detecting toxic gas. Pocket-size monitors operate by diffusion or an aspirator bulb. Larger instruments with built-in pumps draw samples from the immediate area or from outside the confined space work area when used with sampling lines.

Diffusion-type instruments are available for simultaneously measuring the LEL of combustible gases, oxygen levels and toxic levels (in parts per million) of H₂S, CO and other toxic gases. Alarms also alert the user to low and high oxygen levels. Remote sampling pump adapters are available to convert these diffusion-type instruments into pump-style instruments.

Photoionization Devices for Toxic Gases and Vapors

A photoionization detector, featuring microprocessor technology, uses ultraviolet light to ionize molecules of chemical substances in a gaseous or vaporous state (see **Figure 7**). A real-time digital readout allows the user to make an immediate determination of gas and vapor concentrations. Depending upon calibration input, gas and vapors are measured over a 0.1 to 10,000 ppm scale. Some instruments automatically compensate for signal loss due to humidity, which is inherent in all PID detectors.

Detector Tube Sampling Systems

Detector tube-type devices are recommended for conducting quick evaluations of potential hazards that cannot otherwise be measured. With detector tubes, a known volume of air is drawn through the tube, using a manually operated or battery-powered sampling pump. If gas or vapor is present in the air, chemically treated granules in the tube are stained a different color. By measuring the length of the color stain within the tube, users can determine concentration levels.

Most tubes available today are made of glass, have break-off tips, and are filled with treated chemical granules. They generally have a shelf life of 24 to 30 months.

One type of pump frequently used with a detector tube is a compact, bellows-type device. Accurate and repeatable sample flows can be assured by a shaft that guides the bellows during compression. Some models feature an end-of-stroke indicator that lets the user know when a full air sample has been drawn. Models with an integral stroke counter eliminate the tedious recording of multiple pump strokes.

Calibration

To ensure the accuracy of all monitoring and detection equipment, calibration should be performed regularly. If the instrument reading differs significantly from the values of the known standard, the instrument should not be used until it has been adjusted or, if necessary, repaired.

ALTAIR® 5 Multigas Detector

The new MSA Altair 5 Multigas Detector raises the bar to higher levels of detection:

- 6-gas capability lets you test for more hazards in less time
- More than 18 preprogrammed languages are suitable for global applications
- High-resolution, crisp color display option incorporates intuitive user-interface
- Patented PulseCheck® Pump is integrated to ensure optimum pump performance
- Lithium-ion rechargeable battery provides enough runtime to cover double shifts
- 2-year comprehensive warranty for standard models helps to protect your investment

A call for help when you need one

Ideal for confined space applications or when working alone, exclusive MotionAlert™ feature, when enabled, activates a “man down” alarm if no motion is detected for 30 seconds. Exclusive InstantAlert™ feature allows users to manually activate an audible alarm to alert those nearby to potentially dangerous situations.

Easy to understand & operate

Using a portable gas detector should never be a challenge! The intuitive menu-driven display and three large, tactile buttons make operation easy – even while wearing gloves. Numerous customization options fit many budgets and experience levels, from personal monitoring and confined space pre-entry checks to industrial hygiene use.

Reliable sensors

MSA’s miniature catalytic combustion sensors will reliably detect up to 100% LEL of combustible gases, including many solvents. Our IR sensors deliver stable readings in environments with challenging temperature and humidity conditions. MSA’s high-performing electrochemical duo-tox hydrogen sulfide/carbon monoxide sensor offers an additional sensing option. Many other toxic sensor choices are available, including ammonia, chlorine, hydrogen cyanide, phosphine, and sulfur dioxide.

Calibration, simplified

The MSA Galaxy® Automated Test System provides for easy calibration and record keeping, while MSA Link™ Data Transfer Software quickly transfers stored information to a connected PC.

This unit could be the most rugged instrument you’ll ever use

- Comfortable to use – ergonomically designed rubber over-molded housing provides superior grip
- Water and dust resistant – IP65-rated
- Unsurpassed durability – survives a six-foot drop test

Options

- High-resolution color or monochrome display screen
- Integral pump or diffusion option
- Rechargeable lithium-ion or alkaline battery options
- 18-language display capability
- Expanded e-chem sensor options
- IR sensor options

ALTAIR 4X Multigas Detector

ALTAIR 4X Multigas Detector – charcoal

ALTAIR 4X Multigas Detector – phosphorescent

MSA'S New ALTAIR 4X Multigas Detector is driven by the most advanced technology available in any portable gas detector. Its design breakthroughs improve performance and ensure the ALTAIR 4X Detector outlasts the competition:

- Full three-year warranty
- Four-year sensor life
- Lower cost of ownership
- IP67 rating
- End-of-sensor-life warning
- 24-hour run time
- Withstands 20-foot drop
- Fast, high-performing MSA XCell™ sensors

Exclusive Safety Features Unique to Gas Detection:

- MotionAlert™ feature signals “man down”
- InstantAlert™ feature allows user to manually activate alarms.

ALTAIR 4X Multigas Detector

ALTAIR 4X Multigas Detector with North American approval, quick-start card, data logging, charger, calibration cap and tubing, CD manual. MotionAlert feature is now included as standard on all detectors.

Part No.	Description
10107602	ALTAIR 4X Multigas Detector (LEL, O ₂ , CO, H ₂ S) Charcoal
10110443	ALTAIR 4X Multigas Detector (LEL, O ₂ , CO) Charcoal
10110444	ALTAIR 4X Multigas Detector (LEL, O ₂) Charcoal
10107603	ALTAIR 4X Multigas Detector (Detector (LEL, O ₂ , CO, H ₂ S) Phosphorescent
10110445	ALTAIR 4X Multigas Detector (LEL, O ₂ , CO) Phosphorescent
10110446	ALTAIR 4X Multigas Detector (LEL, O ₂) Phosphorescent

Sensors/Spare Parts

10106729	Sensor Kit, XCell O ₂
10106725	Sensor Kit, XCell CO/H ₂ S two-tox
10106723	Sensor Kit, XCell H ₂ S
10106724	Sensor Kit, XCell CO
10110030	Front housing with integrated dust filters (Charcoal)
10110029	Front housing with integrated dust filters (Phosphorescent)
10106621	Main board with battery pack
10110061	LCD frame assembly (frame, LCD, zebra strips, screws)
10110062	Sensors gasket, Phillips screws (4x), self-tapping (2x)
10106623	CD manual, ALTAIR 4X Multigas Detector

Accessories

10069894	Stainless steel suspender clip
10046528	Universal Pump Probe (UL)
10088099	MSA Link™ Software CD-ROM
10082834	JetEye IR Adapter with USB connector
10050333	Hand aspirator assembly

Calibration Accessories

467895	Regulator 0.25 lpm Model RP
10048280	34L quad gas mix (1.45% CH ₄ , 15% O ₂ , 60 ppm CO, 20 ppm H ₂ S)
10089321	Calibration assembly (cap, tube, connector)
10045035	58L quad gas mix (1.45% CH ₄ , 15% O ₂ , 60 ppm CO, 20 ppm H ₂ S)

Power Supply

10086639	Charging cradle components
10087913	North American power supply
10092233	Charging cradle assembly
10095774	Vehicle charger
10111212	5-Unit multi-unit charger North American plug
10111214	10-Unit multi-unit charger North American plug

For more accessories, please refer to page 72.

See pages 86–91 for calibration accessories.

ALTAIR 4X Multigas Detector Assemble-to-Order (ATO) Options

To create your instrument configuration, select your instrument option codes and mark them in the boxes to the right.

Option	Description	Options	Code	Selection
A. Instrument Type	The Altair 4X Multigas Detector comes standard with MSA's new XCell Sensors and MotionAlert feature to indicate 'man-down'.	Instrument Type Altair 4X w/ XCell Sensors and MotionAlert feature	X	
B. Combustible Sensor	Choose your combustible sensor calibration. To select 0-100% LEL pentane, please choose L, for 0-5% Vol methane, choose M. For no combustible sensor, select 0 for none.	Combustible Sensor None LEL 1-100% pentane 0-5% Vol methane	0 L M	
C. Oxygen Sensor	To have an oxygen sensor installed in your new ALTAIR 4X Multigas Detector, please select 1. For no oxygen sensor, please select 0.	Oxygen Sensor Options None 0-30% Vol	0 2	
D. Toxic Sensor	To configure your new ALTAIR 4X Multigas Detector choose 0 for no toxic sensor. Choose A for both CO and H ₂ S sensors, choose B for CO, or C for H ₂ S.	Toxic Sensor Options None 0-1999 ppm CO and 0-200 ppm H ₂ S 0-1999 ppm CO 0-200 ppm H ₂ S	0 A B C	
E. Power Supply	Select the correct power supply for your region. Add an instrument cradle to firmly secure your instrument while charging on the shelf or in a vehicle.	Power Supply Options None North American European with cradle Australian with cradle North American with cradle Global	0 N E A M G	
F. Approval Label	Choose the applicable approval label for your area. For Europe choose E, for North America choose C, and for Australia choose A.	Approval Label Options Europe ATEX North America CSA (Canada pending) Australia	E C A	
G. Extended Warranty	MSA includes a full 3-year warranty on the Altair 4X Multigas Detector, which includes sensors, battery and electronics. Choose 1 for an additional year (four years total).	Extended Warranty Options Three years standard warranty Extended warranty (four years total)	0 1	
H. Packaging	To order bulk packaging for up to 10 units, choose 1 (one instrument version per package); to order the standard single unit carton choose 0.	Packaging Single carton 10-unit bulk package	0 1	
I. Color Case Option		Color Case Option Standard Charcoal Phosphorescent (Glow-in-the-Dark)	0 1

ALTAIR 4 QuickCheck Station

The Altair 4 QuickCheck Station performs bump and function tests in less than one minute, significantly trimming daily required preparation time for large Altair 4 Multigas Detector fleets. Keeps costs down with less up-front hardware expense and calibration gas.

ALTAIR 4 QuickCheck Station

10101519	ALTAIR 4 QuickCheck Station, 50% tolerance range
10101552	ALTAIR 4 QuickCheck Station, 20% tolerance range
10075893	Regulator
10101085	Cylinder holder assembly
10049410	Car charger

SIRIUS® PID Multigas Detector

The Sirius Multigas Detector unit with PID Sensor gives users all they are looking for in a reliable, easy-to-use, durable package to detect volatile organic compounds, while measuring for combustible, toxic and oxygen deficient atmospheres.

Tremendous Flexibility—One PID and four gases in one instrument allows for detection of hundreds of chemicals.

Reliable PID Performance—MSA's own proprietary PID sensor design (patent-pending) provides users with excellent PID performance including humidity resistance, stable zero readings, and fast response and clear times to allow users to get their jobs done dependably.

User-Friendly Software—Easy-to-use software allows users to focus on their tasks at hand!

Superior, Proprietary PID Sensor Design—Reduces maintenance time and cost.

Flexible Configurations—This design combines two instruments into one the Sirius unit can be used with or without the PID sensor mode.

Loud, Attention-Grabbing Alarm—The Sirius Multigas Detector provides outstanding alarms to clearly warn users of a hazardous situation. A piercing alarm horn, resonating through a specially designed horn chamber, is designed into the Sirius unit to give users an audible warning in the event of an alarm condition. Multidirectional bright LED lights give users visible warning of alarm conditions that can be easily seen from any direction the Sirius unit is facing. A "Safe LED" light gives users confidence the unit is actively

detecting gas by flashing every 15 seconds.

Interchangeable Lithium-ion and Alkaline Battery Packs—Allows for quick battery turn to keep users continually charged and ready to take action.

Easy Calibration and Compatibility with Galaxy Automated Test System—One-button calibration makes calibration simple for any user. Intelligent software frees users from complicated calibration adjustments.

Long-Term Storage Kit—Provides all the tools necessary to keep the Sirius Multigas Detector running if the unit has not been frequently used.

For accessories, please refer to page 73.

See pages 86–91 for calibration accessories.

Sirius PID Multigas Detector Assemble-to-Order (ATO) Options

To create your instrument configuration, select the instrument option code and mark them in the boxes to the right.

A. Photoionization Detector Lamp Option	To choose the standard 10.6 eV lamp for most VOC's, choose selection A. For the low energy 9.8 eV lamp with the most VOC discrimination, enter selection B.	PID Lamp None PID with 10.6 eV Lamp(0-2000 ppm) PID with 9.8 eV Lamp	Code 0 A B	Selection <input type="text"/>
B. Combustible Sensor Option	To choose to have your MSA 20L combustible sensor reading set to be displayed as 0-100% LEL, enter selection "L". For a display of 0-5% methane, enter an "M".	Combustible Sensor None 0-100% LEL 0-5% Methane	Code 0 L M	Selection <input type="text"/>
C. Oxygen Sensor Options	To choose to have an oxygen sensor installed in your new Sirius Multigas Detector, enter selection 1. For no oxygen sensor, enter a "0".	Oxygen Sensor None Oxygen (0-25%)	Code 0 1	Selection <input type="text"/>
D. Carbon Monoxide Sensor Option	To choose to have a carbon monoxide sensor installed in your new Sirius Multigas Detector, enter selection 1. For no carbon monoxide sensor, enter a "0".	Carbon Monoxide Sensor None Carbon Monoxide (0-500 ppm)	Code 0 1	Selection <input type="text"/>
E. Hydrogen Sulfide Sensor Option	To choose to have a hydrogen sulfide sensor installed in your new Sirius Multigas Detector, enter selection 1. For no hydrogen sulfide sensor, enter a "0".	Hydrogen Sulfide Sensor None Hydrogen Sulfide (0-100 ppm)	Code 0 1	Selection <input type="text"/>
F. Battery Pack & Charger Options	You may choose between MSA's lithium ion battery pack which includes a standard lithium ion battery charger, or the convenience of an alkaline battery pack. You may also choose to have both battery pack types included with your new Sirius Multigas Detector.	Battery Pack/Charger None Lithium ion, includes charger & cord Replaceable alkaline Both Lithium ion and replaceable alkaline battery packs	Code 0 A B C	Selection <input type="text"/>
G. Vehicle Charger Option	If you would like to order the vehicle charger for your new Sirius Multigas Detector, enter selection 1.	Vehicle Charger None Vehicle Charger	Code 0 1	Selection <input type="text"/>
H. Sampling Lines	MSA's Quick-Connect sampling lines are of the highest quality materials, guaranteed to provide accurate sampling concentrations. Sirius Multigas Detector sampling lines all includes a Quick-Connect air-line fitting for easy attachment and tight seal. For sampling jet fuel, enter selection 3 for the 10' teflon sampling line option, or selection 4 for the 25' sampling line option.	Sampling Lines None 10-foot polyurethane 25-foot polyurethane 10-foot teflon (for jet fuel sampling) 25-foot teflon (for jet fuel sampling) 3-foot polyurethane coiled	Code 0 1 2 3 4 5	Selection <input type="text"/>
I. Sampling Probes	MSA's sampling probes are durable & comfortable to use. The built in Water-Stop filter ensures that your sampling system is not contaminated with dirt and debris if the probe tip is dipped in water. You must order a probe if you order a sampling line, as we strongly recommend that you operate the instrument with this filter in place.	Sampling Probes None 1-foot Probe 3-foot Probe 8-inch Probe	Code 0 1 2 3	Selection <input type="text"/>
J. Carrying Attachments	While a high-strength stainless steel D-Ring is offered with this instrument at no extra charge, there are three other options for handling the instrument: the retractable carrying line for use with the D-Ring, the shoulder harness and the wrist harness to be used on the user's arm with a Level A suit.	Carrying Attachments None Retractable Carrying Line with Belt Clip Shoulder Harness Wrist Harness	Code 0 1 2 3	Selection <input type="text"/>
K. Instrument Jackets and Boots	To offer the highest level of instrument protection, you may choose a protective black rubber boot and harness, or a cordura jacket. You may also order both options by choosing selection C.	Instrument Jacket/Boot None Black Boot with Harness Cordura Jacket with Harness Black Boot, Cordura Jacket and Harness	Code 0 B C D	Selection <input type="text"/>
L. Calibration Kits	You may choose one of two calibration options for your Sirius Multigas Detector. The fixed-flow .25 lpm regulator includes a multigas calibration cylinder and also an isobutylene calibration gas cylinder if a PID selection is chosen. You may also order just the isobutylene calibration kit with gas cylinder.	Calibration Kits None Econo-Cal Fixed-Flow Regulator Calibration Kit (includes multigas and isobutylene cylinders) Model RP Fixed-Flow Regulator Calibration Kit (includes multigas and isobutylene cylinders) Isobutylene Calibration Kit (includes gas cylinder)	Code 0 1 2 3	Selection <input type="text"/>
M. Data Communications Kit	If you need to track the readings and operations of your Sirius Multigas Detector, consider ordering the instrument with the optional built-in datalogging module. The option also provides TWA and STEL capabilities.	Data Communications None Data Link Module Data Link Module and Software Kit	Code 0 1 2	Selection <input type="text"/>
N. Packaging	Your new Sirius Multigas Detector may be protected by a standard black plastic case, or by a black premium field case. You may also choose the option of a long-term storage kit case for emergency response, large enough to hold the Sirius Multigas Detector, calibration cylinders, spare sensors, spare PID lamp and lithium ion battery pack with charger, spare alkaline battery pack, lamp cleaning kit and simple-to-read and understand refresher instructions.	Packaging Standard shipping carton Standard black PVC case Premium black field case Long-term storage kit case Long-term storage kit basic includes PID lamp, add \$180 each sensor	Code 0 1 2 4 5	Selection <input type="text"/>
O. PID Lamp Cap	The standard easy-access lamp cap is included with your Sirius Multigas Detector at no extra charge. You may also choose a tamper-proof lamp cap.	PID Lamp Cap None Standard easy-access lamp cap Alternative tamper-proof lamp cap	Code 0 S T	Selection <input type="text"/>

ALTAIR Pro Single-Gas Detector

Some of the available ALTAIR Gas Detectors

The ALTAIR Pro Single-Gas Detector has a wide range of features, including simple intuitive operation, small rugged design, and dependable technology that is there when you need it. These innovative toxic gas and oxygen detectors are based upon the design of the popular ALTAIR Single-Gas Detector, but with added features and functionality.

- Tough rubberized housing
- One-button operation
- Accurately measures the gas concentration or percent oxygen
- Displays information on a large, clear, backlit LCD
- Superior dust and water protection (rated IP67 except O₂-R)
- Event-logging and data-logging
- Excellent impact resistance

- Versions available for CO, H₂S, O₂, NH₃, Cl₂, ClO₂, NO₂, SO₂, HCN and PH₃
- Great RFI performance
- Adjustable alarm set points are offered for LOW, HIGH, TWA and STEL
- Alarms are indicated by flashing LEDs, an audible alarm, and an internal vibrating alarm.
- Replaceable battery and sensor
- MSA Link™ Software displays logs, adjusts alarm set points, and disables/activates options

The ALTAIR Pro Single-Gas Detector will provide worry-free performance and stand up to the roughest handling in even the toughest industrial environments. The sensors and battery can easily be replaced to keep the unit performing for years. The ALTAIR Pro Single-Gas Detector is designed and built with MSA's superior quality and is part of the MSA STELLAR® Series, which features a varied selection of single-gas and multigas instruments.

Altair Pro Single-Gas Detectors

Instrument Type	Part No.	Low Alarm	High Alarm	STEL	TWA
Oxygen (O ₂)	10074137	19.50%	23.00%	N/A	N/A

ALTAIR Maintenance-Free Single-Gas Detector

The ALTAIR Single-Gas Detector features sensor options for carbon monoxide, hydrogen sulfide and oxygen and will operate for **over** two years maintenance free. This long lifespan, coupled with the unit's high performance, results in one of the most cost-effective single-gas detectors on the market. Advanced design offers superior dust and water protection and high resistance to RFI. Rubberized housing and one-button operation provide the durability and ease of use users expect from MSA instruments.

Durability Features

- Hard polycarbonate case, encapsulated in a thick rubberized shell
- Extremely resistant to drops and impacts
- Rated to IP67 protection levels for dust/water ingress

Alarm System

The triple-alarm system featuring two bright flashing LEDs, a piercing audible alarm, and a vibrating alarm ensures that no alarm condition goes unnoticed.

- 95 dB audible alarm (distinct sounds for High and Low alarms)
- Dual LEDs positioned to be seen from all angles
- Standard vibrating alarm and standard event logging

Warranty

Two years or 18 hours of alarm (1080 minutes)

Accessories and Parts

Combustible Gas Detectors

Gascope Combustible Gas Indicator

Explosimeter Combustible Gas Indicator

Gascope® Combustible Gas Indicators and Tankscope® Combustible Gas Indicator, Model 62T

Gascope Combustible Gas Indicators are portable instruments for use in detecting, measuring, and pinpointing leaks of combustible gases and vapors. Each unit is easily carried with integral neck and waist straps, leaving hands free for climbing, operating the instrument, or carrying additional equipment.

Three Gascope Combustible Gas Indicator models are available. The Model 60 is designed for use by gas utility companies in routine testing for methane-in-air concentrations in manholes, sewers, curb boxes, and other street openings. The Model 62S, also suitable for use by gas utility companies, is designed for reading 0–100% LEL methane-in-air and 0–100% by volume methane-in-air. The Model 62 is for general industrial use and is designed for reading 0–100% LEL pentane-in-air. For more complete information, see Data Sheet 08-01-04.

The Tankscope Combustible Gas Indicator, Model 62T, is a portable instrument specifically designed to detect combustible gas leaks in inerted shipboard oil holds. Based on the highly successful Gascope Combustible Gas Indicator, the portable Tankscope Indicator has an easy-to-read analog display and is very simple to use.

Approvals

Gascope Combustible Gas Indicators are listed by MET for use in Class I, Division 1, Groups C and D hazardous locations defined by the National Electric Code.

Explosimeter® Combustible Gas Indicator

The Explosimeter Combustible Gas Indicator detects and measures concentrations of combustible gases or vapors in the air. The instrument can be used in the immediate environment or, with sampling lines and probes, it can draw samples from remote areas. The unit is housed in a cast aluminum case. For more complete information, see Data Sheet 08-00-03.

Approvals

Model 2A is listed by Underwriters' Laboratories (UL) for use in hazardous locations as defined by the National Electrical Code. UL approval is for Class I, Group D, Divisions 1 and 2; and Class I, Groups A, B and C, Division 2 (Division 1 excluded), hazardous atmospheres.

Gascope/Tankscope Indicators

Complete with carrying straps and batteries, less sampling line.

Utility Model 60	465475
Model 62	465681
Utility Model 62S	468410
Model 62T, Tankscope	711258

Explosimeter Combustible Gas Indicator

Comes complete with carrying straps, less sampling line.

Description	Applications	Part No.
Model 2A	General testing for combustible gases or vapors in the air	89220

Ventilation Smoke Tube Kits

MSA's Ventilation Smoke Tube Kits are for use where controlled generation of a visible smoke is desired in order to determine the velocity of slow-moving air currents and establish their direction and flow patterns in shafts, mines and tunnels. They can also be used in commercial buildings and industrial processing plants to determine velocity and flow patterns of heating, ventilating, and air-conditioning systems. For more complete information, see Data Sheet 08-00-20.

Ventilation Smoke Tube Kits

Ventilation Smoke Kit, including aspirator bulb, two rubber plugs, and six smoke-producing tubes contained in plastic carrying case	458481
Ventilation Smoke Kit, including aspirator bulb, six tube caps, and two glass smoke-producing tubes contained in plastic carrying case	5607
Ventilation smoke tubes, box of 12	458480
Glass smoke tubes, box of 10	5645

Detector Tube Pumps

Kwik-Draw® Detector Tube Pumps

MSA's Kwik-Draw and Kwik-Draw Deluxe Pumps can be used with an assortment of MSA's detector tubes to spot-test atmospheres for a wide variety of toxic substances. They are designed for one-hand operation and consistent delivery of a sample draw volume of 100 milliliters (ml).

Kwik-Draw Detector Tube Pumps

488543	Kwik-Draw Basic Pump, with remote sampling adapter and carrying pouch
487500	Kwik-Draw Deluxe Pump, with remote sampling adapter, carrying pouch and end-of-stroke indicator

Accessories

73067	Sampling line, 10 ft
73068	Sampling line, 25 ft
73069	Sampling line, 50 ft
87970	Remote Sampling Adapter, required for above sampling line
488780	Solvent-Resistant Sampling Line, 25 ft, with reel
488872	Tube Holder, required for 488780 line above

Gas-Tester™ II H Detector Tube Pump

The Gas-Tester II H Pump is set for action by compressing the bellows. A pump stroke is started by pressing the release button. When the sample (100ml) is drawn through the tube, the end-of-stroke indicator changes color. An accurate measurement is obtained because the sample draw procedure itself is controlled only by the specifications of the pump and the flow resistance of the detector tube.

Gas-Tester II H Detector Tube Pump

Detector Tubes

Detector Tube Industry Action Sets

Agricultural Set

- 4 x Phosphine
- 2 x Sulfur Dioxide
- 4 x Methyl Bromide
- 2 x Hydrogen Cyanide

Pulp & Paper Set

- 3 x Chlorine Dioxide
- 2 x Sulfur Dioxide
- 3 x Hydrogen Sulfide
- 2 x Chlorine
- 2 x Ozone

Indoor Air Quality Set

- 2 x Carbon Monoxide
- 2 x Carbon Dioxide
- 2 x Formaldehyde
- 2 x Ozone
- 2 x H₂O (relative humidity)

Pharmaceutical Set

- 3 x Acetic Acid
- 3 x Aromatic HC
- 3 x Qualitest
- 3 x Hydrogen Cyanide

Petroleum Set

- 2 x Hydrogen Sulfide
- 2 x Carbon Monoxide
- 2 x Qualitest
- 2 x Benzene
- 2 x Hexane

Synthetics Manufacturing Set

- 2 x Toluene
- 4 x Qualitest
- 2 x Ethanol
- 2 x Vinyl Chloride
- 2 x Trichloroethylene

Semiconductor Sets

Chemical Vapor Deposition Process

- 3 x Ammonia tubes
- 3 x CO₂ tubes
- 3 x Nitrous fumes tubes
- 3 x H₂S tubes

Etching Process

- 4 x Ammonia tubes
- 4 x Chlorine tubes
- 4 x Hydrogen Chloride tubes

Epitaxy Process

- 3 x CO tubes
- 3 x Hydrogen Chloride tubes
- 3 x Phosphine tubes
- 3 x Phosgene tubes

Crystal Growth Process

- 6 x Phosgene tubes
- 6 x Phosphine tubes

Note: All sets are boxes of 12 tubes.

Chemical Warfare Agent Detector Tubes

Detect a wide range of nerve, blister, blood, and choking agents.

- Quick, simple to use, easy to interpret results
- Can be used with MSA's full line of pumps
- "Go/No Go" style
- All sold in boxes of 10 tubes
- Important: Sold only in the U.S.

Chemical Warfare Agent Detector Tubes

10007654	Nerve (Sarin, VX, GA, GD, etc.)
10007653	Blister (Mustard Gas)
10007650	Blister (Lewisite)
10007652	Blister (variety, including Mustard Gas)
10007651	Blood and Choking (CG, DP, AC, CK)

Single CWA Tube Sampler

Chemical Warfare Agent Detector Tube Kit

Chemical Warfare Agent Kit samples one CWA tube at a time.

HAZMATCAD™ and HAZMATCAD Plus Hazardous Material Chemical Agent Detectors

HAZMATCAD Detector

The HAZMATCAD Hazardous Material Chemical Agent Detector is a handheld instrument that detects and classifies Chemical Warfare Agents (CWA). When compared to other technologies, the HAZMATCAD Detector offers more capabilities and greater reliability at a lower cost.

Features

- Compact, light-weight and portable
- Self-diagnostic check during rapid warm-up
- Alphanumeric display with LED alarms
- Dual-Mode SAW Operation—Fast or High Sensitivity
- Operates between 8 and 12 hours on rechargeable Li-Ion batteries
- Vapor-diffusion check source verifies system performance
- Unit can be hand-carried or worn on belt
- RS-232 and IrDA communication ports; stores up to 8 hours of data
- Inlet design protects against dust and particulates

HAZMATCAD Plus Detector

The HAZMATCAD Plus Detector detects for Chemical Warfare Agents (CWA) and selected Toxic Industrial Chemicals (TICs). It is a portable instrument designed for one-hand operation. It is very easy to operate and requires limited training for effective use.

Features

- Self-diagnostic check during rapid warm-up
- Alphanumeric display with LED alarms
- Dual-Mode SAW Operation – Fast or High Sensitivity
- Electrochemical Cells – Real time analysis
- Operates between 8 and 12 hours on rechargeable Li-Ion batteries
- Vapor-diffusion check source verifies system performance
- RS-232 and IrDA communication ports; stores up to 8 hours of data
- Inlet design protects against dust and particulates

HAZMATCAD Detector Kits

Kits include: HAZMATCAD Detector; battery charger; belt clip; two Sony rechargeable batteries; hard, water-resistant carrying case; operating manual; vapor check source

Part No.	Instrument	Chemical Agents Detected
10055094	HAZMATCAD Detector	Nerve and Blister
10055095	HAZMATCAD Detector	Nerve, Blister and Hydrogen Cyanide
10055096	HAZMATCAD Detector	Nerve, Blister and Phosgene
10055097	HAZMATCAD Plus Detector	Nerve and Blister agents and TICs (phosgene, hydrogen cyanide, halogen and hydride gas)

HazMat Response Kit

The HazMat Response Detector Tube Kit can be used by firefighters, HazMat Response Teams and other workers to help classify unknown chemical gases and vapors at accident or spill sites. A Quad-Port Sampler allows four chemical classes to be tested simultaneously. The portable kit contains 12 types of Detector Tubes (each with sufficient tubes for 10 complete tests), a Kwik-Draw Pump to draw the sample through the tubes, the multiple tube holder and a convenient, easy-to-follow interpretation guide.

Features & Benefits

- Quickly classifies unknown chemical gases and vapors
- Quad-Port Sampler allows simultaneous testing with four detector tubes, meaning less time in IDLH atmosphere
- Flow-limiting orifices ensure even sample flow
- Portable and easy to handle
- Includes simple interpretation guide

HazMat Response Kit

807472	Includes 12 types of detector tubes, multiple tube holder, Kwik-Draw Pump and interpretation guide

and respond to
dangerous incidents.**

PC Connection

The SAFESITE Multi-Threat Detection System simultaneously monitors and wirelessly communicates six potential threats: CWAs, VOCs, TICs, gamma radiation, combustible gas and oxygen deficiency.

The SAFESITE System combines state-of-the-art detection technology with advanced wireless communication capabilities to provide superior preventative and counter-measure solutions for:

- Homeland Security
- Emergency Response
- Public Events
- Building Protection
- Mass Transportation Centers
- Perimeter Monitoring
- Hazardous Response
- Port Surveillance
- Confined Space Monitoring

SAFESITE System components consist of the SAFEMTX™ Multi-Threat Detector, the SAFECOM™ Command Center and SAFECONNECT™ Belt-Bridge with SIRIUS® Wireless Interface or HAZMATCAD Interface and SAFECONFIG™ Software. The system can be installed permanently (wired or wireless) for continual monitoring or deployed as a portable system.

Through the SAFECOM Command Center, alarms are identified with both visual and audible alarms. Alarms can then be acknowledged and silenced, detectors can be enabled and disabled, event logs and event log history can be viewed, plus units can be customized to suit the specific deployment scenario.

SAFESITE is fully compatible with ADASHI First Responder Software. SAFESITE threat information will appear in the ADASHI PC interface. ADASHI software capabilities include plume modeling and weather information for comprehensive event information and threat management.

Threat	Technology	Benefit
Chemical warfare agents	Surface acoustic wave (SAW)	Low false positives and false alarms, differentiates nerve & blister agents
Gamma radiation	Cadmium zinc telluride (CZT)	Sensitive with adjustable threshold and 2 ranges. (0-100 mR/hr, 0.1 mR/hr resolution & 0-1000 mR/hr, 1 mR/hr resolution)
Volatile organic compounds	Photo-ionization (PID)	10.6 eV lamp provides ppm readings for broadband toxics and VOC detection
Toxic industrial chemicals	Electrochemical	Detects many specific toxic gases such as chlorine, ammonia, hydrogen cyanide and hydrogen chloride
Oxygen deficiency/enrichment	Electrochemical	Oxygen monitoring for confined space
Combustible gas	Catalytic bead	Wide range detection for hydrocarbons

- 1 Threat Readings** – scrolling readings of up to 16 MTX Detectors per channel. Unit is identified by large icon to the left of the readings. In alarm condition, display snaps to unit in alarm.
- 2 MTX Icons** – identify number of units enabled in current network. Users may view specific unit reading by double-clicking on icon.
- 3 Map** – option for map view or uploaded image view.
- 4 Signal Strength** – communication status from SAFEMTX™ Detector to SAFECOM™ Command Center.
- 5 Power** – status of battery life of SAFEMTX Detectors.
- 6 System Status** – alerts user to alarm, warning or fault within a particular system.
- 7 Action Buttons** – allow user to select address, cycle units, acknowledge alarms and enable or disable units from the system.

BIOSENSOR™ 2200R Biological Agent Detector

The new BIOSENSOR 2200R Biological Agent Detector from MSA is a handheld, portable, on-site instrument for rapid detection, analysis, and identification of biological agents. Unique bioassay technology offers excellent sensitivity and low false positives while offering ease of use during white powder response calls. This highly accurate detection method provides rapid measurement of biohazards such as anthrax, ricin, botulism, SEB, and plague.

Exclusive five minute time-to-answer allows first responders to make informed critical decisions more rapidly than any other biological agent detector. The BIOSENSOR 2200R employs dynamic surface generation, a patent pending type of immunoassay detection technology. This technology offers significant advantages over other field-based assay methods by combining the benefits of both the free solution and lateral flow types. The result is more rapid analysis, a user-friendly format, and detector stability within a wide range of climates.

Both wet and dry samples may be tested and results are displayed with a simple red (target present) or green (no target present) indication. As tests are nondestructive, samples may be retained as evidence. Single-test, disposable cartridges with on-board reagents have a 12-month shelf life. This instrument is permanently housed in a sturdy, lightweight Pelican case.

Instrument Features and Benefits

- 5 minute time-to-answer
- Uses positive and negative control cartridges
- Battery-operated with ability to run 50 tests on a single charge
- Fully decontaminable housing; IP67 rated
- Visual and audible alarms provide clear indication of status
- Extremely easy to use with a training time of one hour
- Integrated RFID (radio frequency identification) for automatic cartridge recognition

Targets

- Anthrax/ricin duplex—one test, two agents
- Ricin
- Botulism*
- Smallpox*
- Cholera*
- Anthrax
- SEB (staphylococcal enterotoxin B)
- Plague*
- Tularemia*
- West Nile virus*

*additional agents in development

BIOSENSOR 2200R Biological Agent Detector

10084834	MSA BIOSENSOR 2200R Biological Agent Detector Kit*, includes carry case, charger, cartridge starter kit (10084758), instruction manual, and quick start guide.
----------	--

BIOSENSOR Cartridge Plans

10084758	MSA BIOSENSOR cartridge starter kit includes 3 Anthrax/Ricin dual kits**, 1 Anthrax, 1 Ricin, 3 positive control, 2 negative control cartridges, and 2 wet sample kits
10084753	MSA BIOSENSOR Low volume cartridge plan includes 6 Anthrax/Ricin dual kits**, 2 Anthrax, 2 Ricin, 6 positive control, 2 negative control cartridges, and 2 wet sample kits
10084754	MSA BIOSENSOR Medium volume cartridge plan includes 24 Anthrax/Ricin dual kits**, 6 Anthrax, 6 Ricin, 24 positive control, 6 negative control cartridges, and 4 wet sample kits
10084755	MSA BIOSENSOR High volume cartridge plan includes 60 Anthrax/Ricin dual kits**, 8 Anthrax, 8 Ricin, 60 positive control, 8 negative control cartridges, and 6 wet sample kits.

* Extended warranties available.

** Each biohazard cartridge test kit includes a dry sample kit. Please contact your local MSA rep for more information.

Calibration

Galaxy® Automated Test System

Extremely Easy to Use

- Standard web browser accessibility for data retrieval and reporting
- Industry-standard memory card available for simple data retention
- System does not require a computer or network interface
- Works without the touch of a single button
- Minimal training needed

Versatile and Expandable

- Up to 10 systems can be interconnected
- Instrument charging option available
- Optional battery pack available for remote use

Durable, Innovative Design

- Wireless- or wired-network interface available
- Inventive system door also functions as dust cover
- Guaranteed to work in the harshest environments
- In-line gas cylinder holster available; keeps the work area clean and orderly

Value-Driven Performance

- All-inclusive, 2-year warranty
- High quality, cost-effective solution
- Very low total cost of ownership

Assemble-to-Order (ATO) System: You Make the Choices

The ATO System makes it easy to “custom order” the Galaxy Automated Test System, configured exactly the way you want it. You can choose from an extensive line of base components and accessories. See the ATO chart below to make your selections.

Galaxy Automated Test System Assemble-to-Order (ATO) Options

<p>A. Test Stand Instrument Type Each Galaxy test stand has a dedicated instrument type. Up to 10 specific systems can be mixed and matched; however, different instruments types will not work in the same test stand. Solaris Instruments must have datalogging installed to operate with the Galaxy test stand. <i>Note: The Altair Galaxy test stand should only be used with CO, H₂S and O₂ versions of the Altair and Altair Pro Single-Gas Detectors.</i> <i>Note: Choose Altair 5 Diffusion Galaxy for a diffusion Altair 5 gas detector. Choose Altair 5 Pumped Galaxy for a pumped Altair 5 gas detector.</i> <i>Note: Choose Altair 5 Pumped Galaxy for use with Altair SIR instruments.</i></p>	<table border="1"> <thead> <tr> <th>Test Stand Options</th> <th>Code</th> </tr> </thead> <tbody> <tr> <td>Solaris, Solaris with ALkaline Battery</td> <td>A</td> </tr> <tr> <td>Sirius</td> <td>B</td> </tr> <tr> <td>Altair/Altair Pro</td> <td>D</td> </tr> <tr> <td>Altair 4</td> <td>F</td> </tr> <tr> <td>Altair 5 Diffusion</td> <td>G</td> </tr> <tr> <td>Altair 5 Pumped</td> <td>H</td> </tr> </tbody> </table>	Test Stand Options	Code	Solaris, Solaris with ALkaline Battery	A	Sirius	B	Altair/Altair Pro	D	Altair 4	F	Altair 5 Diffusion	G	Altair 5 Pumped	H
Test Stand Options	Code														
Solaris, Solaris with ALkaline Battery	A														
Sirius	B														
Altair/Altair Pro	D														
Altair 4	F														
Altair 5 Diffusion	G														
Altair 5 Pumped	H														
<p>B. Calibration Cylinders The Solaris and Altair Galaxy test stand, by default, will operate with 1 calibration gas cylinder. The Sirius Galaxy test stand, by default, will operate with 2 calibration gas cylinders. If your system configuration requires 3 cylinders for calibration, select option "1". <i>Note: Choose option 1 for any Altair 5 instruments that will require use of more than 1 calibration gas. This would include certain exotic gases like SO₂, NH₃, Cl₂ and also non-CO₂ versions of the Altair SIR gas detector.</i> <i>Note: Not available for ClO₂ or % Vol Combustible.</i></p>	<table border="1"> <thead> <tr> <th>Calibration Cylinder Options</th> <th>Code</th> </tr> </thead> <tbody> <tr> <td>No</td> <td>0</td> </tr> <tr> <td>Yes</td> <td>1</td> </tr> </tbody> </table>	Calibration Cylinder Options	Code	No	0	Yes	1								
Calibration Cylinder Options	Code														
No	0														
Yes	1														
<p>C. Regulator At least 1 demand flow regulator is required for either the Solaris, Orion or Altair Galaxy Test Stands. At least 2 demand flow regulators are required for the Sirius Galaxy Test Stand. The number of regulators you need equals the number of gas cylinders required for an instruments calibration.</p>	<table border="1"> <thead> <tr> <th>Regulator Options</th> <th>Code</th> </tr> </thead> <tbody> <tr> <td>1 Regulator</td> <td>1</td> </tr> <tr> <td>2 Regulators</td> <td>2</td> </tr> <tr> <td>3 Regulators</td> <td>3</td> </tr> <tr> <td>None</td> <td>0</td> </tr> </tbody> </table>	Regulator Options	Code	1 Regulator	1	2 Regulators	2	3 Regulators	3	None	0				
Regulator Options	Code														
1 Regulator	1														
2 Regulators	2														
3 Regulators	3														
None	0														
<p>D. Cylinder Holder The number of cylinder holders should match the number of gas cylinders required for an instruments calibration. Included in this option is the ability to order either 1, 2, or 3 cylinder holders. <i>Note: For Cl₂ and NH₃, please order 3 cylinder holders and ensure that the exotic gas goes into cylinder holder 3, furthest to the left.</i></p>	<table border="1"> <thead> <tr> <th>Cylinder Holder Options</th> <th>Code</th> </tr> </thead> <tbody> <tr> <td>1 Cylinder Holder</td> <td>1</td> </tr> <tr> <td>2 Cylinder Holders</td> <td>2</td> </tr> <tr> <td>3 Cylinder Holders</td> <td>3</td> </tr> <tr> <td>None</td> <td>0</td> </tr> </tbody> </table>	Cylinder Holder Options	Code	1 Cylinder Holder	1	2 Cylinder Holders	2	3 Cylinder Holders	3	None	0

Regulators

Gas Miser® Demand Regulator: The Intelligent Regulator

Gas Miser
Model RP

Gas Miser
Model BD-20

The Gas Miser Regulator is the most advanced, yet simple-to-use calibration gas delivery system available. Made of nickel-plated brass and polished aluminum (especially important for reactive gases), the Gas Miser Regulator can supply gas flow from 0.1 lpm to 3.0 lpm. But that's only the beginning. The Model RP, Universal regulator is designed for use with any MSA Model RP Calibration Cylinder including chlorine and ammonia. The Gas Miser Regulator features an automatic ON/OFF valve that releases gas only

on demand. So only the amount of gas needed to calibrate your MSA instrument is delivered accurately. When the calibration is complete, the Gas Miser Regulator shuts off automatically. And, for user convenience, the regulator can stay connected to the cylinder where it remains in a ready state—making it ideal for such fixed installations as work benches and calibration stations.

The Gas Miser Regulator also eliminates the need to change regulators to accommodate different instruments or flow rates. It's not only intelligent, it's cost-efficient. Supplied with calibration tubing and special fitting.

* A Universal Gas Miser Regulator for gases including reactive gases is available for Model RP cylinders — P/N 10034391

Model RP Combination Regulators

Two regulators in one. Trigger activation allows a bump test or calibration check in the "SQUEEZE" mode or fixed-flow calibration in the up or "LOCKED" position. Designed for use with all Model RP and Econo-Cal calibration cylinders. Supplied with calibration tubing and special fitting.

Gas Miser® Manifold

The Gas Miser Manifold is not only a cylinder holder but it also incorporates a 4-station "bump test" or calibration manifold. It works with Model RP and Econo-Cal cylinders and Gas Miser regulator on any pumped or aspirated instrument. The manifold will supply the correct amount of gas required and will bump test or calibrate up to four instruments simultaneously. Gas Miser regulator sold separately.

* Can be used with chlorine and ammonia; replaces P/N 809945.

Model RP Calibration Check Kits

.25/1.5 LPM Flow Control
Model RP

Model RP Check Kits consist of a regulating valve which includes a gauge to measure container pressure, an adapter hose, sensor adapter (where applicable), instructions, and a case fitted with room for two Model RP cylinders of calibration check gas.

Calibration Gas

Calibration Gas

Each MSA Calibration Gas Cylinder is shipped with an individual copy of a material safety data sheet (MSDS) and an individual copy of a certificate of analysis.

MSA certifies that the gas mixture in calibration gas cylinders was prepared gravimetrically, using NIST traceable weights. The lot number and nominal value of the gas constituents in percent by volume, percent by mass, PPM, or volume are specified on the cylinder. The uncertainty statement of the specified nominal value is also listed.

Model RP and Model R Calibration Cylinders—Non-Reactive Gases, Steel Cylinder, 100 Liters

Contents: Pressure 155 psig; approximately 11 liters at 70°F

Cylinder Holders

Single Portable Cylinder Holder

The Single Portable Cylinder Holder is designed for use with all MSA Model R and Model RP cylinders. It fits neatly on a workbench or shelf, and its unique design ensures that the calibration cylinder (with the regulator attached) always stays where you put it.

Double Cylinder Holder, Wall-Mounted

The Wall-Mounted Double Cylinder-Holder holds all MSA Model R and Model RP cylinders. A molded base and holding straps keep the cylinders securely in position, yet both cylinders and/or regulators can be easily changed. The holder is ideal for field station calibrations and can be easily mounted for workbench applications.

Cylinder Holders

Single Cylinder Holder, 6" wide x 13" long x 4" high	710386
Double Cylinder Holder, 17" high, 10" wide, 3 1/2" deep at base	710483

Calibration Cylinders Are Recyclable!

MSA has affiliated with the Association of Retarded Citizens, Butler County—a nonprofit organization that employs mentally retarded citizens—and established a Cylinder Recycling Center. The calibration cylinders are not refilled, but salvaged for scrap. All money generated from selling the scrap cylinders is placed in the ARC operating fund for salaries and operating costs.

Calibration cylinders are considered hazardous unless the cylinders are empty. MSA has developed special devalving tools that will ensure the cylinder is empty and render the cylinder non-fillable. For your convenience, MSA also offers a specially pre-addressed shipping box (also recyclable) which helps you pay the lowest shipping costs available.

The MSA Recycling Center limits the return of calibration cylinders to MSA-logoed cylinders only. Non-MSA cylinders will be rejected. Contact the Customer Service Center for additional details at 1-800-MSA-2222.

Head, Eye, Face, and Hearing Protection

Standards for Industrial Head Protection

ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005

ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 are voluntary industry standards that establish the types and classes of industrial helmets and provide performance and testing requirements for these helmets. ANSI/ISEA Z89.1-2009 is a revision of the standard covering industrial head protection; this revision supplants the 2003 revision. CSA Z94.1-2005 is a revision of the standard covering industrial head protection used in Canada; this revision supplants the 1992 revision. These standards include specifications for helmets designed to offer protection from top and/or lateral impact.

The three classes included in these standards indicate the helmet's electrical insulation rating:

Class E (Electrical) – Helmets intended to reduce the danger of exposure to high-voltage electrical conductors, proof-tested at 20,000 volts

Class G (General) – Helmets intended to reduce the danger of exposure to low-voltage electrical conductors, proof-tested at 2,200 volts

Class C (Conductive) – Helmets do not provide protection from electrical conductors

The test requirements for Industrial Head Protection per ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 are separated by helmet type: Type I helmets protect the wearer from top impact, while Type II helmets protect the wearer from top and lateral impact. The test requirements for ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 are available from the Industrial Safety Equipment Association and www.CSA.ca, respectively.

Standards for Industrial Head Protection

2009 Additions to ANSI/ISEA Z89.1-2009

Three non-mandatory tests have been added to the updated ANSI/ISEA Z89.1 standard. Manufacturers who want to claim one or more of these features can test their helmets according to the new procedures and mark their product accordingly. These tests are as follows:

1 – Reverse Donning []

In order for a helmet to be worn in reverse or a swing ratchet suspension to be used in a helmet, that particular helmet must be marked with the “double-arrowed circle” to indicate that it meets the new ANSI/ISEA Z89.1-2009 non-mandatory reverse donning test.

2 – Lower Temperature [LT]

The traditional low temperature test for a helmet is -18°C or 0°F. Helmets that meet ANSI Z89.1 requirements for LOWER temperatures (-30°C or -22°F) can be marked with “LT” by the manufacturer.

3 – High-Visibility [HV]

Helmets that meet the non-mandatory requirements for high-visibility, including special tests for Chromaticity and Luminescence for added visibility, can be marked with “HV” by the manufacturer.

All MSA helmets have been tested per the mandatory and non-mandatory ANSI/ISEA Z89.1-2009 and CSA Z94.1-2005 requirements. MSA offerings include:

MSA Helmet	Standard(s)	Type	Class	 /LT/HV
V-Gard Cap/Hat	ANSI/ISEA Z89.1-2009 CSA Z94.1-2005	Type I	Class E	 /LT/HV
V-Gard 500 Vented Cap	ANSI/ISEA Z89.1-2009	Type I	Class C	 /LT/HV
V-Gard 500 Non-Vented Cap	ANSI/ISEA Z89.1-2009	Type I	Class E	 /LT/HV
SmoothDome Cap	ANSI/ISEA Z89.1-2009 CSA Z94.1-2005	Type I	Class E	 /LT/HV
Topgard Cap/Hat	ANSI/ISEA Z89.1-2009 CSA Z94.1-2005	Type I	Class E	 /LT/HV
Thermalgard Cap	ANSI/ISEA Z89.1-2009 CSA Z94.1-2005	Type I	Class G	 /LT/HV
Skullgard Cap/Hat	ANSI/ISEA Z89.1-2009	Type I	Class G	 /LT/HV
Super-V Cap *	ANSI/ISEA Z89.1-2009	Type I	Class E	LT/HV
	CSA Z94.1-2005	Type II	Class E	LT/HV
Vanguard Cap **	ANSI/ISEA Z89.1-2009 CSA Z94.1-2005	Type II	Class E	LT/HV
Comfo Cap	ANSI/ISEA Z89.1-2009	Type I	Class G	LT

*Super-V Cap meets all applicable requirements for a Type II helmet as outlined in CSA Z94.1-2005 and a Type I helmet as outlined in ANSI/ISEA Z89.1-2009.

**Vanguard Cap meets all applicable requirements for a Type II helmet as outlined in CSA Z94.1-2005 and ANSI/ISEA Z89.1-2009.

V-Gard Protective Hats and Caps

Classification:	Type I
Application	General Purpose
Shell Material:	Polyethylene
Available Styles:	Slotted Cap; Non-Slotted Full Brim Hat
Sizes:	Small (6 – 7 ¹ / ₈ "); Standard (6 ¹ / ₂ – 8"); Large (7 – 6 ¹ / ₂ ")
Standards:	ANSI/ISEA Z89.1-2009 (Class E); CSA Z94.1-2005 (Class E)
Certification:	Third-party by SEI
Customization:	Imprinting and striping available

Customize to Make it Yours!
MSA Logo Express can customize your helmets with your company logo and choice of reflective striping. For more information, see p. 98.

*For Cap & Hat Accessories,
See pp. 107-116*

NOTE: Small and Large V-Gard Caps are NOT CSA-certified. Standard-size V-Gard Caps and Hats are CSA-certified when assembled with MSA's Fas-Trac or 1-Touch Suspension ONLY.

Our **Hard Hat Accessories Compatibility Chart** can help you select the right MSA accessories to customize your cap or hat. For more information, see pp. 107–108.

V-Gard Assembly with Swing-Ratchet Suspension

White standard-size V-Gard Cap, w/Swing-Ratchet Suspension	10004689
--	----------

* Certified to CSA.

** V-Gard Cap/Hat meets the voluntary standard for hi-visibility as prescribed by ANSI/ISEA Z89.1-2009. Look for the official hi-visibility marking [HV] on the helmet's ANSI label.

⚠ WARNING

Do not mix suspension and helmet sizes. Make sure the sizes match (example: standard-size suspension with standard-size helmet). Use only MSA suspensions in an MSA helmet. Failure to comply with the above will reduce the energy-absorbing ability of the protective helmet, which can result in serious injury or death.

Logo Express® Service for MSA Helmets

Customize to Make it Yours!

Custom Imprinting and Striping

A variety of MSA helmets can be customized with your logo, slogan, or striping. You can select the colors and the areas to be imprinted based on available options per our guidelines. MSA uses both single and multi-color imprinting techniques to provide a choice of up to four colors.

Image 2000SM

MSA offers the Image 2000 Service, which uses a photographic process to reproduce images. Available on white MSA helmets only.

Ordering Information

A minimum quantity of 20 custom-imprinted caps or hats (of the same size and model) is required for initial and repeat orders.

See Bulletin ID 0617-03-MC for more information.

If you have any questions, please call your local MSA distributor or MSA Logo Express 1-800-MSA-LOGO (1-800-672-5646). More details are also on our LogoExpress Web site: www.MSAnet.com/logoexpress

Head, Eye, Face, and Hearing Protection

Standards for Eye and Face Protection

ANSI/ISEA Z87.1-2010 in Effect

In early 2010, the American National Standards Institute (ANSI), in conjunction with International Safety Equipment Association (ISEA) issued a revised edition of the American National Standard for Occupational and Educational Personal Eye and Face Protection Devices (ANSI/ISEA Z87.1-2010). The revised standard focused on helping users of eye and face protectors select products designed for specific hazards.

Type of Mark	Description	Marking for Complete Device (no replaceable parts)	Other Information
General	Plano	Z87	
Impact Rated	Impact Rated Plano	Z87+	
Lens Type	Welding	W and Shade Number	Shades range from 1.3 to 14; autodarkening cannot be marked anything lower than Shade 7.
	UV Filter	U and Scale Number	Scale ranges from 2 to 6, with lenses marked as "U6" providing the highest protection from far and near UV.
	Visible Light Filter	L and Scale Number	Scale ranges from 1.3 to 10, with lower numbers providing greater transmittance.
	IR Filter	R and Scale Number	Scale ranges from 1.3 to 10.
	Variable Tint	V	Variable tint lenses are those which darken or fade automatically (excludes autodarkening welding lenses).
	Special Purpose	S	Special purpose lenses are any lenses designed for special applications that do not fall into any of the other categories.
Use	Splash/Droplet	D3	
	Dust	D4	
	Fine Dust	D5	

Reference: ANSI/ISEA Z87.1-2010 Standard.

Some changes include:

- There is no longer a "basic impact" designation. Products that meet the general requirements, but do not meet the impact rated requirements are marked "Z87." Products that meet both the general and impact rated requirements are designated as "impact" and are marked "Z87+."
- Lens markings have changed. Markings now identify the type of hazard the product protects against, such as splash/droplet, dust, fine dust, UV, IR and others. See the table above for additional information.
- Spectacles with thin temples must have side shields if they do not pass the continuous lateral (side) coverage requirements.
- Under the former standard, the definition of "faceshield" included this sentence: "Faceshields shall be used only in conjunction with spectacles and/or goggles." The revised standard removed this sentence from the definition. Even though this wording has been removed, MSA will continue to recommend that safety glasses or goggles with an impact rating (Z87+) always be worn under all faceshields. Additionally, MSA continues to recommend the use of only impact rated protectors where such protection is needed.
- Product compliance markings are required for all claims on goggles against dust, fine dust, droplet and splash hazards.
- Under the revised standard, users have the right to request and receive a copy of the manufacturer's ANSI/ISEA Z87.1-2010 test results.

Head, Eye, Face, and Hearing Protection

Accessories for Protective Caps and Hats

Frames for Faceshields

Easy Release Frame with visor and XLS Hearing Protection

The Defender+ Easy Release is designed so the faceshield frame can be easily removed without having to take off the helmet

Defender®+ and Defender+ Easy Release Faceshield Frames

- Front drip-edge splash protection
- Multiple stop positions
- Long-lasting, O-ring, pivot-joint design
- Easy-in, easy-out visor replacement
- Cap lockdown clip option available (V-Gard, Topgard, Thermalgard and SmoothDome Caps only)

Defender+ Faceshield Frames for Slotted Caps (excludes visor)

Defender+ Faceshield Frame for V-Gard and SmoothDome Caps, with lockdown clip	10021614*
Non-locking Defender+ Faceshield Frame for most MSA slotted caps	10021616
Non-locking Defender+ frame for slotted caps	10037098
Defender+ Faceshield Frame for Topgard Caps, with lockdown clip	10021615
Tempgard® Defender+ Faceshield Frame, for elevated temperatures	10031191

Defender+ Easy Release Faceshield Frames (excludes visor)

Must be used with any model MSA ear muffs for slotted caps or the slot adapter (listed below)

Defender+ Easy Release Frame for most MSA slotted caps, with lockdown clip, black	10080783
Defender+ Easy Release Frame for Topgard Cap, with lockdown clip, black	10080784
Slot adapter, attaches Easy Release Frame directly to cap (without ear muffs)	10090221

*Meets CSA Z94.3.

Approvals

All MSA Faceshield Assemblies and Visors meet or exceed applicable requirements of ANSI/ISEA Z87.1.

MSA Hard Hat Accessories Compatibility Chart!

Our **Compatibility Chart** can help you select the right MSA accessories to customize your cap or hat. For more information, see pp. 107–108.

⚠ CAUTION

All faceshield assemblies must be worn with eye protection that meets ANSI/ISEA Z87.1 impact protector requirements.

Defender+ Frame, Sound Blocker 26 Muff Assembly, shown with visor

Accessories for Protective Caps and Hats

Frames and Headgear for Faceshields

Plastic Defender+ Foldback Faceshield Frame (Cap)

Plastic Defender+ Foldback Faceshield Frame (Hat)

Metal Defender+ Foldback Faceshield Frames (Cap)

Defender® + Foldback Universal Faceshield Frames

Foldback Faceshield Frames are available in plastic (dielectric) and metal for MSA caps and hats. These frames can be used with slotted or non-slotted helmets. Visor not included.

For caps, plastic (dielectric)	10016742
For hats, plastic (dielectric)	10005383*
For caps, metal	488160
For hats, metal	488159
For Skullgard Cap only, metal	10079072

*Meets CSA Z94.3.

⚠ WARNING

Do not use metal Universal Foldback Faceshield Frames in electrical applications. Failure to follow this warning can result in serious injury or death.

Defender+ Headgear with Faceshield and Chinguard

Defender+ Headgear with Ratchet and Extended High-Temp Sparkgard

Defender+ Headgear for Faceshields

For use where no hardhat is required. Defender+ Headgear for Faceshields are available in three versions and all adjust to head sizes 6 1/2 to 8. The extended elevated temperature Sparkgard is for use in temperatures up to 250°F. Visors and chin protectors not included.

Approvals

All MSA Headgear for faceshields meet the applicable requirements of ANSI/ISEA Z87.1.

⚠ CAUTION

All headgear for faceshields must be worn with eye protection that meets ANSI/ISEA Z87.1 impact requirements.

Defender+ Headgear, standard Sparkgard, pin-lock suspension	10021610
Defender+ Headgear, standard Sparkgard, ratchet suspension	10021611*
Defender+ Headgear, extended elevated-temperature Sparkgard, ratchet suspension	10021612

*Meets CSA Z94.3.

Head, Eye, Face, and Hearing Protection

Accessories for Protective Caps and Hats

Visors, Chinguards, Nitrometers

MSA Visors

Choose from a wide variety of visors that fit MSA faceshield frames. **MSA visors are manufactured for use ONLY on MSA frames and assemblies in order to comply with ANSI/ISEA Z87.1-2010.**

Visors should always be worn with eye protection, such as goggles or spectacles, that meet ANSI/ISEA Z87.1-2010 impact protector requirements. Visors should be inspected frequently and replaced immediately if worn, scratched, or damaged in any way. Selection of proper models for specific hazards and communication of all instructions, precautions, and limitations to the wearer is the responsibility of user safety specialists, who are also responsible to see that they are strictly observed. Failure to comply with any of the above could result in serious injury or death.

Approvals

Except as noted, MSA visors meet the general and impact protector requirements of ANSI/ISEA Z87.1-2010.

⚠ WARNING

Visors that meet only the general protector requirements of ANSI/ISEA Z87.1-2010 should never be used where an impact protector is required. A hazard assessment should always be done before using protectors that meet only general protector requirements.

⚠ CAUTION

Clean visor with mild soap and water only. Cleaning dry or with coarse cloth will scratch the visor.

⚠ WARNING

Do not use MSA visors for welding, elevated temperature applications, or for protection against other infrared radiation sources unless the MSA visor is approved for such applications. Do not use for sports, simulated war games, paintball games, or similar activities. A pitted or scratched visor reduces eye protection and vision. Inspect routinely and replace worn or damaged parts immediately. Do not alter or modify this product. Do not use near open flame. Failure to follow these warnings can result in permanent impairment of sight, other serious personal injury, or death.

Polycarbonate Visors	Size (inches)	Part No.

Seasonal

SunShade Hard Hat Accessory

MSA's SunShades not only help to protect wearer's ears and neck from sun and heat, but also enhance worker visibility with contrasting color band and reflective striping. Fit most hats and caps. Features include:

- Breathable, high-visibility mesh fabric
- Choice of high-visibility yellow-lime or orange colors
- Hat clips help to keep SunShade from falling or rotating
- Point-of-sale packaging and scannable UPC-A barcode

Electronic Hearing Protection Headband Models

Guarding people against the daily hazards of noise is of paramount concern in countless industries. The challenge is to balance personal attenuation devices with comfort and the ability of communication and listening to music, so that workers will wear their hearing protectors all the time. With over 40 years of experience, MSA now offers a new wide range of hearing protectors with built-in electronics—from basic functions to high-specification communication devices. All products are comfortable hearing protectors, designed to prevent you from feeling isolated, thereby encouraging you to use them and so protecting your hearing for the rest of your life. Noise Reduction Rating (NRR) is third-party tested in accordance with ANSI S3.19-1974 and EN352-3. Also meets CSA Z94.2.

CutOff Pro Headband Model

CutOff Pro Headband Model (NRR – 24dB)

Built-in level dependent function protects without your feeling isolated

- Lets through speech and other harmless sounds while protecting you from harmful noise
- Battery life of 1000 hours
- Amplification of weak sounds
- Auxilliary input for connection of external devices

CutOff Pro Headband Model

Battery Life (approx. hours): 1000

Headband model (stereo)	10061278

Hands Free, 2.5 mm Stereo Plug	10062072
--------------------------------	----------

FM Pro Headband Model

FM Pro Headband Model (NRR – 24dB)

Built-in radio receiver—stereo

- Scan stations automatically
- Memory for last selected station and volume
- Automatically switches off to save batteries
- Battery life of 120–140 hours

Pro Line of Electronic Hearing Protection

The line features advanced electronics with a very good price-to-performance ratio. Built-in features, such as FM and CutOff are optional.

Hearing Protection

Electronic Helmet-Mounted Hearing Protectors

Electronic Hearing Protection for Caps and Hats

With over 40 years of experience, MSA now offers cap-mounted hearing protectors with built-in electronics. These are comfortable hearing protectors, designed to prevent you from feeling isolated, thereby encouraging you to use them and so protecting your hearing for the rest of your life. Noise Reduction Rating (NRR) is third-party tested in accordance with ANSI S3.19-1974 and EN352-3. Also meets CSA Z94.2.

Connect-By-Cable (NRR – 23dB)

A comfortable hearing protector equipped with a hard-wired lead (3.5 mm) and boom microphone.

- The standard Connect-by-Cable model comes with a hard-wired cable for connection to an MSA ClearCommand Push-To-Talk, or lapel microphone (No noise cancelling)
- Noise-cancelling boom microphone permits two-way communication with minimal interference from background noise
- Muffs come with a hard-wired 3.5 mm cable adapter

Connect-By-Cable

Hygiene Kit	10061293

Effective noise attenuation and amplification at the same time

Cap & Hat Accessories Compatibility Chart!

Our [Hard Hat Accessories Compatibility Chart](#) can help you select the right MSA accessories to customize your cap or hat. For more information, see pp. 107–108.

Hearing Protection

Electronic Hearing Protection Headband Models

Supreme Pro™ Muff

Provides optimum protection with high amplification, AUX input and watertight battery compartment. Both earmuffs are shaped to suit both right-handed and left-handed shots.

- Two separate, well-shielded microphones for optimum stereo effect and location of sound direction
- High amplification and natural sound reproduction without “chopping”
- Around 600 hours battery life with two standard AAA batteries
- AUX input for connecting external audio sources, such as a radio. Lead with 3.5 mm mono jack plug included

Supreme Pro

Supreme Pro headband model (NRR – 18dB)	10061285
Supreme Pro neckband model (NRR – 19dB)	10079966
Hygiene Kit	10061294

Supreme Pro-X headband model

Supreme Pro-X Muff

Our top model just got better with high amplification, AUX input, and fully waterproof microphones and battery compartments. Slim design cups for both right-handed and left-handed shooters.

- Two separate, waterproof microphones with excellent sound quality and perfect directional hearing
- Removable headband made with exclusive functional material
- High amplification and a natural realistic sound
- 600 hours battery life with two each standard AAA batteries
- AUX-inlet (3, 5mm for hunting radio, dog tracking devices, CD players)
- Monocable included
- Tested to IP 67
- 5-year warranty on electronics

Sightgard® Line of Protective Eyewear

Compliance Made Easy with Sightgard Protective Eyewear

Variety is the key to compliance. The MSA Sightgard line offers many styles, lenses and features. **Additionally, MSA Sightgard safety glasses and goggles listed in this catalog are compliant with the general and impact protector requirements of ANSI/ISEA Z87.1-2010. Many are also compliant with CSA Z94.3, and/or are listed by CSA International as certified.**

Choosing the Proper Lens

The Lens Color Reference Chart shown here lists the benefits and uses for common lenses and tints.

LENS COLOR/TINTS	USE
Amber 	Good for low-light conditions, especially at dawn/dusk and on foggy days. Increases contrast and enhances detail. Ideal lens for operations requiring optimum contrast of similar or small objects.
Clear 	General purpose lens for indoor use, or outdoor use in low-light conditions. Provides maximum light transmission with impact protection.
Light or Dark Brown 	Enhances perception in changing light and shadow. Good for low light conditions. Great-looking on most skin tones.
Gradient 	Allows easy transition from inside to outside with same pair of glasses. Ideal for use while driving.
Gray 	Most popular lens tint for outdoor use. Protects against visible glare without color degradation. Good choice for outdoor work, such as construction and landscaping.
Indoor/Outdoor Mirror 	Offers the same benefits as light mirror, but also allows easy transition from inside to outside with same pair of glasses. Ideal lens for occupations such as forklift drivers, dock workers, and truck drivers.
Light Mirror 	Reduces glare and bright sunlight by reflecting light away from the lens. Enhances contrast without color degradation. Good general purpose lens for outdoor use.
Polarized 	Reduces intense sun glare reflected off shiny surfaces such as snow, water, sand and pavement. Improves contrast and depth perception. Great for outdoor use.
Rich Mirror 	Superior glare reduction with heavy mirroring. Great lens for outdoor use in full sun conditions—favored by outdoor workers such as roofers, landscapers and builders.
Shade 5 IR 	Protects against low to medium IR radiation up to Shade 5. Good choice for metal pouring, gas soldering, cutting and brazing operations.
Vermillion 	Alleviates eye strain and fatigue by reducing glare caused by fluorescent and halogen lighting. Enhances contrast by absorbing all colors equally. Good choice for inspection operations or assembly work.

New Packaging Makes Selecting Eyewear Easy!

We've redesigned MSA Sightgard Protective Eyewear packaging to make product selection and display easier than ever:

- Each pair of MSA Sightgard safety glasses and goggles is sealed in its own package to protect against damage and to retain maximum anti-fog effectiveness
- Features listed to help select the proper eyewear for the job
- Updated graphics clearly identify package contents and feature the product as the "hero"
- Large, sturdy hang hole for peg displays
- UPC barcodes for point-of-sale transactions and inventory tracking
- Standards compliance listed on front and back of package
- Cleaning recommendations included to help maintain product
- All product information provided in English, French and Spanish

MSA Logo Eyewear Program

How it Works

Want to customize your Sightgard Protective Eyewear with a company logo or design for a truly distinctive look? Check out the following guidelines to get started, and then call MSA Customer Support at 1-800-MSA-2222 for prompt assistance with your customized order.

Your company logo here!

Minimum Order Quantity (MOQ)	1,440 eyewear pairs per logo/model/order.
Shipment	MSA will not hold stock of customized eyewear. The entire MOQ will be shipped upon receipt of payment by MSA. Expedited delivery is available with some models. The customer is responsible for air freight costs when requesting expedited delivery.
Lead Time	Lead time is 75 – 90 days from the date the order is placed with MSA.
Logo/Design Submission	The logo/design graphic file can be sent as an e-mail attachment. (Do not embed graphic in e-mail.) Acceptable file formats include ONLY : .tif, .gif and .jpg. NOTE : pdf formats are not acceptable.
Other Considerations	<ul style="list-style-type: none"> • MSA will place the order upon written customer approval of a picture of the eyewear with its logo/design, or the actual eyewear model with its logo/design, as preferred by customer. • Logos/designs cannot be applied to product packaging.

Safety Vests, Cones, and First Aid

Class II Safety Vest

- Meets ANSI Class II Vest requirements for traffic up to 50 MPH
- Unique integral back pocket storage for when vest is not in use
- Horizontal and vertical stripes for excellent visibility even when bending
- Popular high-viz lime green color stands out better around orange traffic barriers
- UPC-A barcode for retail sale

ANSI Class II Safety Vest, order in multiples of 4	10053455
--	----------

High Visibility Safety Vest

- One size fits all to accommodate most wearers
- Hook and loop closures keep vest closed
- Elastic straps automatically adjust to waistline
- UPC-A barcode for retail sale

Subpart M, Ladders _____ 1926.1053

What is ANSI?

ANSI (American National Standards Institute) is a voluntary standardization system and does not possess the ability to enforce its standards. ANSI facilitates development of national standards by establishing consensus among manufacturers and consumers. Many of OSHA's regulations are adopted from ANSI standards.

ANSI Z359 STANDARD FOR PERSONAL FALL ARREST

The ANSI Z359 Accredited Standards Committee completed work on a new series of fall protection standards that became effective on November 24, 2007. The new standards replace the previous ANSI Z359.1-1992(R1999) and include:

- ANSI Z359.0-2007 _____ Definitions
- ANSI Z359.1-2007 _____ Fall Arrest Systems, Subsystems and Components
- ANSI Z359.2-2007 _____ Minimum Requirements for a Comprehensive, Managed Fall Protection Program
- ANSI Z359.3-2007 _____ Work Positioning and Travel Restriction Systems, Subsystems and Components
- ANSI Z359.4-2007 _____ Assisted-Rescue and Self-Rescue Systems, Subsystems and Components
- ANSI Z359.6 _____ Specifications and Design Requirements for Active Fall Protection Systems
- ANSI Z359.12 _____ Connecting Components for Personal Fall Arrest Systems
- ANSI Z359.13 _____ Personal Energy Absorbers and Energy Absorbing Lanyards

What is CSA?

The Canadian Standards Association (CSA) Technical Committee Z259 sets standards for fall protection equipment and practices. The CSA Certification and Test Division is responsible for testing and certifying products to the CSA Z259 product standards. Other certification organizations, including the Safety Equipment Institute, also certify fall protection equipment to the CSA Z259 standards. Products that are certified to the Z259 fall protection standards carry compliance markings of the certifying agency, for example:  or **CSEI**. All Canadian Provinces and Territories require that fall protection equipment must be certified by a recognized third-party organization in compliance with Canadian standards (or meet equivalent levels of protection approved by the legislative authority).

CANADIAN STANDARDS UNDER THE CSA Z259 FALL PROTECTION SERIES

- CAN/CSA Z259.10-06 _____ Full Body Harnesses
- CAN/CSA Z259.11-05 _____ Energy Absorbers and Lanyards
- CAN/CSA Z259.12-01 _____ Connecting Components for Personal Fall Arrest Systems
- CAN/CSA Z259.13-04 _____ Design of Active Fall Protection Systems
- CAN/CSA Z259.16-04 _____ Design of Active Fall Protection Systems
- CAN/CSA Z259.2.1-1998 _____ Fall Arresters, Vertical Lifelines and Rails
- CAN/CSA Z259.2.2-1999 _____ Self-Retracting Devices for Personal Fall Arrest Systems
- CAN/CSA Z259.2.3-1999 _____ Descent Control Devices

Our commitment to you...

the MSA Fall Protection Promise

MSA promises to replace any MSA harness and/or textile lanyard FREE of charge if a user falls while properly using our product. If the fall occurs while using an MSA mechanical device, we will re-certify the device FREE of charge.

MSA believes it is important to provide high quality products and recognize safe work practices.

Products should be returned with a signed copy of the accident report to:

MSA
Attn: Fall Protection Product Line Manager
1100 Cranberry Woods Drive
Cranberry Twp, PA 16066-5204

Attachment points

Fall arrest systems are an assembly of components and subsystems, including the necessary connectors, used to arrest the user in a fall from a working height and suspend the user until rescue can be effected.

Suspension Systems permit workers to sit and work safely while elevated. The system is designed to raise or lower, and support a worker at an elevated work station. This system alone cannot be relied upon to provide proper fall arrest protection.

Restraint Systems are an assembly of components and subsystems, including the necessary connectors, used to: (a) stabilize and partially support the user at an elevated work location and allow free use of both hands; (b) restrict the user's motion so as to prevent reaching a location where a fall hazard exists.

Personnel-Riding Systems provide a quick means of raising a user out of, or lowering a worker into, a working environment. The system supports full body weight for a short period of time, but should not be used for suspension. A retrieval system by itself may not provide all the protection a worker requires. Fall arrest and/or restraint systems may also be required.

Need it **NOW**? Call MSA!

Need it NOW! is our fall protection delivery program that's designed to get you the products you need, when you need them — **NOW!**

Two tiers of priority shipping are offered under the **Need it NOW!** delivery program:

- **Tier I** includes MSA's most popular products. Tier I delivery offers **same day or next-day shipping**, with **over 100 product choices!**
- **Tier II** delivery offers **shipping within 5 days**, with **over 400 product choices!**

Products included in this program are identified by the following symbols:

- Symbols with a 1 denote Tier I product status  
- Symbols with a 2 denote Tier II product status  
- **Black** symbols denote that the maximum order quantity for priority shipping is 100 units  
- **Red** symbols denote that the maximum order quantity for priority shipping is 50 units  

Visit our website at www.msanet.com
to view complete program terms and conditions.

Harness Sizing

EVOTECH™ Full-Body Harness

MSA's new EVOTECH Full-Body Harness offers the latest design features that improve user comfort, ease of use, durability, and user safety.

NEW!

Comfort

Breathable padding with moisture-wicking material keeps users cooler
No binding edge on shoulder padding—prevents neck chafing

Patent-pending leg strap design keeps leg straps in place, increasing mobility and comfort
Leg strap padding provides additional comfort during work positioning and personnel riding activities

Approvals

- OSHA
- ANSI Z359.1/ANSI A10.32
- CSA Z259.10-06

Patented variable width sub-pelvic webbing provides 50% more surface area for improved weight distribution, improving comfort during work positioning and personnel riding applications

Ease of Use

Patent-pending web management system provides means of storing excess webbing

Available with Qwik-Fit™ Buckle hardware on chest and leg straps; includes slotted mating buckles for easier connection

Available with Tongue Buckle hardware on leg straps

Dual-color webbing—red pattern on outside, black on inside—simplifies harness donning and promotes easy identification of twisted webbing

Added Safety

- Reflective piping integrated into harness webbing increases visibility in low-light environments
- Available with Suspension Trauma Safety Step to improve post-fall comfort and help to prevent suspension trauma
- Available with Medical ID kit—provides vital medical information to potential rescuers/emergency personnel in the event of medical emergencies

Durability

- Web finials prevent fraying on web ends
- NanoSphere® coating on webbing repels dirt, grease, moisture, etc.
- Covered label pack protects labels from environment

Positionable Lanyard clip

3-position back D-ring allows users to determine optimal lanyard connection position

RFID Enabled

RFID chip provides easy means of tracking and inspecting product

Patent-pending single-hand torso adjustment buckles simplify harness adjustment

TechnaCurv® Full Body Harness

TechnaCurv Harness
Part No. 10053000

The **TechnaCurv Full Body Harness** was designed with your comfort in mind. Features include:

- Curvilinear Comfort System
- Visco-elastic shoulder padding
- Innovative web design
- 400 pound capacity
- Secure-Fit buckles
- Sorbtek fabric on shoulder and sub-pelvic pads
- Integral load indicator
- Meets ANSI Z359.1-2007, ANSI A10.32, all applicable OSHA regulations, and is CSA certified to Z259.10-06

In addition to the features above, the TechnaCurv harness is designed with downward adjusting torso straps on most models to ease adjustment. This is also the first harness on the market that allows you to order exactly the options you want, and only the options you want, through our Assemble-to-Order process. All these features combine to provide you with one of the most comfortable, versatile, unique, and safe harnesses available today.

TechnaCurv
Construction
Harness with Belt
Part No. 10054403

TechnaCurv Construction Harnesses offer all of the exciting features of the TechnaCurv Harness with the added flexibility of incorporating a tool belt. There are two construction harnesses to choose from:

- With integral belt that includes a dual-durometer back pad for superior comfort
- With Belt Loops for total flexibility of adding any belt of your choice
- Optional bright green (Hi-Viz) webbing for greater visibility

Note: Webbing does not meet the requirements for high-visibility clothing as defined in OSHA and ANSI.

TechnaCurv Hi-Viz
Construction Harness
Part No. 10063654

In addition to the features of the standard TechnaCurv Harness, the **TechnaCurv Tower Harness** model incorporates an integral body belt and removable saddle. The body belt and saddle are constructed using a dual-durometer pad and Sorbtek fabric for ultimate comfort during prolonged work positioning/suspension activities. The body belt and saddle both include two side D-rings and the saddle height is adjustable. Models also include back and front D-rings. Additional options are available as outlined in the chart below.

TechnaCurv Tower
Harness
Part No. 10048342

Workman® Full Body Harness

The **Workman Harness** provides comfortable protection, due to its lightweight components and durable webbing. The vest-style harness, with optional hip D-Rings for work positioning, fits a wide range of body types and sizes. Color-contrasting thigh and torso straps simplify donning.

- Optimum quality at an economical price
- Comfortable
- Yellow polyester webbing for increased visibility
- Web retainer collars to keep excess webbing neat
- 400 pound capacity
- Integral load indicator

- Choice of Qwik-Fit™ or Tongue-Buckle leg straps for easy adjustment
- Instructions in English, Spanish, and French
- Meets OSHA regulations, ANSI A10.32 & ANSI Z359.1-2007, and is certified to CSA Z259.10-06

The Workman Construction Harness also offers shoulder pads and an integral backpad for added comfort during work positioning and a removable, tongue-buckle tool belt. Meets applicable OSHA regulations, ANSI A10.32, ANSI Z359.1-2007, and is certified to CSA Z259.10-06.

Gravity™ Harnesses

Gravity Harnesses are available in vest and cross-over styles. Gravity Harnesses are suitable for controlled descent, positioning, ladder climbing, rescue, and fall arrest. A variety of options are available to meet your specific needs. All Gravity Harnesses now include a load-indicator to alert you when the harness has been involved in a fall event. All gravity harnesses meet applicable OSHA regulations, ANSI A10.32, ANSI Z359.1-2007, and are CSA certified to Z259.10-06.

400 pound
capacity

For Gravity Harnesses with a belt, belt sizing is as follows:

XSM	SML	MED	LGE	XLG
28" – 36"	32" – 40"	36" – 44"	40" – 48"	44" – 52"

Harness Classes as defined in CSA Z259.10-06

Class A: Fall Arrest

Class D: Suspension & Controlled Descent

Class L: Ladder Climbing

Class P: Work Positioning

Class E: Evacuation

Gravity™ Harnesses

SSH304 Series – Class A

The SSH304 series of Gravity Harnesses are a vest-style design and include a back D-ring and an integral load detector. Additional options are available as outlined in the chart on the next page.

ArcSafe® Harnesses

The ArcSafe harness is SEI-certified to the requirements of the ASTM F887-05 standard for arc flash protection up to 40 cal/cm² and is designed to meet the needs of utility and maintenance workers.

Additional features

- Nylon web loop attachment points
- Meets all applicable OSHA regulations and ANSI Z359.1-2007 & A10.32 standards
- Certified to CSA Z259.10-06
- Integral load indicator
- 400 pound capacity
- Y-shaped back web loop locator pad provides comfort by moving the webbing away from the wearer's neck
- Color-coded leg and torso straps to simplify donning
- Downward-adjusting torso straps to ease adjustment

Front attachment loops can be tucked away when not in use

Welding Harnesses

Welding Harness
Part No. 10020062

Welding Harness
Part No. 10103216

Welding Harnesses are vest-style harnesses designed for high-heat applications such as welding. All Welding Harnesses are made using Kevlar/Nomex webbing and use mating buckles on the leg and chest straps.

Part No.	SIZE				LEG BUCKLES	COLOR		ATTACHMENT POINTS		STANDARDS

Part No. 10077489

Shoulder Pad
Part No. 10028444

Double D-ring Extension
Part No. 10043147

Miscellaneous Harness Accessories

A Back pad (P/N 507144) snaps into the hip D-rings of Pullover and Vesttype Harnesses and adds additional lower lumbar support while work positioning. Shoulder pad (P/N 10028444) may be snapped around the shoulder straps and under the back D-ring pad of the harness to add comfort.

Part No.	Description
1 505318	Lanyard Connector Adapter, nylon, 1 D-ring, 18" (Back D-Ring Extension)
507144	Economic Back Support Pad, nylon
2 10028444	Shoulder pad
10043147	Double D-Ring Extension, 1" nylon web, sewn loop
10071688	Single D-Ring Extension, 1" nylon web, sewn loop
10077489	Shoulder Pads, 1 set
1 SHW26	Lanyard Clip (Velcro key ring)
10113240	Lanyard Clip (Velcro strap)

Suspension Trauma Safety Step

The Suspension Trauma Safety Step is designed to help workers in a post-fall suspension position avoid the effects of suspension trauma. The Safety Step allows workers to relieve pressure by inserting a foot into one of the step loops and then standing up in the harness. The flexing of leg muscles and release of harness leg strap pressure stimulates blood flow, helping to prevent the onset of suspension trauma. Workers can use a single Safety Step or two Safety Steps (one for each leg) to provide additional support, balance, and comfort.

Part No.	Description
1 10063431	Suspension Trauma Safety Step with carabiner
1 10063441	Suspension Trauma Safety Step without carabiner

Shock-Absorbing Lanyards

Energy absorbing lanyards are a component of a personal fall arrest system. They provide a means of connection between the back (dorsal) D-ring of MSA full body harnesses and a qualified anchorage and anchorage connector. The energy absorber keeps fall arrest forces below ANSI and OSHA limits and deceleration distance is controlled to a maximum of 42 inches. The lanyard is available in web, rope, and wire rope configurations with a variety of snaphooks.

Workman® Energy-Absorbing Lanyards

Workman energy-absorbing lanyards are lightweight with a low-profile body. The shock absorber includes a clear, durable protective cover over the labels to increase service life and allow for easy inspection.

Features

- Tear-tape design to keep fall arrest forces below 900 lbf.
- Choice of single or twin-leg configurations
- Choice of adjustable or tie-back configurations
- Models below meet ANSI A10.32 and applicable OSHA regulations. Compliance to ANSI Z359.13 and CSA Z259.11-05 E4 are noted in the table below.

FP5K™ Tie-Back Shock-Absorbing Lanyard

- Uses the FP5K Carabiner, a Tie-back lanyard connector with a 5000-pound gate strength in any direction and a 1" Gate Opening
- Available in web or cable version
- Web version utilizes Monster-Edge™ Webbing with 12,000-pound minimum breaking strength and increased abrasion resistance
- Utilizes the Sure-Stop Shock Absorber to keep fall arrest forces below 900 lbf
- Available in both single and twin-leg configurations
- Models below meet OSHA regulations. Compliance to ANSI and CSA are noted in the table below.

FP5K Tie-Back Shock-Absorbing Lanyards

5000-pound gate strength in any direction

The outer side of the gate has a knurled surface to provide a secure grip on the gate when opening. The inner side of the gate has flattened edges to keep lanyard/gate contact at a minimum.

FP5K Carabiner

Specially designed safety recess inside the body of the carabiner provides a place for the lanyard to rest when tied back.

Shock-Absorbing Lanyards

Diamond™ Shock-Absorbing Lanyards and Expanyards

The **Diamond Shock-Absorbing Lanyard** raises the standard for shock-absorbing lanyards with these exciting features:

- Teflon-coated, durable polyester sheath for increased abrasion and UV resistance
- Available in a single or twin-leg configuration
- Highly visible deployment tag
- Keeps fall arrest forces below 900 lbf
- Comfortable, lightweight pouchless design

In addition to the exciting features of the Diamond Lanyard, the **Diamond Expanyard** features:

- Elastic design reduces trip hazards and snag hazards
- 6' Diamond Expanyard contracts to 4.5'

For workers who need 100% continuous connection and are required to transition from a shock-absorbing lanyard to a self-retracting lanyard, the **Diamond Lanyard** with integral D-ring extension offers the versatility you need.

All Diamond Lanyards and Expanyards meet applicable OSHA regulations and ANSI A10.32. Compliance with ANSI Z359.1-2007 and certification to CSA Z259.11-05 E4 are noted in the part number table.

- Diamond Expanyard is not available in 4.5' or 5' lengths
- Only Diamond Lanyards with 36C, 36CL or 36CS snaphooks or 10089207 carabiner meet ANSI Z359.1-2007
- Lanyards ordered using the ATO System are non-returnable

Climbing with a twin-leg
Diamond Shock-Absorbing Lanyard

A Diamond Shock-Absorbing Lanyard used with the SkyLink Horizontal Lifeline

Shock-Absorbing Lanyards

Sure-Stop™ Shock-Absorbing Lanyards

Sure-Stop Shock-Absorbing Lanyards use a tear-tape design to keep fall arrest forces below 900 pounds. Restraint lanyards are offered in adjustable and fixed lengths and are available in your choice of rope, cable, or web. Models below meet applicable OSHA regulations and ANSI A10.32. Compliance with ANSI Z359.1-2007 and certification to CSA Z259.11-05 E4 are noted in the part number tables.

Thermatek® Shock-Absorbing Lanyard

Thermatek Lanyards are designed for high-heat applications. This specialized design features a Tuffweld protective cover over the shock-absorber and a Kevlar back-up strap inside the shock-absorbing pouch. Models below meet applicable OSHA regulations. Compliance with ANSI Z359.13-2007 and certification to CSA Z259.11-05 E4 are noted in the part number table. Additional options are available as outlined in the chart below.

* ANSI Z359.1 does not recognize lanyard capacities above 310 pounds. Heavy worker lanyards are compliant to OSHA regulations only.

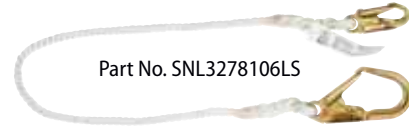

Restraint Lanyards

Restraint lanyards are primarily used for travel restriction (to restrain a worker from reaching a fall hazard) and work positioning (stabilizing a worker at an elevated location) applications. All restraint lanyards meet applicable OSHA regulations. Compliance to ANSI and CSA are noted in the table below.

Anchorage Connectors

- Have a minimum breaking strength of 5,000 lb.
- Are compatible for use with MSA fall arrest and confined space entry/retrieval components
- Meet ANSI Z359.1-2007, ANSI A10.32 and all applicable OSHA regulations

PointGuard™ Anchorage Connector Strap

The PointGuard Anchorage Connector provides a secure point of attachment for residential and concrete construction applications. When the anchorage connector is no longer needed a worker can simply cut the protruding strap and throw it away.

PointGuard Concrete Part No. 10042794

- Quick and easy to install
- Economical
- Available in 2 models -
 - Residential Construction
 - ❖ Meets all applicable OSHA regulations as well as ANSI A10.32 and ANSI Z359.1
 - Concrete Construction
 - ❖ Includes protective sheath
 - ❖ Meets all applicable OSHA regulations as well as ANSI A10.32 and ANSI Z359.1
- Durable Polyester Webbing with 5,000-pound minimum breaking strength
- 400-pound (182 kg) capacity

PointGuard Residential Part No. 10042792

Anchorage Connector Strap

- Standard 5-ft. length, custom lengths available
- D-ring on one end and a sewn loop on the other end

Anchorage Connector Strap Part No. 505282

Double D-Ring Anchorage Connector Strap

Double D-Ring Anchorage Connector Strap Part No. SFP2267503

Anchorage Connector Chain

- Temporary anchorage connector
- Useful near sharp edges or in high heat environments

Anchorage Connector Chain Part No. 10003206

Boom Belt

- Attaches to boom arm
- Adjustable
- Allows for quick & easy installation

Boom Belt Part No. SSB22040

Part No.	Description
1 10042792	PointGuard residential anchorage connector strap, 3' with D-ring
1 10042794	PointGuard concrete anchorage connector strap, 4' with D-ring
10042793	PointGuard residential anchorage connector strap, 3'
10042795	PointGuard concrete anchorage connector strap, 4'

10073847	Anchorage Connector extension, 5', FP5K, O-ring

Anchorage Cable Sling

- Standard lengths of 2', 4', and 6'; custom lengths available
- Vinyl Coated
- 1/4" Galvanized Cable

Anchorage Cable Sling Part No. SFP3267504

Suretyman™ Anchorage Sling

Suretyman Anchorage Sling Part No. SFP2267402

- 1" nylon tube webbing sewn into an endless loop
- Available in 2', 4', and 6' lengths
- Can be hitched to an anchorage point using various configurations

Anchorage Connector Extension

- Vinyl coated
- 1/4" galvanized cable

Anchorage Connector Extension Part No. 505233

Anchorage Connectors

- Have a minimum breaking strength of 5,000 lb.
- Are compatible for use with MSA fall arrest and confined space entry/retrieval components
- Meet ANSI Z359.1-2007, ANSI A10.32 and all applicable OSHA regulations

FP Stryder™ Anchorage Connector

- Easy, single-hand installation
- Low friction wear pads with Teflon allow the FP Stryder Anchorage Connector to glide effortlessly along the beam flange
- Lightweight - only 4.5 pounds
- Integral load indicator alerts user if unit has been exposed to a fall
- Versatile design allows for mounting overhead or at worker's feet
- Vernier adjustability allows for a secure fit and 1/4" adjustment increments
- Easy to use, push button adjustment - no pins to be lost!
- 2 models available to fit most beam sizes
 - Standard version fits beam flange widths from 4" to 14"
 - XL version fits beam flange widths from 14" to 24"
- 400-pound working capacity

FP Stryder
Part No. 10051455

BeamGrip™

- Attaches to I-beam flange—no tools required
- Optional D-ring insert (P/N 506643) and/or swivel D-ring (P/N 506673) can provide anchorage connection for one or two persons (D-rings sold separately)

BeamGrip
Part No. 506682,
shown with Part No. 506643
and Part No. 506673

BeamGlide™ Trolley

- Provides horizontal mobility—keeps anchorage connector directly overhead
- Sizing to fit all beams

BeamGlide Trolley
Removable Model
Part No. 506266

Roof Anchors

- All steel construction
- Fit all pitches of roof trusses or rafters
- Easy to install without special tools

Permanent Roof Anchor
Part No. 10016468

Temporary Roof Anchors
Part No. 416068

Part No.	Description
1 10051455	FP Stryder Anchorage Connector, Standard version, fits beam flange widths from 4" - 14"
10051456	FP Stryder XL Anchorage Connector, XL version, fits beam flange widths from 14" - 24"
10051457	FP Stryder Anchorage Connector Kit, containing one complete Standard version FP Stryder, one XL adjustment bar, one carrying case, and one adjuster button replacement kit
506682	BeamGrip for beams with flange width: 3.94" to 5.64" flange thickness: .205" to .659"
415171	BeamGrip for beams with flange width: 5.525" to 8.07" flange thickness: .36" to 1.09"
415172	BeamGrip for beams with flange width: 8.06" to 10.475" flange thickness: .56" to .935"
415173	BeamGrip for beams with flange width: 10.265" to 12.8" flange thickness: .605" to 1.25"
506643	D-Ring insert for BeamGrip
506673	Swivel D-Ring
10072789	506682 BeamGrip with swivel D-Ring
506266	BeamGlide Trolley, removable model
506252	BeamGlide Trolley, permanent model
506379	Trolley End Stops (pair)
2 10016468	Permanent roof anchor, 2" x 4"
10017593	Permanent roof anchor, 2" x 6"
10017594	Permanent roof anchor, 2" x 8"
10017595	Permanent roof anchor, 2" x 10"
10017596	Permanent roof anchor, 2" x 12"
2 416068	Temporary roof anchor, 3-pack
1 506632	D-plate anchorage connector, zinc-plated steel
506669	D-plate with 8 x 8 galvanized back plate
506672	D-plate with 8 x 8 aluminum back plate
1 10003213	Bolt D-Ring with hole only
10062597	Single bolt anchor
1 10102686	Workman reusable roof anchor

D-Plate Anchorage Connector

- Provides permanent anchorage point
- Bolts to beams or columns
- Also available with 8" x 8" back-plate made of black anodized aluminum or galvanized steel for attachment to concrete walls

D-Plate Anchorage Connector
Part No. 506632

Bolt D-ring with Hole

- Permanent anchorage connector
- Attaches to bottom of I-beam flange, user supplies bolt
- Designed for horizontal installation

Bolt D-ring with Hole
Part No. 10003213

Single Bolt Anchor

- Permanent anchorage connector
- Bolts to vertical columns

Single Bolt Anchor
Part No. 10062597

Workman Reusable Roof Anchor

- Fits up to a 12 x 12 roof pitch
- Fastens with screws or nails

Workman Reusable Roof Anchor
Part No. 10102686

Anchorage Connectors

- Have a minimum breaking strength of 5,000 lb.
- Are compatible for use with MSA fall arrest and confined space entry/retrieval components
- Meet ANSI Z359.1-2007, ANSI A10.32 and all applicable OSHA regulations

ManSafe Freestanding Constant Force Post

- Does not attach to the working surface
- Installer will never have to lift more than 55 lbs (25 kg) at any time
- Used on nominally flat roofs up to a maximum pitch of 5 degrees
- Tested and approved for use on concrete, single-ply membrane, asphalt-sanded, asphalt-stone chipped, and steel roof profiles
- Post is omni-directional
- Meets OSHA regulations only

ManSafe Freestanding Post*
Part No. 10055719

* Post D-ring (Part No. 10038363) must be purchased separately.

Part No.	Description
10055717	ManSafe Freestanding Constant Force Post, 440 lbs (200 kg)
10055718	ManSafe Freestanding Constant Force Post, 660 lbs (300 kg)
10055719	ManSafe Freestanding Constant Force Post, 880 lbs (400 kg)
10055716	220 lb (100 kg) Upgrade kit for ManSafe Freestanding Constant Force Post
10038363	Post D-ring for ManSafe Freestanding Constant Force Post
1 10081594	5K removable concrete anchor
1 10081570	10K removable concrete anchor
2 SFPRS6000	Rail-Slider, steel, galvanized, for 80 - 136 # rail, used on train/crane type rail, [carabiner required - sold separately (see below)]
10030608	Rail-Slider, steel, galvanized, for 141 # rail, used on train/crane type rail, [carabiner required - sold separately (see below)]
10002820	Large hook with strap

Removable Concrete Anchors

- Quickly and easily removed and reinstalled in another location
- Compact and lightweight
- Durable stainless steel and aluminum construction
- 400 lb capacity
- 2 models: 5,000 lb version (5K) and 10,000 lb (10K) version
- 10,000 lb version can be used to anchor MSA Dyna-Line or Sure-Line Horizontal Lifelines

5K Removable Concrete Anchor
Part No. 10081594

10K Removable Concrete Anchor
Part No. 10081570

Rail-Slider™

- Provides fall protection during horizontal movement on railway bridges
- Quick and easy installation
- 2 sizes available

Rail-Slider
Part No. SFPRS6000

Large Hook with Strap

- Large 2-1/2" throat-opening hook with integral strap and D-ring
- Compatible with all MSA lanyards and vertical lifelines

Large Hook with Strap
Part No. 10002820

Carabiners

MSA offers a wide variety of carabiners for almost every application. All carabiners have a minimum breaking strength of 5,000 lbs. All carabiners meet applicable OSHA regulations. See chart for additional standards met.

Part No.	Description	Standards	
		CSA Z259.12-2001	ANSI Z359.1-2007
1 506259	Carabiner, 7/8" (22 mm) gate, twist lock, auto-locking, aluminum		
506572	Carabiner, 7/8" (22 mm) gate, twist lock, auto-locking, steel		
506308	Carabiner, 2" (50 mm) gate, twist lock, auto-locking, steel, with captive eye		
1 10089205	Carabiner, 9/16" (14 mm) gate, auto-locking, steel, 3,600-lb gate strength	X	X
1 10089207	Carabiner, 1" (25 mm) gate, auto-locking, steel, 3,600-lb gate strength	X	X
1 10089209	Carabiner, 2.1" (53 mm) gate, auto-locking, steel, 3,600-lb gate strength	X	X
1 SRCC413	Carabiner, 9/16" (14 mm) gate, auto-locking, steel	X	
SRCA853	Carabiner, 1" (25 mm) gate, auto-locking, aluminum	X	
SRCC740	Carabiner, 2" (50 mm) gate, auto-locking, steel	X

SRCC734G	Carabiner, 2.1" (52mm) gate, auto-locking, steel		

Fall Protection Kits

Thermatek® Kit

Includes:

- Thermatek Harness, standard size, made of a Kevlar/Nomex blend webbing that is resistant to chemicals, weld splatter, and other high heat exposures.
- Thermatek Shock-Absorbing Lanyard features a burn-resistant Tuffweld protective cover that is superior to Nomex. The Thermatek 12 lanyard model is designed to arrest a freefall up to 12' and keep fall arrest forces below OSHA limits.
- Thermatek Anchorage Connector Strap with Kevlar webbing and stitching has a replaceable wear pad to protect webbing from abrasion.
- Carrying Bag for convenience.
- Meets OSHA, ANSI A10.32

Thermatek Kit	with HL2000 Snaphooks	with RL20 Snaphooks
Kit with Thermatek 6 Lanyard	10026061	10026063
Kit with Thermatek 12 Lanyard	10026062	10026064

Workman Fall Protection Kits

Kits include the Workman Vest-Style Harness, the Workman Shock-Absorbing Lanyard, the PointGuard Anchor Strap, and a duffel bag. Meets OSHA, ANSI A10.32 and CSA.

Workman Fall Protection Kit
Part No. 10092166

Part No.	Description
10092166	Workman Fall Protection kit includes STD size Vest-Style Harness with Qwik-Fit Leg Straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; Pointguard Anchor Strap; duffel bag
10092167	Workman Fall Protection kit includes STD size Vest-Style Harness with Tongue-buckle Leg Straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; Pointguard Anchor Strap; duffel bag
10092168	Workman Fall Protection kit includes XLG size Vest-Style Harness with Qwik-Fit Leg Straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; Pointguard Anchor Strap; duffel bag
10092169	Workman Fall Protection kit includes XLG size Vest-Style Harness with Tongue-buckle Leg Straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; Pointguard Anchor Strap; duffel bag

Anthron Descent Device System

The Anthron Descent Controller is a manually operated descent device. It is most commonly used for suspended work positioning, self evacuation, or rescue operations. Other features include:

- Proper roping/rigging diagrams on the side of the Anthron Descender
- Device can be installed/removed at any point on rope
- Working load of 300 lbs (136 kg)
- System consists of a 7/16" (11mm) rope, Anthron Descender, and two carabiners

Part No.	Description
SDC726050	Anthron system includes: Anthron descender, 2 carabiners, 50 ft rope
SDC726100	Anthron system includes: Anthron descender, 2 carabiners, 100 ft rope
SDC726150	Anthron system includes: Anthron descender, 2 carabiners, 150 ft rope

Workman Aerial Kits

Kits include the Workman Vest-Style Harness, the Workman Shock-Absorbing Lanyard, and a convenient storage bag that can be attached to an aerial lift. Meets OSHA, ANSI A10.32 and CSA.

Part No.	Description
10092170	Workman Aerial Kit includes STD size Vest-Style Harness with Qwik-Fit leg straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; carry bag
10092191	Workman Aerial Kit includes STD size Vest-Style Harness with Tongue-Buckle leg straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; carry bag
10092192	Workman Aerial Kit includes XLG size Vest-Style Harness with Qwik-Fit leg straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; carry bag
10092193	Workman Aerial Kit includes XLG size Vest-Style Harness with Tongue-Buckle leg straps; Workman Shock-Absorbing Lanyard, single-leg, adjustable; carry bag

RCD® (Remote Connect/Disconnect) System

By using the strap tool the user can install the anchorage connector strap to an approved overhead anchorage point. By using the connect/disconnect tool the user can attach any lifeline with an RL20 snaphook to the overhead anchorage connector strap, use the same tool to remove the lifeline from the overhead anchorage and then to remove the anchorage connector strap.

Part No.	Description
501443	Remote Connect/Disconnect System
505314	Strap Conn Remote Anchor
506507	Pole Telescoping Remote
506509	Tool Remote Anchorage Strap
506589	Tool Remote Connect
506591	Remote Lanyard Knife Tool
506639	Pole Adjustable Modified RCD
506640	Adapter Hastings Pole RCD
506642	Pole Adjust Assembly Unmodified RCD

Anthron System in use

Anthron Descender

Anthron systems and replacement ropes available in lengths of 25-ft increments from 50 ft up to 600 ft

Roofers' Kits

Part No.	Description
10074475	Roofer's Kit
Kit Contents (Meets ANSI A10.32, OSHA, and CSA)	
Workman Harness, Vest-Style STD size, with Qwik-Fit leg straps	
25' rope lifeline with trailing rope grab	
Roof anchor	
Storage bucket	

Roofer's Kit, Part No. 10074474 same as above with 50' rope lifeline 2

Part No.	Description
10074584	Roofer's Kit
Kit Contents (Meets ANSI A10.32, OSHA, and CSA)	
Workman Harness, Vest-Style XLG size, with Qwik-Fit leg straps	
25' rope lifeline with trailing rope grab	
Roof anchor	
Storage bucket	

Roofer's Kit, Part No. 10077583 same as above with 50' rope lifeline

Part No.	Description
10074477	Roofer's Kit
Kit Contents (Meets ANSI A10.32, OSHA, and CSA)	
Workman Harness, Vest-Style STD size, with tongue-buckle leg straps	
25' rope lifeline with trailing rope grab	
Roof anchor	
Storage bucket	

Roofer's Kit, Part No. 10074476 same as above with 50' rope lifeline 2

Part No.	Description
10074482	Roofer's Kit
Kit Contents (Meets ANSI A10.32, OSHA, and CSA)	
Workman Harness, Vest-Style XLG size, with tongue-buckle leg straps	
25' rope lifeline with trailing rope grab	
Roof anchor	
Storage bucket	

Part No.	Description
10074480	Roofer's Kit
Kit Contents (Meets ANSI A10.32 and OSHA)	
Workman Harness, Vest-Style STD size, with Qwik-Fit leg straps	
25' rope lifeline with manual rope grab	
Storage bag	

Roofer's Kit, Part No. 10074479 same as above with 50' rope lifeline 2

Part No.	Description
10077588	Roofer's Kit
Kit Contents (Meets ANSI A10.32 and OSHA)	
Workman Harness, Vest-Style XLG size, with Qwik-Fit leg straps	
25' rope lifeline with manual rope grab	
Storage bag	

Roofer's Kit, Part No. 10077587 same as above with 50' rope lifeline

Part No.	Description
10092959	Roofer's Kit
Kit Contents (Meets ANSI A10.32 and OSHA)	
Workman Harness, Vest-Style STD size, with tongue-buckle leg straps	
25' rope lifeline with manual rope grab	
Storage bag	

Roofer's Kit, Part No. 10092958 same as above with 50' rope lifeline 2

Part No.	Description
10077590	Roofer's Kit
Kit Contents (Meets ANSI A10.32 and OSHA)	
Workman Harness, Vest-Style XLG size, with tongue-buckle leg straps	
25' rope lifeline with manual rope grab	
Storage bag	

Roofer's Kit, Part No. 10077589 same as above with 50' rope lifeline

Roofers' Kits

FP Pro Roofers' Kit
Part No. 416067

Part No.	Description
416067	Roofers' Kit
Kit Contents (Meets ANSI Z359.1-2007, OSHA, ANSI A10.32)	
FP Pro Harness, Vest-Style STD size, with Qwik-Fit chest and leg straps, and back D-ring	
Trailing Rope Grab Fall Arrester with Sure-Stop Shock-Absorbing lanyard and 36C snaphook	
50' - 5/8" Rope, polyester/polypropylene, with twist-lock carabiner on one end	
Temporary roof anchor (3)	
Woodscrews, #12 x 2.5" Philips flathead, zinc	
Roofers' Kit Tote Bag	

Part No.	Description
10063412	Roofers' Kit
Kit Contents (Meets ANSI Z359.1-2007, OSHA, ANSI A10.32)	
FP Pro Harness, Vest-Style STD size, with Qwik-Fit chest and leg straps, and back D-ring	
Manual Rope Grab Fall Arrester with Sure-Stop Shock-Absorbing lanyard and LS snaphook	
50' - 5/8" Rope, polysteel/polyester, with LS snaphook	
Temporary roof anchor (3)	
Storage bag	

Part No.	Description
10057104	Roofers' Kit
Kit Contents (Meets ANSI Z359.1-2007, OSHA, ANSI A10.32)	
FP Pro Harness, Vest-Style STD size, with Qwik-Fit chest and leg straps, and back D-ring; includes integral Sure-Stop Shock-Absorber with D-ring	
Manual Rope Grab Fall Arrester with Sure-Stop Shock-Absorbing lanyard and manual-lock carabiner	
50' - 5/8" Rope, polysteel/polyester, with LS snaphook	
Temporary roof anchor (3)	
Woodscrews, #12 x 2.5" Philips flathead, zinc	
6 gallon bucket with lid	

Roofers' Kit
Part No. 10055733

Part No.	Description
10055733	Roofers' Kit
Kit Contents (Meets OSHA and ANSI A10.32)	
FP Pro Harness, Vest-Style STD size, with Qwik-Fit chest and leg straps, and back D-ring	
Manual Rope Grab Fall Arrester with Sure-Stop Shock-Absorbing lanyard and LS snaphook	
50' - 5/8" Rope, polysteel/polyester, with LS snaphook	
Temporary roof anchor (1)	
6 gallon bucket with lid	

Roofers' Kit
Part No. 10049751

Part No.	Description
10049751	Roofers' Kit
Kit Contents (Meets OSHA and ANSI A10.32)	
FP Pro Harness, Vest-Style STD size, with Qwik-Fit chest and leg straps, and back D-ring	
Trailing Rope Grab Fall Arrester with Sure-Stop Shock-Absorbing lanyard and LS snaphook	
25' - 5/8" Rope, polysteel/polyester, with LS snaphook	
Temporary roof anchor (1)	
6 gallon bucket with lid	

All FP Pro products are fully compliant with applicable OSHA regulations and ANSI A10.32. Check Part No. tables for additional standards information.

Rope Grabs and Vertical Lifelines

Rope Grabs

Part No.	Description
1 415940	FP Pro Rope Grab with 3' Sure-Stop Lanyard, 36C snaphook
2 415941	Rope Grab with 19' Sure-Stop Lanyard, 36C snaphook
415942	Rope Grab kit with 50' -5/8" rope, polyester, anchorage connector strap
415943	Rope Grab kit with 100' -5/8" rope, polyester, anchorage connector strap
415964	Rope Grab kit with 50' -5/8" rope, polyester/propylene, anchorage connector strap
415965	Rope Grab kit with 100' -5/8" rope, polyester/propylene, nylon anchorage connector strap
1 10054077	Rope Grab fall arrester

Rope Grabs and Vertical Lifelines

FP Pro Rope Grab

Unique, versatile, lightweight and affordable, the FP Pro Rope Grab features:

- Hands-free operation while ascending or descending
- Ultra-smooth travel action
- Cam and hinge design allows for a quick, easy installation on the rope
- Available with either polyester or polyester/polypropylene blend rope
- Rope Grabs and ropes with 36C snaphook meet ANSI Z359.1-2007

Vertical Lifelines

Part No.	Description	Length
415865	5/8" polyester rope, w/36C Snaphook on one end	25'
1 415869	5/8" polyester rope, w/36C Snaphook on one end	50'
415870	5/8" polyester rope, w/36C Snaphook on one end	75'
2 415871	5/8" polyester rope, w/36C Snaphook on one end	100'
415872	5/8" polyester rope, w/36C Snaphook on one end	150'
415873	5/8" polyester rope, w/36C Snaphook on one end	200'
416048	5/8" polyester/polypropylene rope, w/twist-lock carabiner on one end	25'
2 416049	5/8" polyester/polypropylene rope, w/twist-lock carabiner on one end	50'
416050	5/8" polyester/polypropylene rope, w/twist-lock carabiner on one end	75'
416051	5/8" polyester/polypropylene rope, w/twist-lock carabiner on one end	100'
416052	5/8" polyester/polypropylene rope, w/twist-lock carabiner on one end	150'
416053	5/8" polyester/polypropylene rope, w/twist-lock carabiner on one end	200'

SureGrab™ Rope Grab

The SVLR78 SureGrab device and lifeline is used to provide temporary fall protection on ladders or when climbing vertical structures. This system can also be used to provide a secondary lifeline for suspended positioning systems used by building/structure inspectors, window cleaners, and maintenance personnel. The SureGrab device moves freely up or down an approved 5/8" (16 mm) diameter lifeline. When sudden downward movement occurs, a camming lever is activated arresting the fall. The device can be installed or removed from the lifeline at any point along its length.

Meets and exceeds ANSI Z359.1 and OSHA standards. SureGrab rope grabs are CSA certified.

SureGrab™ Rope Grabs

Part No.	Description
1 SVLR78LS	Rope grab fall arrester, automatic/manual, open body, c/w 1-3/4" x 12" web lanyard, LS snaphook
2 SRIW1000	5/8" Termination Plate
SLLNL672060LS	Lifeline, nylon, white 3-strand, 5/8" x 60-ft (16mm x 20m) with LS snap on one end
SLLNL672100LS	Lifeline, nylon, white 3-strand, 5/8" x 100-ft (16mm x 30.5m) with LS snap on one end
SLLNL672200LS	Lifeline, nylon, white 3-strand, 5/8" x 200-ft (16mm x 61m) with LS snap on one end

Self-Retracting Lanyards

Workman PFL Lanyard

Features include:

- A field-replaceable lifeline
- A 400-pound working capacity
- No annual factory recertification required
- Integral load indicator
- Integral swivel at PFL/SRL connector
- A durable, engineered thermoplastic housing
- Meets ANSI A10.32 and all applicable OSHA standards. Compliance with ANSI Z359.1-2007 and certification to CSA Z259.2.2 is noted in the part number table.

Aptura® LT30 SRL

The Aptura LT30 SRL features include:

- A durable, engineered high-impact thermoplastic housing to increase service life.
- Rugged, impact-absorbing protective bumpers for added durability.
- A field-replaceable lifeline option. In the event that the webbing should become damaged, this option provides a field-replaceable web lifeline, eliminating costly returns to the manufacturer.
- A lightweight design starting at 7.5 pounds, making it one of the lightest 30' SRL's on the market.
- A standard lifeline length of 30'. Available in lengths from 13' to 30' in 1' increments.
- A 400 pound working capacity as a standard feature.
- No annual factory re-certification required due to high-quality construction. This not only reduces the cost of ownership, but also eliminates down time.
- An integral load indicator lets you know when it is time to remove the product from service.
- SRL connector with integral swivel.
- All models meet OSHA and ANSI A10.32. Compliance with ANSI Z359.1 and certification to CSA Z259.2.2 are noted in the table to the right.
- ATO ordering flexibility allows you to order the exact options, and only the options you want.

Dyna-Lock® SRL's

The MSA Dyna-Lock Self-Retracting Lanyards (SRL) are fast-acting fall arresters that limit free-fall distance, deceleration distance, and fall arrest forces while allowing user freedom of movement. The Dyna-Lock SRL is ideal for climbing applications where vertical mobility is needed. All Dyna-Lock SRLs meet applicable OSHA regulations and ANSI A10.32. See chart below for ANSI Z359.1-2007 and CSA compliance.

Capacity (working load)

For 20' web; 30', 50', 70' and 95' cable
Dyna-Lock Models:

- Maximum: 400 lbs (181 kg)
- Minimum: 75 lbs (34 kg)

For 20' cable model:

- Maximum: 310 lbs (140 kg)
- Minimum: 75 lbs (34 kg)

Arrest Force

- 75–310 lbs < 900 lbf (4 kN)
- 311–400 lbs < 1800 lbf (8 kN)

Arrest Distance

- 75–310 lbs < 40 in (101.6 cm)
- 311–400 lbs < 54 in (137 cm)

20' Cable Dyna-Lock SRL in use

Confined Space Equipment

MSA confined space entry/retrieval systems are designed for fall arrest, lifting and lowering, rescue, and work positioning applications. They incorporate an anchorage connector, fall arrest component (Dyna-Lock, Dynevac II, Lynx Rescuer), a personnel and materials handling hoist (Lynx Hoist), and associated hardware to rig the system for use. The systems can be used for leading edge work, maintenance and entry/retrieval from manholes, tank cars, silos, tanks, vaults, pits, vats, and other confined space applications.

Workman® Tripod and Workman Confined Space Entry Kit

Easy To Use

- Simple setup procedure makes the process quick and promotes correct use.
- Legs automatically lock in the open position for added safety.
- A maximum height indicator provides quick and easy identification of the maximum leg extension length.
- Aluminum leg and head design reduces weight, improving portability.

Durable

- An internal leg-locking mechanism prevents accidental disengagement during use and reduces the possibility of damage to the mechanism during use or while in storage.

Versatile

- The leg base support strap also serves as a convenient carrying strap.

Confined Space Entry Kits

- Single part number for simplified ordering
- Lynx Rescuer allows for non-entry rescue of a confined space entrant
- Lynx Hoist designed for lifting, lowering and positioning of personnel and materials
- Carrying bags allow for great portability

Lynx® Rescuer, Field Resettable Model with Lockout

- Self-Retracting Lanyard with emergency retrieval capabilities
- User is able to reset device from retrieval mode to fall arrest mode
- The easiest, quickest field-reset mechanism on the market
- Same unit can be used in the field and for training situations
- Lock feature with key allows more control over who can reset unit to fall arrest mode
- Confined space entry provides fall arrest and emergency lifting and lowering
- Meets ANSI Z359.1-2007, and all applicable OSHA standards, and CSA part numbers are CSA certified

Part No.	CSA Part No.	Description
10011744	10023016	50-ft (16m) Self-Retracting Lanyard with Emergency Rescuer, 3/16" diameter stainless steel line. With proper inspection, system may be reused after fall arrest and/or retrieval.

Lynx Personnel/Material Hoist

Lynx Boom Mount Hoist
Part No. 10016683

- Designed for lifting, lowering, and positioning of personnel and materials
- Maximum work load of 310 lbs for personnel and 620 lbs for materials
- Anti-backlash crank handle with a lifting/lowering speed of 25 ft per minute
- Integral shock absorber
- Load-limiting clutch prevents overloading of hoist
- Emergency drive allows manual bypass of load-limiting clutch for extra lifting capacity in an emergency

Lynx Hoist
Part No. 10016569

- Primary gear backed up by two independent secondary brakes
- Air drive adapter enables powered lifting/lowering with optional air-powered drive assembly
- Meets ANSI Z359.1-2007, and all applicable OSHA standards

Part No.	Description
10016569	Side mount with emergency drive and air drive adapter, galvanized wire rope, 50'
10016568	Side mount with emergency drive and air drive adapter, galvanized wire rope, 105'
10016683	Boom mount with emergency drive and air drive adapter, galvanized wire rope, 50'
10016682	Boom mount with emergency drive and air drive adapter, galvanized wire rope, 105'
506420	Lynx Hoist air drive assembly

Lynx Tripod Confined Space Entry Kit

The Confined Space Entry Kit with the Lynx Rescuer allows for non-entry rescue of a confined space entrant. A training video and tripod carrying strap are included with the kit.

Side Mount Lynx Hoist, with 50' galv. line (P/N 10016569)

Pulley/Bracket Assembly (P/N 506473)

Includes Carry Bags for Tripod & Lynx Hoist

Lynx 8' Tripod (P/N 10022050)

Part No.	Description
10023967	Lynx Confined Space Entry Kit

Folding Davit and Base

The Folding Davit and Base is a portable and economical anchorage connector used where a tripod will not work. Available with a zinc-plated alloy-steel Davit Arm and your choice of zinc-plated carbon steel or stainless steel Davit Base. This lightweight device provides a 24-inch reach and 77-inches of head clearance. It pivots 360-degrees and can readily maneuver personnel and materials between spaces below the deck where it is mounted. The Folding Davit may be carried from base to base and installed in minutes. Meets or exceeds ANSI Z359.1, ANSI A10.32, and applicable OSHA requirements. Mounting brackets and pulleys sold separately.

Folding Davit Arm
Part No. 506613

Folding Davit base
Part no. 506614

Column Davit and Base

The Column Davit and Base are used for more permanent conditions where a tripod will not work. Available with a zinc-plated alloy-steel Davit Arm and zinc-plated carbon steel or stainless steel bases. Provides a 30 inch reach and 77 inches of head clearance. May be mounted to horizontal, vertical, and subsurface appropriate anchor points. Pivots 360 degrees. Meets or exceeds applicable OSHA requirements. Mounting brackets and pulleys sold separately.

Column Davit Arm
Part No. 506568

Column Davit base
Part No. 506492

Bosun Chair

The Bosun Chair is the best method to sit suspended for long durations. The padded seat ensures your comfort during use. The adjustable web assembly ensures security. Designed to be used in conjunction with our Full Body Harnesses, the Bosun Chair, attached to the chest D-ring, will keep the user in the upright position.

Bosun Chair
Part No. SSH3505017

Part No.	Description
506613	Folding davit arm, 24" reach, 77" working height, swivels to extend over work area, folds for ease of transport and storage
506614	Folding davit base
506622	Bracket for mounting 10m (30 ft)/ 16m (50 ft) Dyna-Lock, Dynevac, and Lynx Rescuer to Folding davit
506362	Bracket (same as above), except for 22m (70 ft)/ 30m (95 ft) Dyna-Lock
506568	Column davit arm, 30" reach, 77" working height, boom arm swivels to extend over work area
506492	Surface mounting receptacle for Column davit arm
506232	Bracket for mounting 10m (30 ft)/ 16m (50 ft) Dyna-Lock, Dynevac, and Lynx Rescuer to Column davit, aluminum (requires part no. 506590)
506216	Bracket (same as above), except for 22m (70 ft)/ 30m (95 ft) Dyna-Lock
506590	Bracket for mounting Dyna-Lock or Dynevac to Column davit (requires part no. 506216 or 506232)
506603	Holster to store Boom Mount Hoist when not in use
506668	Vertical davit arm - Ladder Mount
506667	Receptacle for Vertical davit arm - Ladder Mount (bolts to ladder)
415837	Push-Pull davit - Ladder Mount, bolts to ladder and retracts to allow hatch cover to close, extends 60" above hatch when extended
SSH3505017	Bosun Chair, 5" x 16-1/2" padded seat, black nylon straps, 2 carabiners

Ladder Climbing Equipment

SureClimb™ Temporary Cable System

The SureClimb Temporary Ladder Cable System is designed to provide fall protection when climbing or descending ladders or vertical structures up to 300 ft in height. Applications include telecommunications towers, light poles, water towers, hydroelectric towers, stacks, and any other climbable structure. The SureClimb temporary system:

- Uses a 5/16" galvanized steel cable
- Allows for quick and easy attachment to approved ladder or structure
- Includes an integral, adjustable line weight
- Uses a stainless steel fall arrester (ordered separately)
- Meets all applicable OSHA regulations and ANSI standards
- CSA certified

SureClimb™ Permanent Cable System

The SureClimb Permanent Ladder Cable System is designed to provide fall protection when climbing or descending ladders or vertical structures up to 300' in height. Applications include telecommunications towers, light poles, water towers, hydroelectric towers, stacks, and any other climbable structure. The SureClimb permanent system:

- Includes energy-absorbing, galvanized steel top and bottom mounting brackets
- Uses a 5/16" galvanized steel cable
- Incorporates cable guides to minimize cable vibration and wear
- Uses a stainless steel fall arrester (ordered separately)
- Meets all applicable OSHA regulations and ANSI standards
- Is CSA certified and meets ANSI A14.3-1992

10036032	SureClimb Extension Davit and Base Assembly (for temporary cable system)

Dyna-Glide® Climbing Protection System

The Dyna-Glide Climbing Protection Systems are used to prevent and/or arrest falls from heights and also enhance the way a climber is able to perform the necessary work. Our systems can be mounted to already-installed ladders, to corners of lattice towers, and to almost any other suitably strong structure your crew needs to climb.

- Limits total fall distance to inches
- Offers components for complete rescue systems
- Allows for vertical and horizontal mobility
- Uses galvanized or stainless steel for corrosion resistance
- Offers your choice of Ladder Rail Combination (LRC) or Rail only
- Provides smooth travel – there's no binding of the fall arrester inside the rail
- Uses detachable, lightweight, stainless steel and aluminum mechanism for hands-free ascent and descent
- Is CSA certified and meets ANSI A14.3-1992

Taken together, the Dyna-Glide System is designed to be installed without modification to the structure and can be assembled with simple hand tools.

- LRC Combination (Part No. 506390)
- Rungs incorporate skid-resistant surface
 - Can be curved or bent for your specific application
 - Constructed of galvanized steel
 - Standard length: 7' 4-3/16"
 - Standard width: 18"

Fall Arrester (Part No. 506277)

- Mechanical locking mechanism to reduce fall distance
- Permits hands-free ascent and descent
- Constructed of aluminum and stainless steel
- Carabiner not included

For more complete information on the Dyna-Glide System, see the Dyna-Glide Catalog (Bulletin 2300-22-MC).

Part No.	Description
506270	Straight Notched Rail, galvanized, standard length 7' 4-3/16"
506273	Rung Mount Assembly, galvanized
506274	Gated top end stop, stainless steel

506391	LRC side rail connector, galvanized

Temporary Horizontal Lifelines

Temporary Synthetic Horizontal Lifelines

Designed for easy installation and removal, these temporary horizontal lifeline systems were created for a wide range of applications. The system may be mounted to any suitable 5,000 lb-rated anchorage. Both systems can be rigged using many standard components, reducing the need for special or "engineered" equipment.

Dyna-Line® HLL

- Highly visible 12-strand red rope will not hockle and minimizes fall distance due to its low stretch properties
- Available in a Single-Worker or Two-Worker system
- Available in lengths up to 200 ft. System comes in a handy bucket for lengths up to 60 ft.
- Meets all OSHA requirements and ANSI A10.32 standards

SureLine™ HLL

- Includes integral energy absorber
- 5/8" black nylon kernmantle rope
- Available in lengths up to 60 ft
- Rated for two workers
- Includes 2 cable anchor slings
- Includes storage bag

Part No.	Description

SureLine Temporary Horizontal Lifeline for Two Workers Part No. SHL1009060BLK

SureLine™ Temporary Cable Horizontal Lifeline

The SureLine temporary Horizontal Lifeline is a lightweight cable system that is suspended between two approved anchor points to provide worker fall protection during horizontal movement. Designed for quick and easy installation at temporary work sites, the SureLine system:

- Includes an integral shock absorber
- Available in 2 models, with or without turnbuckle
- Available in 20 ft, 40 ft, or 60 ft lengths
- Rated for up to 2 people
- Uses a 3/8", 6x36 galvanized cable
- Incorporates a combination clamp/thimble that allows for effortless tensioning of lifeline
- Meets all OSHA requirements and ANSI A10.32 standards.

2 SHL2009040	Steel Cable Horizontal Lifeline System with turnbuckle, 40 ft (12 m)
1 SHL2009060	Steel Cable Horizontal Lifeline System with turnbuckle, 60 ft (18 m)
SHL2009040IW	Iron Worker Cable Horizontal Lifeline System without turnbuckle, 40 ft (12 m)
SHL2009060IW	Iron Worker Cable Horizontal Lifeline System without turnbuckle, 60 ft (18 m)

Horizontal Lifeline Stanchions

SkyLink® HLL Stanchion

- Accommodates two workers per system
- Lightweight - weighs only 21 pounds, making it easily installed, removed, and handled by 1 person
- No tools required for installation when using pour-in-place anchor, making it easy to install—sets up in minutes!
- Can be used as single point anchor attachment, providing fall protection for workers while installing horizontal lifelines
- Aluminum and steel construction increases durability to ensure long service life
- Offers two installation methods to concrete, a pour-in-place anchor for new construction or concrete expansion bolts for existing construction, providing versatility to meet the requirements of your application
- Folding leg stanchion design makes the stanchion easy to carry and convenient to store
- Meets ANSI A10.32 and OSHA requirements

Designed to support horizontal lifelines in two directions (in-line with D-ring head)

Can be used as single point anchor while connecting lifeline

Part No.	Description
10055659	Skylink Stanchion, Standard model - 44" height (pour-in-place Pigtail or concrete expansion anchors must be ordered separately)
10055660	Skylink Stanchion, SL model - 23" height (pour-in-place Pigtail or concrete expansion anchors must be ordered separately)
10055721	3.25" concrete expansion anchor with nut and washer
10059805	0.5" x 12" pour in place "Pigtail" anchor with washer and vinyl cap
10059806	Skylink Stanchion Kit including 2 - Standard stanchions with 60' 2-worker Dyna-Line 10013151 (without anchor straps) and 4 Pigtail anchors
10059807	Skylink Stanchion Kit including 2 - Standard stanchions with 60' Sure-Line for Iron Workers (p/n SHL2009060IW), and 4 Pigtail anchors
10059808	Skylink Stanchion Kit including 2 - SL stanchions with 60' 2- worker Dyna-Line (p/n 10013153 - without anchor straps) and 4 Pigtail anchors
10059809	Skylink Stanchion Kit including 2 - SL stanchions with 60' Sure-Line for Iron Workers (p/n SHL2009060IW), and 4 Pigtail anchors

HLL quickly connects to Stanchion

Jaw clamp screw easily attaches to I-beam flange

D6 HLL Stanchion for Horizontal Lifeline
Part No. SHLARD6A

D6 HLL Stanchion

The D6 HLL Stanchion is an anchorage connector used for the installation of horizontal lifeline systems. Designed with a jaw clamp screw, D6 HLL Stanchions are easily installed on steel girders or base plates fitted to bridge rail ties to provide a strong stable connection point for the approved horizontal lifeline system.

Anchorage Bracket also features:

- Constructed of galvanized steel
- Collapsible A-frame for easy transport & storage
- Meets all applicable OSHA regulations & ANSI standards

Part No.	Description
SHLARD6A	D6 HLL Stanchion A-frame design, galvanized steel

SINGLE-SPAN

MULTI-SPAN

Permanent Horizontal Lifelines

Horizon® Horizontal Lifeline

The MSA Horizon Horizontal Lifeline anchorage connecting system is designed for portability, versatility, ease of installation, and ease of use. The system may be mounted to existing overhead steel beams or to newly constructed steel structure where overhead anchorage points are not available. Horizontal travel through intermediate supports is achieved without disconnection of the worker's personal fall arrest system. The system may accommodate up to five

persons. The unique shock absorber reduces dynamic forces transmitted to the anchorage points. Stanchion system may be installed on the top or bottom flange of an I-beam.

Typical applications include new construction (steel erection), inspection and maintenance operations, loading bays, bridges, overpasses, aircraft hangars, manufacturing, petrochemical, chemical, and food processing plants. Meets OSHA requirements.

Basic Below Beam Mount Sub-System

Part No.	Description
506682	Beamgrip for beams with flange width: 3.94" to 5.64", flange thickness: .205" to .659"
415171	Beamgrip for beams with flange width: 5.525" to 8.07", flange thickness: .36" to 1.09"
415172	Beamgrip for beams with flange width: 8.06" to 10.475", flange thickness: .56" to .935"
415173	Beamgrip for beams with flange width: 10.265" to 12.8", flange thickness: .605" to 1.25"
415836	Horizontal lifeline shock absorber
506563	3/8" open wedge socket
506636	Beamgrip bypass fitting
506637	Beamgrip end fitting
506648	3/8" wire rope, galvanized, length must be specified at the time of order
506662	12" turn buckle with plate
506663	Snatch block pulley for 3/8" wire rope
506254	for 1/2" wire rope
506255	for 5/8" wire rope

Parts required for this system: 3 Beamgrips (Part No. depends on size of beam flange); 1 - 415836; 1 - 506648 (30'); 1 - 506636; 1 - 506563; 1 - 506662; 2 - 506637

⚠ WARNING

OSHA regulations state "Horizontal Lifeline Systems shall be designed, installed and used under supervision of a qualified person, as part of a complete fall arrest system, which maintains a safety factor of at least two." A qualified person is defined as "one with a recognized degree or professional certificate and/or extensive knowledge and experience in the subject field, who is capable of design, analysis, evaluation and specifications in the subject work, project or product." MSA can provide a qualified person to design and install a Horizontal Lifeline System. Contact the MSA Engineering Service Department.

Below Beam HLL Kits

Choose from 4 kits.

30 ft kits include

- 2 beamgrips (choose from P/N 415171 or P/N 415172)
- 2 end fittings (P/N 506637)
- Shock absorber (P/N 415836)
- Lifeline (P/N 506648 - 30 ft)
- Open wedge socket (P/N 506563)
- Turnbuckle (P/N 506662)

60 ft kits include

- 3 beamgrips (choose from P/N 415171 or P/N 415172)
- 2 end fittings (P/N 506637)
- Shock absorber (P/N 415836)
- Lifeline (P/N 506648 - 60 ft)
- Open wedge socket (P/N 506563)
- Turnbuckle (P/N 506662)
- Manual Bypass (P/N 506636)

Part No.	Description
10030270	HLL Kit #1, 30' Below Beam system, for I-beams with flange width 5.525"–8.07" and flange thickness .36"–1.09"
10030271	HLL Kit #2, 60' Below Beam system, for I-beams with flange width 5.525"–8.07" and flange thickness .36"–1.09"
10030272	HLL Kit #3, 30' Below Beam system, for I-beams with flange width 8.06"–10.475" and flange thickness .56"–.935"
10030273	HLL Kit #4, 60' Below Beam system, for I-beams with flange width 8.06"–10.475" and flange thickness .56"–.935"

Permanent Horizontal Lifelines

Basic Stanchion Mount Sub-System

Stanchion HLL Kits

Choose from 4 kits.

30 ft kits include

- 4 beamgrips (choose from P/N 415171 or P/N 415172)
- 2 end stanchions (P/N 506646)
- 2 stanchion inserts (P/N 506665)
- Lifeline (P/N 506648 - 30 ft)
- Wire rope clip (P/N 506649)
- Cable clamp (P/N 506645)
- Shock absorber with turnbuckle (P/N 415836)

60 ft kits include

- 5 beamgrips (choose from P/N 415171 or P/N 415172)
- 2 end stanchions (P/N 506646)
- 3 stanchion inserts (P/N 506665)
- Lifeline (P/N 506648 - 60 ft)
- Wire rope clip (P/N 506649)
- Cable clamp (P/N 506645)
- Shock absorber with turnbuckle (P/N 415836)
- Intermediate Stanchion with Manual Bypass (P/N 506647)

Part No.	Description
10030274	HLL Kit #5, 30' Stanchion system, for I-beams with flange width 5.525"–8.07" and flange thickness .36"–1.09"
10030275	HLL Kit #6, 60' Stanchion system, for I-beams with flange width 5.525"–8.07" and flange thickness .36"–1.09"
10030276	HLL Kit #7, 30' Stanchion system, for I-beams with flange width 8.06"–10.475" and flange thickness .56"–.935"
10030277	HLL Kit #8, 60' Stanchion system, for I-beams with flange width 8.06"–10.475" and flange thickness .56"–.935"

Sure-Rail™ Horizontal Lifeline

The Sure-Rail system is a rigid rail horizontal lifeline system typically used in areas when there is limited clearance below the working surface. The system consists of galvanized steel 1/2" x 2" x 10' rail sections, a rail trolley, end stops, and various mounting hardware. The rails are anchored to a supporting structure, while the trolley provides a mobile connection point for the user. The rail sections are affixed to an approved anchorage at 5-ft intervals. End stops prevent accidental detachment of the trolley from the rail.

In addition, the Sure-Rail system provides:

- Ease of movement (smooth trolley action)
- Little or no deflection in the rail limits fall distance and fall arrest forces on the body
- Design hat allows for even distribution of fall arrest forces on the body
- Twin-track configuration that allows users to bypass each other without having to disconnect and re-connect
- Spring-loaded end stops for easy insertion/removal of the trolley
- Aluminum trolley with stainless steel wheels
- Support for up to 4 workers on the system simultaneously
- Meets all applicable OSHA regulations

Sure-Rail trolley
Part No. SHLSR0014

Sure-Rail Horizontal Lifeline Ordering Information

Part No.	Description
SHLSR00104	Sure-Rail trolley
SHLSR0021000	Sure-Rail, galvanized, predrilled, 1/2" (12mm) x 2" (50mm) x 10 ft (3m)
SHLSR00501	Sure-Rail splice, galvanized, with bars and hardware [required every 10 ft (3m)]
SHLSR00601	Sure-Rail spacer, galvanized [required every 5 ft (1.5m)]
SHLSR00703	Sure-Rail anchorage bolt, galvanized [required every 5 ft (1.5m)]
SHLSR00601	Sure-Rail spacer, galvanized [required every 5 ft (1.5m)]
SHLSR00801	Sure-Rail anti-slip Off collar, steel, painted [required at both ends of system]

Sure-Rail Truck/Rail Car Loading Kit (60 ft)

10030601	Sure-Rail truck/rail car loading 60 ft kit
Kit includes	
Qty	Product (Part. No.)
6	1/2" x 2" rail (SHLSR0021000)
6	Splice joining hardware (SHLSR00501)
12	Spacers (SHLSR00601)
12	Standard anchorage bolts (SHLSR00703)

Eight, Steel
Part No. SRSF5045

Stealth Rigging Plate
Part No. SRSPR5990

Stretcher Rigging Plate
Part No. SRSPR5980

SuretyMan™ Pulleys

Designed to meet the rigorous standards of the professional rescuer. Built with high grade aluminum side plates and sheaves, oilite bearings, stainless steel bolts, washers, and lock nuts make these some of the best pulleys available. The aluminum side plates swivel and rotate to allow the pulley to be attached anywhere along the rope. The top holes of the side plates are large enough to accept three carabiners. Contain Prusik design (squared corners of the side plates) to provide rope security with a Prusik hitch. Pulleys accept 3/8" (1 cm) to 1/2" (1.3 cm) static kernmantle ropes. Side plates are powder coated. Strength: 2" (5 cm) Double 8,100 lb (36 kN), 4" (10 cm) Double 11,200 lb (49 kN).

SuretyMan™ Mini Knot Passing Pulley

The Suretyman Mini Knot Passing Pulley was designed for the professional rescue team concerned with size and weight. The Suretyman Mini Knot Passing Pulley features:

- Ample room for the passing of knots
- Size: 9-1/2" (24 cm) tall, 4" (10 cm) wide, 3" (7.6 cm) deep
- Aluminum sheave (that will not score like some of the plastic sheaves)
- Locking pin
- Weight: 1.9 lb (.89 kg)
- Half the size and weight of some of the larger, bulkier knot passing pulleys

SuretyMan™ Edge Roller

The best way to protect your rope from sharp edges and reduce rope friction. High quality construction. The 6" x 10" (15.3 cm x 24.4 cm) base is rubber covered to reduce slippage. The bottom and side plate feature attachment holes for ease of security in any situation. Added slots in the base plate accept tube webbing for security. Two edge rollers are required (sold separately). Two quick links are required (sold separately). Edge roller is 4" (10 cm) tall. Weight: 2.8 lb (1.3 kg).

SuretyMan™ Q-Eight

- Ears/cleat are positioned to make tie off very easy and safe
- Ears/cleat still prevent larks footing (girth hitch)
- Designed for 7/16" (11 mm) diameter rope (will work with 1/2" (12 mm) diameter rope)
- Aluminum, anodized gold
- Strength 13,000 lbs (58 kN)
- Weight 8 oz (.24 kg)

SuretyMan™ Rescue Eight

- Designed for rope diameters from 7/16" (11 mm) to 5/8" (16 mm)
- Strength 6,720 lb (30 kN)
- Designed for the fire service, rescue, and police tactical operations
- Available in aluminum or steel
- Weight 1.5 lb (675 g)

SuretyMan™ Rigging Plates

Stealth Rigging Plate: Anchor on the point and the wings will rotate toward the load for a straighter line of pull. Material aluminum. Weight: .46 lb (250g). Strength: 11,000 lb (48 kN). Color: Teal

Stretcher Rigging Plate: Designed to unclutter and organize litter rigging points, reducing the chance of error. Material aluminum. Weight: .74 lb (330g). Strength: 12,200 lb (54 kN). Color: Teal

SuretyMan™ Carabiner

- Traditional large "D" design
- Developed for fire and rescue communities
- Manual locking
- Certified to meet NFPA 1993-1995, Class "G"
- Carbon steel, zinc-plated
- Strength 12,364 lbs (55 kN)
- Weight 11 oz (311g)
- Gate opening 1.2" (32mm)

Part No.	Description
SPPPU8708	SuretyMan Pulley, 2" (5 cm) double, Std/Prusik, orange, aluminum, weight: .83 lb (375 g)
SPPPU8710	SuretyMan Pulley, 4" (10 cm) single, Std/Prusik, yellow, aluminum, weight: 1.2 lb (545 g)
SPPPU8717	SuretyMan Pulley, 4" (10 cm) double, Std/Prusik, orange, aluminum, weight: 1.8 lb (840 g)
SPPPU8720	SuretyMan Mini Knot Passing Pulley, yellow, weight: 1.9 lb (.89 kg)
SPPRL4000	SuretyMan Edge Roller, aluminum, weight: 2.8 lb (1.3 kg) - [two required]
SMI420560	Quick Link 5/16" (8 mm) for use with Suretyman Edge Roller - [two required]
SRSF5077	SuretyMan Rescue Eight, aluminum
SRSFFE2120	SuretyMan Q-Eight

SRCC641	Carabiner, 1.2" (32mm) gate, steel

Rescue Equipment: FP Rescue Ropes

Static Kernmantle Ropes

These ropes are 100% permanent solution dyed color with contrasting marker stripe. Superior flexibility and knotability, provided by a unique double-twist cable core construction, gives superior resistance to abrasion that is up to four times greater than other static kernmantle ropes. These ropes are designed with load absorbing capabilities to provide additional safety in the event a dynamic force is applied.

Tying a Two-Wrap Prusik Hitch

Tying a Three-Wrap Prusik Hitch

3.

Prusik & Accessory Cords

Prusik cords have the same high quality and long wear design as rescue ropes. Size selection should be based upon diameter of the main line. The flexible cord is both strong and highly resistant to abrasion. Prusik cords and accessory cords are identical.

Rope Storage Bags

Rope Storage Bags are made of tough Cordura nylon fabric. Features include a drawstring top, handle/shoulder strap, and carabiner loops at top and bottom. In the bottom of the bag there is an inside loop for the end of the rope, or it can pass through the bottom grommet. Available in orange and black colors.

Rope Bag #1
Part No. SRB430105

Rope Bag #2
Part No. SRB430201

Part No.	Description
SRP508760050	7/16" (11 mm), nylon, 6,500 lb (2,948 kg), black, 50'
SRP504860SL050	1/2" (12 mm), nylon, 9,100 lb (4,128 kg), white/orange tracer, 50'
SRP508960050	5/8" (16 mm), nylon, 11,400 lb (5,171 kg), black, 50'
SRP530961050	1/2" (12 mm) polyester, 9,100 lb (4,128 kg), red, 50'
SRP510660SL050	3/8" (10 mm), nylon, 5,000 lb (2,269 kg), white/blue tracer, 50'
SRP544000050	7/16" (11 mm), nylon, 6,500 lb (2,722 kg), olive, 50'
SRP504866SL050	1/2" (12 mm), nylon, 9,000 lb (4,083 kg), white/blue tracer, 50'
SRP504863SL050	1/2" (12 mm), nylon, 9,000 lb (4,083 kg), red/white tracer, 50'

Additional lengths are available in 1-foot increments.

Part No.	Description
SRP500860	8 mm Accessory Cord, nylon. Use with 1/2"-5/8" (1.3cm-1.6cm) main line, black, 3,100 lb (1,406 kg)
SRP500900	9 mm Accessory Cord, nylon. Use with 1/2"-5/8" (1.3cm-1.6cm) main line, 3,600 lb (1,632 kg)
SRP500500050	5 mm Accessory Cord, nylon, 1,275 lb (578 kg) strength, 50'
SRP5020550050	5.5 mm Titian™ Cord, Spectra Core, nylon, 4,500 lb (2,042 kg) strength, 50'
SRP500700050	7 mm Accessory Cord, nylon. Use with 3/8"-1/2" (1cm-1.3cm) main line, red, 2,600 lb (1,179 kg), 50'

Part No.	Description
SRB430101	Rope Bag #1, orange, holds 120-ft / 1/2" (36.6m / 12 mm) rope
SRB430105	Rope Bag #1, black, holds 120-ft / 1/2" (36.6m / 12 mm) rope
SRB430201	Rope Bag #2, orange, holds 200-ft / 1/2" (60.1m / 12 mm) rope
SRB430205	Rope Bag #2, black, holds 200-ft / 1/2" (60.1m / 12 mm) rope
SRB430301	Rope Bag #3, orange, holds 300-ft / 1/2" (91.4m / 12 mm) rope
SRB430305	Rope Bag #3, black, holds 300-ft / 1/2" (91.4m / 12 mm) rope
SRB430601	Rope Bag #6, orange, holds 600-ft / 1/2" (182.8m / 12 mm) rope
SRB430605	Rope Bag #6, black, holds 600-ft / 1/2" (182.8m / 12 mm) rope

Rescue Equipment: FP Rescue Tripod

Sure-Strong Work Winch
Part No. SCE1074411200

Sure-Strong™ Tripods

Sure-Strong Tripods feature:

- Adjustable aluminum legs
- Two forged steel anchor eyes in head assembly
- Head assembly prevents unintentional collapse of tripod
- Legs adjust and lock individually to accommodate variable anchor heights, uneven ground, and compact storage
- Leg security strap prevents legs from spreading in the event of excessive loading
- Available with a cordura nylon storage bag
- Rated for 2 people with a working load of 1,100 lbs

Part No.	Description
SCE107007	Sure-Strong 7-ft (2m) tripod, aluminum, 10,000 lb (48 kN)
SCE107010HD	Sure-Strong 10-ft (3m) tripod, aluminum, 10,000 lb (48 kN)
SCE1074411200	Sure-Strong work winch, 200-ft (61m) galvanized wire rope, with bracket (compatible with Lynx Tripod and Sure-Strong Tripod)

Rescue Equipment: FP Rescue Kits

SuretyMan™ Rescue Utility System

The SuretyMan Rescue Utility System incorporates all the features professionals have come to expect from a first class rescue system. The system is primarily used for raising and lowering people or equipment in rescue and industrial work access and is ideal for confined space applications.

The SuretyMan Rescue Utility System features:

- Pulleys equipped with a built-in anti-reversing lock
- Only a 10 lb force is required to hold a 220-lb (90 kg) load
- SuretyMan ascender attached to both the operating rope and the user via a securing rope—if the operating rope accidentally releases, the ascender automatically stops the descent
- Rapid deployment
- Virtually maintenance free
- Rated for 2-person load
- Compact and light weight with a standard system weight of 17 lb (7.7 kg)
- Versatile for rescue & access
- Multi-purpose ascent or descent
- Rated capacity of 600 lb (272 kg) for personnel and materials
- Standard rope length of 200 ft (66m) with a maximum rope length of 800 ft (267m)

Part No.	Description
2 SRS15200	SuretyMan Rescue Utility System (200' length)

PLEASE NOTE:

Due to a 4:1 mechanical advantage, the user should order the Rescue Utility System with 4 times the length of rope necessary for their application. For example, the 200' system listed above provides a 50' working length. A 800' system provides a 200' working length.

Fall Protection Rescue Kit

The Fall Protection Rescue kit is designed to be an "out of the bag" rescue system. This kit combines a remote hook and extension pole with a rescue utility system. The remote hook and extension pole allows for remote attachment of a rescue line to a victim. The Rescue Utility System allows a rescuer to raise or lower the victim to safety. This kit should be used with a back-up system (not included).

Fall Protection Rescue Kit includes:

- Adjustable Pole, 6 ft (1.8m) to 12 ft (3.6m) (P/N - SFP675009)
- Pole Adapter (P/N - SCE109001) converts pole to hold remote hook
- Remote Hook (P/N - SRCA401) for remote attachment
- Storage Bag (P/N - SRB675009) for pole and remote hook
- Rescue Utility System (P/N - SRS15200) - raising and lowering system with a 4:1 mechanical advantage

Part No.	Description
10030025	Fall Protection Rescue Kit

PLEASE NOTE:

Due to a 4:1 mechanical advantage, the user should order the Rescue Utility System with 4 times the length of rope necessary for their application.

Basic High Angle Rescue Kits

The Basic High Angle Rescue Kits were designed for the Fire Department planning to assemble a high angle rescue team. A complete high angle rescue system consists of two kits: a Belay System Kit, and a Raising/Lowering System Kit.

The Belay System Kit includes:

- 3 large "D" shaped rescue carabiners (P/N SRCC641) - NFPA approved Class G
- 200-ft (61m) 1/2" rope, orange and white (P/N - SRP504860SL) - NFPA approved
- 33-ft (10m) 9mm accessory cord (P/N - SRP500900) for making load- release hitch
- 65" (1.65m) 8mm accessory cord & 53" (1.35m) accessory cord (P/N - SRP500860) make-up the tandem Prusiks
- 6-ft (1.8m) Suretyman anchorage sling (P/N - SFP2267406)
- #3 rope bag, orange (P/N - SRB430301)

Part No.	Description
10030023	Belay System Kit

The Raising/Lowering System Kit includes:

- 6 large "D" shaped rescue carabiners (P/N - SRCA641) - NFPA approved Class G
- Stealth rigging plate (P/N - SRSPR5990)
- 200-ft (61m) 1/2" rope, red (P/N - SRP504863SL) - NFPA approved
- 33-ft (10m) 9mm accessory cord (P/N - SRP500900) for making load-release hitch
- 65" (1.65m) 8mm accessory cord & 53" (1.35m) accessory cord (P/N - SRP500860) make-up the tandem Prusiks
- 53" (1.35m) 8mm accessory cord (P/N - SRP500860) for creating the Prusik for connecting the raising system
- 2 Single Pulleys, 4" (100mm) (P/N - SPPPU8710) - Prusik minding pulleys
- Brake Bar Rack (P/N SRS14001) - lowering device is NFPA approved
- 6-ft (1.8m) Suretyman anchorage sling (P/N - SFP2267406)
- #3 rope bag, black (P/N - SRB430305)

Part No.	Description
10030024	Raising/Lowering System Kit

Rescue Equipment: FP Rescue Kits

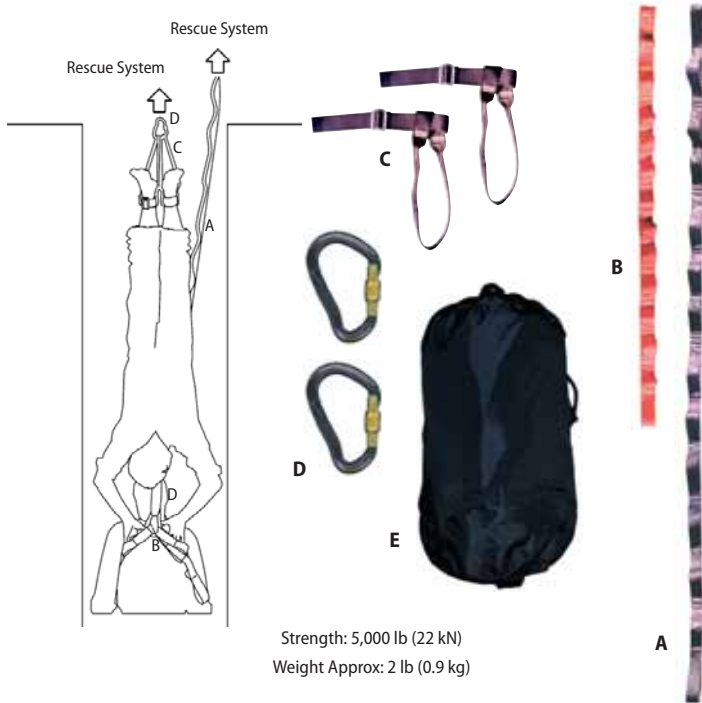

Emergency Rescue Bag System

The Emergency Rescue Bag System is designed for rescue on electrical and communication towers. Developed for use in restrictive environments, this extremely lightweight system was primarily designed for tower rescue; however, the system can be used to perform rescues on almost any vertical structure. The Emergency Rescue Bag System consists of a pre-rigged lowering System that comes in a variety of lengths. The users of this product must receive training by an approved trainer.

Part No.	Description
SRS323150	Emergency Rescue Bag System, 150-ft (45 m) working length
SRS323300	Emergency Rescue Bag System, 300-ft (90 m) working length

PLEASE NOTE:

Due to a 2:1 mechanical advantage, the user should order the Emergency Rescue Bag System with twice the length of rope necessary for their application. For example, the SRS323150 uses 300' of rope to achieve a 150' working length. The maximum system available provides a 400' working length with 800' of rope.

Confined Space/Head First Extraction System

The Confined Space/Head First Extraction System (HFES) is a specialized rescue product designed for those extreme cases where the rescuer has no other option, but to be lowered head first into a confined space to perform a rescue. These cases are rare, but can happen when someone has fallen into a restrictive confined space such as a well or drain system. The system allows the rescuer to be lowered comfortably into a confined space head first, harness the victim, and raise both victim and rescuer out of the confined space. This small, compact system can be used with any confined space retrieval equipment such as tripods and davits.

The HFES consists of the following components:

- Adjustable Lifting Strap (A)
- Adjustable Victim Strap (B)
- 1 Pair of Ankle Harnesses (C)
- 2 Carabiners (D)
- Storage Bag (E)

Part No.	Description
SRS3100	Confined space head first extraction system

Bucket Truck Evacuation Kit

The Bucket Truck Evacuation Kit was created to provide all necessary equipment to allow a worker to safely evacuate an aerial bucket that has become inoperative. The kit includes:

- #2 Rope Bag (P/N - SRB430205)
- 10-ft Synthetic Ladder with Swivel Snaphook P/N - SCE405010)
- Boom Anchor Strap (P/N - SSB22040)
- Antron system (P/N - SDC726075) which includes Antron device, Carabiners (2), 75-ft (22m) 7/16" rope

Part No.	Description
SKITSMT001	Bucket Truck Evacuation Kit

Escape Kit

The Escape Kit was created as a tool for emergency egress when trapped in an upper floor of a building. This kit is lightweight and easy to use.

Escape Kit includes:

- 2 Suretyman aluminum auto-locking carabiners (P/N - SRCA853)
- 60 ft (18.3 m) 9mm rope (P/N - SRP500900)
- Mini Q-Eight
- Small stuff sack

Part No.	Description
10030026	Escape Kit

SKED Basic Rescue System

The best solution for confined space, high angle or technical rescue, and traditional land-based applications, the Sked stretcher is a revolutionary design which provides outstanding patient protection and security. The Sked stretcher comes equipped for horizontal hoisting by helicopter or vertical hoisting in caves or industrial confined spaces. When the patient is secured, the stretcher becomes rigid. The durable plastic provides protection for the patient while allowing extrication through the most demanding confined spaces. The stretcher is rolled for storage in a tough cordura backpack which is included in the system. The system ships at 19 lb (8.6 kg) and comes complete for most applications.

Each Sked Basic Rescue System comes complete with:

- Sked Stretcher
- Cordura backpack/towing harness
- Horizontal lift slings
- Vertical lift sling
- Tow strap
- Removable webbing handles

Part No.	Description
SRSSK200	Sked Basic Rescue System, International orange

Rescue Pole/Remote Hook

The Rescue Pole/Remote Hook is designed as a rescue tool for the retrieval of a worker suspended in a fall arrest system or for remote rescue access. In most cases, the need for the rescuer to go to the fallen worker (victim) is limited. The Rescue Pole can be used in a wide variety of rescue applications and will serve as an excellent tool to help perform a safer, efficient rescue. The system consists of an adjustable fiberglass pole, pole adapter, and remote hook. A nylon storage bag is optional.

Part No.	Description
SFP675009	Adjustable pole, fiberglass 6 ft (1.8m) to 12 ft (3.6m)
SFP675012	Adjustable pole, fiberglass 8 ft (2.4m) to 24 ft (7.3m)
SRCA401	Remote hook, aluminum, with web sling
SCE109001	Pole adapter, aluminum/rubber
SCE109003	Pole adapter, 6 ft (1.8m), aluminum/rubber
SRB675009	Storage bag for FP675-009

Rescue Equipment: Cradles, Ladder & Etrier

Rescue Cradle
Part No.
SRH30701

Rescue Cradle
Part No.
SRH30703

Rescue Ladder
Synthetic Rope
Part No. SCE4000020

Rescue Etrier
Part No. SRS3200

Rescue Cradles

The Rescue Cradle is available in two model types. The SRH30701 model is designed to allow easy placement on a person. Equipped with 4" (10 cm) polyester webbing and 4 - 3" (7.6 cm) D-rings. One size fits all.

The Rescue Cradle, model SRH30703, is designed to be very similar to the SRH30701 model, except it is constructed with 1 - 3/4" (4.4 cm) nylon webbing, 2" (5 cm) attachment ring, and an elastic shoulder strap.

Part No.	Description
SRH30701	Rescue Cradle, 4 D-rings, 4" (10 cm) polyester webbing
SRH30703	Rescue Cradle, 2" attachment ring, 1-3/4" (4.45 cm) nylon webbing

Rescue Ladders

Our Rescue Ladders has synthetic rope with reinforced fiberglass rungs. Applications include: confined space access, theatrical stage rigging, mine access, and many others.

Part No.	Description
SCE4000020	Rescue Ladder, synthetic rope, 20 ft (6.1 m)

Rescue Etrier

Etrier is French for a set of ascending web stirrups sewn or tied together. The Etrier is useful for stretcher tendering and other vertical activities including getting over difficult edges. The six-foot loops are reinforced/ stiffened for easier foot placement and abrasion resistance.

Length: 7 ft (2.1 m). Weight: 9 oz (280 g).

Part No.	Description
SRS3200	Rescue Etrier, 1" web, 7 ft (2.1 m)

General Accessories

Hands-Off Chisel Grip
Part No. 10040018

Hands-off™ Chisel Grip

The Hands-Off Chisel Grip keeps hands away from the point of contact. The Hands-Off Chisel Grip is ergonomically designed to match the specific shape of the human hand for a comfortable and firm grip. Additional features of this modern design include:

- Permits faster, safer, more accurate work
- Easy adjustment to hold a variety of chisels and stakes up to 1" in diameter
- Vibration-absorbing handle
- Eases awkward hand positioning
- Economical
- Spark resistant

Part No.	Description
10040018	Hands-Off Chisel Grip

Ergonomic Tool Holders

- Holds wrenches, chisels, etc.
- Attach to broom handles and mops for better grip
- Vibration-absorbing design
- Eases awkward hand positioning

Part No.	Description
507005	Tool Holder, 18"
507006	Tool Holder, spark resistant, 18"

18" Tool Holder
Part No. 507005

Calculating Total Fall Distance

Knowing how to calculate Total Fall Distance is just as important as selecting the proper harness, lanyard, anchorage connector, and anchorage point for the specific task to be performed. Total Fall Distance (TFD) is defined as the sum of Freefall Distance (FFD), Deceleration Distance (DD), Harness Effects (HEFF), and Vertical Elongation (VEL). It is also wise to include a Safety Factor (SF) of at least one foot in the formula. Total Fall Distance can be calculated using the following formula:

$$TFD = FFD + DD + HEFF + VEL + SF$$

Before we can begin to calculate Total Fall Distance, we first need to define the variables in the formula above.

Freefall Distance (FFD): The vertical distance a worker travels between the onset of a fall until just prior to the point where the Fall Arrest System begins to arrest the fall. Federal OSHA limits this distance to 6' or less. To keep FFD to a minimum, you should always try to keep your anchor point as far above the back D-ring of the harness as possible.

Deceleration Distance (DD): The vertical distance a worker travels between the activation of the Fall Arrest System and final fall arrest. Federal OSHA limits this distance to 3.5' or less. The DD that each shock-absorbing fall arrest device will permit is typically stated on the product label.

Harness Effects (HEFF): The stretch of a harness during fall or rest. This is typically one foot or less for a properly-fitted harness. However, some harnesses use elastic-type webbing that can increase the harness effects to two feet or more.

Vertical Elongation (VEL): The stretch in the lifeline of the Personal Fall Arrest System. Vertical Elongation is measured on the part of the lifeline that is under tension during deceleration and final fall arrest. This variable will change drastically depending upon the type of Fall Arrest System you are using. For example, most shock-absorbing lanyards are designed to have a maximum deceleration distance of 3.5', which includes the vertical elongation of the lanyard. However, if you are using a rope grab system or a horizontal lifeline, vertical elongation must be calculated based on the stretch of the vertical or horizontal lifelines in those systems. You will need to check the specific manufacturers' product for exact stretch percentages.

Safety Factor (SF): An additional factor of safety to ensure that you have the required clearance below your working surface. This variable should be at least one foot, but can reflect any number with which you feel comfortable.

For illustration purposes, we will use the following equipment:

- Full Body Harness (non-elastic)
- 6' Shock-Absorbing Lanyard
- Fixed, Rigid Anchorage Connector (such as a D-Plate bolted to a structural I-beam)

In **Figure 1**, we see a worker with a 6' Shock-Absorbing Lanyard on an elevated platform. In this example, let's assume that his attachment point is 2' above the back D-ring of the harness. For every 1' the lanyard attachment point is above the harness back D-ring, 1' is deducted from the Freefall Distance. For every 1' that the lanyard attachment point is below the harness back D-ring, 1' is added to the Freefall Distance (see **Table 1**). In this scenario, if the worker falls, the Freefall Distance (FFD) will equal 4' since the lanyard attachment point is 2' above the back D-ring of the harness.

Figure 1.

FreeFall Distance for various Shock-Absorbing Lanyard Lengths and Elevations of Anchorage Connection Point.	Length of Shock-Absorbing Lanyard			
	6'	5'	4'	3'
Distance of Anchorage Connection Point Above (+) or Below (-) Harness Fall Arrest D-Ring				
+3	3	2	1	0
+2	4	3	2	1
+1	5	4	3	2
0	6	5	4	3
-1	7	6	5	4
-2	8	7	6	5
-3	9	8	7	6
-4	10	9	8	
-5	11	10		
-6	12			
	FreeFall Distance			

Table 1.

So, our formula looks like this:

$$TFD = 4' + DD + HEFF + VEL + SF$$

The next variable to consider is Deceleration Distance (DD). Federal OSHA requires that this distance not exceed 3.5'. Since all manufacturers' product is slightly different, you should read the label on the product you intend to use to determine the maximum deceleration distance of that product. When calculating Total Fall Distance, the maximum deceleration distance that a product will permit should always be used. In our example, the maximum deceleration distance would be 3.5'. $TFD = 4' + 3.5' + HEFF + VEL + SF$

The Harness Effects variable is relatively constant at less than one foot. This will vary slightly due to the adjustment of the harness, so we generally use one foot to account for these slight differences. However, elastic-type harnesses can have more than one foot of stretch, possibly two feet or more, and that additional

distance must be accounted for in your calculation. In our example, we are using a non-elastic harness to keep our Total Fall Distance to a minimum.

$$TFD = 4' + 3.5' + 1' + VEL + SF$$

Most manufacturers design their Shock-Absorbing Lanyards so that the vertical elongation of the lanyard is included in the OSHA mandated 3.5' maximum deceleration distance. However, if we were using a rope grab or horizontal lifeline, or if you were attaching to a non-rigid anchorage connector, VEL would need to be calculated based on the specifications of those components in your Fall Arrest System. Since we are using a 6' Shock-Absorbing Lanyard in our example and the VEL is already considered in the lanyard design, we will enter a "0" for the VEL variable.

$$TFD = 4' + 3.5' + 1' + 0' + SF$$

The final variable of the formula is the Safety Factor. It is always a good idea to include at least a 1' safety factor; however, the safety factor could reflect any number that makes you comfortable with your calculation.

Now we can solve our Total Fall Distance Formula:

$$TFD = 4' + 3.5' + 1' + 0' + 1'$$

$$TFD = 9.5'$$

Now we know that if the worker in **Figure 1** would happen to fall, his Total Fall Distance will be 9.5'.

But what does this number really mean?

It means that the clearance between the working surface and the next closest object in the fall path must be at least 9.5'. It is important to remember that Total Fall Distance is not always measured from the working surface to the ground, because sometimes the ground is not the closest object in the fall path of the worker (see **Figure 2**), your available clearance is measured from the top of that obstruction.

Figure 2.

Sometimes these distances can be very short, and a fall protection means other than a 6' shock-absorbing lanyard is necessary. Total Fall Distance calculations can become more complex than those demonstrated here. The numbers and variables will change depending upon the type of Personal Fall Arrest System used. For example, when calculating Total Fall Distances for Horizontal Lifeline Systems you have additional variables to consider, such as cable deflection and the number of people on the system. The important thing to remember is that calculating Total Fall Distance is just as important as selecting the right product for the job. Forgetting to calculate Total Fall Distance is just as dangerous as forgetting to put on your harness before you begin to perform any work at heights.

MSA Training

Learn from the *Experts*

MSA offers the following ANSI Z359 Compliant Fall Protection training courses:

MSA training courses are compliant to the new ANSI Z359 family of fall protection standards and meet "ANSI Z490.1 2001 Criteria for Accepted practices in Safety, Health, and Environmental Training".

Qualified Person Training

This course will train the Qualified Person in the use of all fall protection equipment and systems encountered in work and includes the following;

- Fall protection regulations
- Equipment use, selection and inspection
- Preparing fall hazard surveys
- Developing engineering system standards
- Determining system clearance requirements
- Designing and selecting anchorages
- Designing new and evaluating existing horizontal systems
- Developing written fall protection procedures and rescue procedures
- Determining potential impact forces

Authorized Person Training

This course will train the Authorized Person to inspect, anchor, assemble and use the fall protection in work applications. The Authorized Person training will include the following information;

- Fall hazard recognition
- Fall hazard control methods
- Fall protection regulations
- How to use written fall protection procedures
- Equipment use, selection and inspection
- Fall protection rescue procedures

LET US TRAIN YOU
AT YOUR FACILITY!

REGISTRATION INFORMATION

We invite you to attend our next training session, which will prove to be a comprehensive and valuable experience. For registration information, please contact the MSA Customer Service Center by phone (1.800.672.222) or by fax (1.800.967.0398), or log onto our web site at www.MSAnet.com.

MSA-U®, MSA's premier online training center, offers a wide range of training and informational materials. Register today at <http://msau.msanet.com>

Administrator Training

This course will train the Fall Protection Program Administrator to have a working knowledge of current fall protection regulations, standards and fall protection equipment and systems. The fall protection program administrator training will include the following:

- Fall protection regulations
- Developing and maintaining a managed fall protection program
- Fall hazard surveys
- Selection and appointment of safety committee personnel
- Fall protection system selection
- Development of approved equipment purchase lists
- Selection and appointment of qualified and competent people
- Development of engineering system standards

Competent Rescue Training

This course will train the Competent Fall Protection Rescuer how to select, inspect, anchor, assemble and use fall protection and rescue equipment in their work applications. The Competent Fall Protection Rescuer training will include the following:

- Fall hazard control methods
- Fall protection and rescue regulations
- Assessment of fall hazards to determine appropriate rescue methods
- Training on suspension trauma
- Equipment use, selection and inspection
- Rescue system assessment
- Development of written fall protection rescue procedures

Authorized Rescuer Training

This course will train the Authorized Fall Protection Rescuer how to select, inspect, anchor, and use fall protection and rescue equipment in their work applications. The Authorized Fall Protection Rescuer training will include the following:

- Fall hazard recognition
- Fall hazard control methods
- Fall protection and rescue regulations
- Training on suspension trauma
- How to use written fall protection and rescue procedures
- Inspection of rescue and fall protection equipment components and systems before use

Other courses available include:

- Competent Person for "Safety-At-Heights"
- Fundamentals of safety at heights
- Competent Person for equipment inspection
- Tower climbing safety
- Confined space entry

MSA Custom Solutions

Every business is unique, and MSA recognizes that YOUR Fall Protection systems need to be custom-designed and installed to meet YOUR needs.

To help you, we have carefully selected and trained specially qualified contractors, who can personally work with YOU to deliver exactly the services your hazardous situations demand.

These MSA Fall Protection System Integrators are independent organizations throughout North America whose local specialists can provide one or more customized MSA Fall Protection solutions for your business. Your MSA System Integrators will combine their experience and knowledge of practical applications with MSA Fall Protection products to meet your specific needs for any industry, including forestry, construction, oil & gas, petrochemical, mining, manufacturing, utilities, entertainment, and transportation.

Whether you choose complete turnkey services or individual services, you'll receive experienced application and design, fabrication, and installation of whatever MSA Fall Protection systems you need.

For more information call MSA Customer Service Center at 1-800-672-2222 and request the Custom Solutions Catalog (Bulletin #2300-100).

Engineering Services

Registered professional engineers will visit your site to analyze and determine the scope of work. Then they will design and draft engineering drawings, and later, follow up with a construction site review to ensure that your Fall Protection system has been installed as designed.

Installation

Factory-trained and certified installation technicians will execute the design specifications and carry out the manufacturer's instructions. Technicians can also inspect and re-certify an existing MSA Fall Protection system.

Fabrication

Knowledgeable fabricators will build all structural components that are required to support your primary MSA Fall Protection system, from simply connecting brackets that attach to your building columns or beams, to assembling complete free-standing support structures. You can trust that your fabricated components will comply with all applicable governing codes and standards.

Training

High quality training programs at a reasonable cost will be tailored to the unique issues of your industry and installation. MSA's commitment to increasing demands for technical training in Fall Protection, post-fall retrieval, and rescue will be fulfilled at your facility.

Why Choose MSA Custom Solutions?

- You get the broadest product range, to ensure the best possible fall hazard solution for your specific application.
- MSA System Integrators work directly for you and are responsive to your project requirements.
- MSA System Integrators offer cost-effective services direct to you, the MSA customer.
- You will benefit from dedicated regional System Integrators as well as nationally prominent organizations that specialize in particular industry applications.

How? It's easy!

To receive your quotation from MSA CUSTOM SOLUTIONS:

1. Contact your local MSA distributor, MSA Sales Associate, or call our MSA Customer Service at 1-800-672-2222.
2. Your request will be forwarded to the MSA System Integrator, who will contact you about your project's specific requirements.
3. You will receive a written estimate for your system.

Ultralight™ Cap Lamp System

MineSpot Cap Lamp System (shown with new battery top and new clip system)

Remote Adapter

Remote Adapter Cover

The state-of-the-art Ultralight Cap Lamp System has the brightest prefocused spotlight available (tungsten halogen) and provides exceptionally brilliant illumination of the work site. It has a long-life Luminator battery and a variety of battery charging equipment available.

The two-inch diameter, state-of-the-art Ultralight Cap Lamp headpiece is made of high-impact polycarbonate and consists of only five major parts:

- A one-piece polycarbonate bezel/lens (glass-laminated lens optional).
- A computer-designed, prefocused bulb/reflector assembly, featuring a high output, tungsten-halogen bulb, accurately positioned in the focal point of the reflector to assure a good spot.
- A plug-in tungsten-halogen bulb emergency escape light.
- A main housing with a printed circuit board for bulb and battery cable connections.
- A three-position switch.

A wire spring keeps the bulb/ reflector assembly properly resting against the lens to reduce vibration and mechanical shock.

The prefocused bulb/reflector assembly eliminates the need for a focusing mechanism. Both the on/off switch and the charging contact are located in the headpiece housing. With only four major parts, inventory, replacement stocks and downtime are minimized.

The tungsten-halogen bulb provides a white, bright light, achieved with little battery power consumption, because tungsten-halogen bulbs

are extremely efficient. In fact, more light output is achieved without reduction in bulb life. The light is also softer to miner's eyes.

In addition, the light output is more consistent, providing 85 to 95% of its initial light output, even at 70% of life expectancy. The bulb has a 1.0 amp rating at 4 volts. This lower amperage allows for longer cap lamp use between charges.

The prefocused bulb/reflector assembly efficiently concentrates over 90% of the light into a highly concentrated beam for exceptionally bright illumination of the work site.

Ultralight Specifications

Operating voltage: 4.2 to 3.8

Operating Time: Up to 14 hours (Luminator Plus)

Battery Dimensions: 7 1/4" x 5 1/4" x 1 1/2"

Weight: 4 lb 12 oz

Light Intensity: @ 10 feet (using standard bulb with fully charged battery) = 1450 LUX

Bulb Amperage: 1.0 (nominal)

MineSpot® Luminator® Battery

The MineSpot Luminator Battery is assembled as a complete sealed unit that requires nothing more than routine charging and periodic watering. The battery case is impact-resistant polycarbonate with reinforced bottom corners and molded-in belt loops. The Luminator Battery was designed for low maintenance and long life. Watering is required only every 4–6 weeks. The MineSpot Luminator Battery must be charged after each use.

Approvals and Standards

All MSA Cap Lamps have Mine Safety and Health Administration Certifications (MSHA certification) for use in an atmosphere of methane and air only.

Ultralight Cap Lamp System

Power Builder 10-Unit Charging Stations are stackable. Front only or back-to-back. Leg kit shown.

Single-unit Power Builder charger

Power Builder® Charger Stations

MSA offers a variety of charging stations, including an AC single-unit and a 10-unit station. The 10-unit charger can be tabletop mounted, wall mounted, or stacked to convert into a multi-station charger for up to 60 stations.

The Power Builder Charger uses a microprocessor control that is efficient and never needs recalibration. It uses constant current and constant potential charging. No adjustments are required. LED colored lights let you know the condition of the battery at all times. No rectifier is required. The charger is self-contained. All AC chargers can run on 110 or 220 current.

See Bulletin 02-00-01-MC for details on all MSA Cap Lamp Systems and Accessories.

Note: Up to 6 ten-unit chargers can fit on one leg kit. The chargers would be set up back-to-back.

Miscellaneous Mining Equipment

Miner's Support System and Multipurpose Pouch

The Miner's Support System from MSA is a lightweight but sturdy miner's belt that offers comfort, lumbar support, versatility and durability. It enables the miner to carry the cap lamp battery pack, filter self-rescuer, SCSR, tools, etc., on the job. A one-inch reflective strip sewn over a two-inch nylon strap makes the support system highly visible.

For more complete information, see Bulletin 0115-03.

W65 Self-Rescuer Respirator

Provides emergency protection against carbon monoxide

The W65 Self-Rescuer Respirator provides emergency respiratory protection against carbon monoxide gas resulting from underground fires or explosions. A one-time-use device for escape purposes only, it provides respiratory protection against carbon monoxide in otherwise respirable air; it should not be used in atmospheres containing less than 19.5 percent oxygen or in atmospheres containing other toxic gases and vapors. Protected by a rugged stainless steel case, it weighs only 2.2 pounds.

Approvals

The W65 Self-Rescuer Respirator is approved by the Mine Safety and Health Administration (MSHA) and the National Institute of Occupational Safety and Health (NIOSH) (Approval No. TC-14G-82) for self-rescue from carbon monoxide. Previously assigned Bureau of Mines Approval No. 14F-76.)

For more complete information, see Data Sheet 10-00-10.

W65 Self-Rescuer with Boot and Holster

W65 Self-Rescuer Respirator Complete Assemblies

W65 Self-Rescuer Respirator, complete in carton	455299
W65 Self-Rescuer Respirator, w/protective boot & neoprene holster	461100

Holster

Adapts Self-Rescuer to belts up to 2-1/2 inches in width.

Leather Holster	455535
Neoprene Holster	460027

Protective Boot

Protective black rubber boot for Self-Rescuer.

Protective Boot	449428
-----------------	--------

Self-Rescuer Training Model

A special training model, which does not contain chemicals, simplifies training in the use of the W65 Self-Rescuer. After use, it can be cleaned, reassembled, and used again.

Training Model, in red case	455696

Solaris® Multigas Detector with Nitrogen Dioxide Detection

The economical Solaris Multigas Detector provides simultaneous detection of up to 4 of the following gases: CH₄, CO, O₂, and NO₂ or H₂S.

Lightweight: under 8 oz., compact size makes it easy to wear

Durable: case with rubberized armor provides superior protection against liquid and dust ingress

Long-life battery: rechargeable lithium ion battery provides 14+ hours of continuous run time and delivers best-in-class performance in extreme conditions

Galaxy Compatible: compatibility for Galaxy automated test system

Sampling Pump Option: optional powered sampling

pump with extensive contaminant filtering system

Warranty: outstanding 2-year, all-inclusive warranty

Ergonomic design: for maximum comfort

Alarm System: world-class triple alarm system with 100+ decibel audible alarm, multiple high-intensity visual alarm and strong vibrating alarm

Display features: superior display features simultaneous gas concentration display, backlighting for easy reading and alphanumeric message bar for easy use

Video Programs

Order programs below online at www.govamod.com/MSA. Available on DVD or as a download.

Title and Comments	Running Time	Year Released
Proper Donning & Use of the Advantage 420 Respirator	10 min.	2009
Proper Care & Use of the Advantage 4000 Full-Face Respirator <i>Now available in English, French, and Spanish!</i>	15 min.	2010
Care and Use of the A-1000 and Millennium Gas Mask <i>For use by First Responders and Law Enforcement personnel. This program uses and shows cartridges and canisters approved for use prior to 2004, DOES NOT cover specific CBRN canisters.</i>	24 min.	2003
Proper Care & Use of the Advantage 1000 Full-Face Respirator	15 min.	1994
Proper Care & Use of the Comfo Classic Respirator	20 min.	1994
Use & Maintenance of the Ultra-Twin Respirator	22 min.	1982 (rev. 1995)
Proper Care & Use of the OptimAir MM PAPR for the Abatement Industries	24 min.	1993
Overview of OptimAir TL PAPR	15 min.	2007
Proper Care & Use of the Responder Powered Air-Purifying Respirator	25 min.	2009
Fit Testing MSA Respirators with the Qualitative Fit Test Kit <i>UPDATED!</i>	10 min.	2010
Proper Care & Use of the PremAire Supplied-Air Respirator System	43 min.	1994
Proper Care & Use of the PremAire Cadet System	32 min.	1993
Donning & Using the PremAire Cadet Escape Respirator	20 min.	2008
Proper Care & Use of the Hip-Air Apparatus	28 min.	1992
Proper Care & Use of the Pressure-Demand Air-Line Respirator	44 min.	1986
Proper Care & Use of Constant-Flow Air-Line Respirators	27 min.	1992
How to Use & Maintain the Custom Air V Escape Respirator	18 min.	1988
Proper Care & Use of Your Response Escape Hood from MSA	11:15 min.	2002
Proper Care and Use of the Xtreme Air Mask with HUD/RIC	40 min.	2003
Proper Care and Use of the M7 Air Mask	35 min.	2008
Proper Care and Use of the M7 Responder Air Mask —Covers SCBA (35 min.), PAPR (25 min.), and APR (20 min.) options	80 min.	2008
SCBA Rescue Belt <i>Available on CD only.</i>	20:00 min.	2004
Proper Care & Use of the MMR Xtreme Air Mask with the FireHawk MMR and the ICM Unit	36 min.	2001
FireHawk Disassembly & Reassembly Instructional Program	11:46 min.	2002
Proper Care and Use of the AirHawk II SCBA	25 min.	2009
Proper Care and Use of the Quick-Fill System	min.	1992
Proper Care & Use of the Evolution 5000 Thermal Imaging Camera	30 min.	2002
Proper Care & Use of the Evolution 5000 Family of TICs —Covers 5200, 5600, and 5800, each in own 15 min. program.	45 min.	2008
Proper Use of the Altair 5 Multigas Detector	20 min.	2009
Proper Use of the Altair 4X Multigas Detector <i>NEW!</i>	20 min.	2010
Proper Use of the Altair 4 Multigas Detector	20 min.	2008
Proper Use of the Altair 4 QuickCheck System	10 min.	2009
Proper Care & Use of the Orion Multigas Monitor	29 min.	2001
Orion G Multigas and Leak Detector Goose Neck and Coiled Hose Version, Rev.01	15 min.	2003
Proper Care & Use of the FiveStar Alarm	31 min.	1997
Proper Care & Use of the Explosimeter Indicator, Model 2A	24 min.	1982
Proper Care and Use of the Pulsar Single-Gas Detector	8 min.	2001
A Video Guide to Personal Sampling Techniques	22 min.	1994
Overview of the Galaxy Gas Tester	10 min.	2004
Proper Care & Use of the EVOTECH Harness <i>NEW!</i>	10 min.	2010
Harnesses —Donning and Doffing Instructions for the Pullover, Vestype, FP Pro and Tradesman Harnesses	—	—
Using the RCD (Remote Connect/Disconnect) System	6:30 min.	1998
Assembly and Use of the Horizon Rebar Anchorage System	10:22 min.	2000
Davit Systems	9:59 min.	1999
Assembling the Fall-Rescue Work System	9:07 min.	1999
Dyna-Line Horizontal Lifelines	—	—
