THE RED LINE THE C

Engineered to Collect, Contain and Eliminate Powders and Airborne Dust

Ruwac's Red Line Series single phase portable intermittent duty vacuums may look like small, but they pack a serious punch compared to other industrial vacuums of their size. Fine dusts are no match for their power and superior filtration, putting them in position to remove the nuisance in your job. With Ruwac's Red Line you get...

- **Industry-leading MicroClean Filtration:** 99.9% efficient at 0.5 Microns; It's also backed by a 3-year filter life guarantee!
- **Durable Compression Cast Composite Housing:** Will never dent, rust or break and is backed by Ruwac's lifetime guarantee
- **Fully grounded:** Protect against static build-up
- **External Manual Filter Cleaning:** Simple shaker system means you never have to take apart your vacuum to clean the filter
- **Foot-Actuated Dustpan:** 9 gallon capacity with quick release for simple, clean emptying

Oversized filtration efficiently removes large quantities of dust

Foot-actuated dustpan makes emptying easy and dust-free

Low inlet for easy portability and prevents tipping

Optional HEPA for absolute filtration. 99.997% efficient at 0.3 Microns.

Compression cast composite housing is durable and dent-free

Manual Filter Shaker System

- Easy-to-use pull-in and pull-out handle shaker
- Cleans filter without having to disassemble vacuum unit
- Quick-acting remedy to clog prevention

Outperforms the Shop-Vac!

ORIGINAL PORTABLE VACUUM SERIES FOR FINE DUST

All Ruwac Vacuums Include A 3-Year Filter Guarantee!

Ruwac's low-loading MicroClean filters are specifically designed to collect and contain fine powders and dusts. The innovative pleated design allows filter area to be maximized within a confined space. There are no paper or cartridge filters here. Our filters are made out of only the best quality materials to ensure longevity and performance. Ruwac filters are 99.9% efficient at removing particles down to and including .5 micron. Unlike cartridge or paper filters which need to be replaced, our filters are permanently installed and can be cleaned without disassembling the vacuums.

Pleated paper and cartridge filters can become distorted with too much filter cake, rendering a vacuum useless. With a Ruwac vacuum, you never have to worry about collapsing filters. Our MicroClean filters are protected with a steel frame and wire mesh inserts to preserve shape and integrity while vacuuming and cleaning. Furthermore, an external manual cleaning assembly allows users to rid the filter of dust accumulation, extending filter life and renewing air flow. So stop messing with the rest -- Put a Ruwac filter to the test!

Versatile All-Purpose Vacuum System
