

3M™ BX™ Dual Reader Protective Eyewear

A Leader in Readers

- Ideal for anyone who needs to look up or down for near vision
- Meets the High Impact Requirements of ANSI Z87.1-2003
- Not recommended for use while driving or operating mechanical equipment

3M™ BX™ Dual Reader Protective Eyewear

The same sleek, contoured and fully adjustable features that you rely on from BX protective eyewear—now with dual magnification diopters.

Magnifying power on both the upper and lower lens helps make reading and other close work easier. BX dual reader eyewear is the perfect eye protection for jobs that require workers to look up and down frequently throughout the day. It's ideal for anyone who wears reading glasses, who is engaged in small detailed work or has difficulty reading small print.

Engineered for Safety. Designed for Style.

3M™ Protective Eyewear with Readers

3M has many different eyewear styles and lens options that contain magnification diopters. All products listed below are tested to ensure product quality and compliance with ANSI Z87.1-2003 standards.

? DID YOU KNOW?

The term “presbyopia” means “old eye” and is a vision condition involving the loss of the eye’s ability to focus on close objects.

Presbyopia is a condition that occurs as a part of normal aging and is not considered to be an eye disease. The process occurs gradually over a number of years. Symptoms are usually noticeable by age 40-45 and continue to develop until the process stabilizes some 10-20 years later. Presbyopia occurs without regard to other eye conditions.
