3M™ Versaflo™ S-Series Hoods
and Headcovers for Powered and
Supplied Air Respirators

3M.com/Versaflo

Many wearers of half and full facepiece respirators are taking a second look at powered and supplied air respirators for reasons that go beyond compliance.

All-Day Comfort

New 3M™ Versaflo™ S-Series Hoods and Headcovers have been designed to provide users with the optimal level of comfort. Easily adjustable suspensions (most models) and soft comfort pads help provide excellent fit, stability and tracking. Comfort suspension hoods and headcovers feature wide faceseals with soft elastic for improved comfort and reduced air flow noise. The premium reusable suspension allows wearers to modify the airflow distribution inside the hood to suit personal comfort needs. All of these improvements combine to help workers stay more comfortable throughout the day.

Versatility

As a part of Versaflo respirator systems, S-Series hoods and headcovers can be used in dozens of different Powered Air Purifying Respirator and Supplied Air Respirator combinations.

Excellent Airflow

S-Series hoods and headcovers direct a comfortable stream of air into the headgear. The moving airflow may make hot environments more tolerable while reducing visor fogging. When used with an approved 3M™ Supplied Air Regulator, the compressed air can be made cooler or warmer by up to 50°F (28°C) for additional comfort.

High Performance—APF

3M has conducted research to document an Assigned Protection Factor (APF) of 1000 for the S-Series hoods when used as part of a NIOSH-approved powered or supplied air respirator system. An APF of 1000 is the highest level allowed under the Occupational Safety and Health Administration (OSHA) Respiratory Protection Standard (29 CFR 1910.134) for this class of respirator. S-Series headcovers have an APF of 25, making them suitable for a wide range of applications and working environments.

Fast Assembly

All S-Series compatible breathing tubes feature the innovative 3M™ Quick Release Swivel (QRS) connection. Simply push the QRS end of the breathing tube into the air inlet of the headgear until it snaps into place. The breathing tube can be quickly removed with only one hand by squeezing the breathing tube clips.

Simple Maintenance

Choose the ready-to-use integrated suspension models for applications where assembly would be too time-consuming or impractical. Or select the premium reusable suspension hoods for quick, highly cost-effective replacement of outer fabrics.

ALL-NEW BENEFITS

Comfortably Worn By More Users

Based on a computer modeling of a worldwide sampling of head sizes, the new S-Series suspensions, through their sizing options, will comfortably fit more wearers than previous models.

Improved Visibility

S-Series visors have an excellent field of view with reduced curvature for decreased reflections and glare. Their new design, plus their protective shipping cartons, minimize the potential for visor creasing and visual distortion.

Sleek New Shape

The design of the premium suspension and comfort suspension hoods and headcovers more closely profiles the wearer's head for a more streamlined, less bulky appearance.

Excellent Airflow

S-Series wearers benefit from excellent airflow distribution for improved comfort.

Integrated Suspension Hoods and Headcovers

Available with two different suspensions, comfort and fabric, integrated suspension hoods and headcovers offer the advantage of being fully assembled and ready to use straight out of the box. They can be suitable for applications that require frequent replacement of the entire headgear assembly, such as pharmaceutical manufacturing, or in situations where there is less soiling of the outer fabric. Integrated suspension headgear is available in two sizes to comfortably fit more wearers: S/M and M/L.

3M™ Versaflo™ Economy Headcover S-103

Head and face coverage. Fabric suspension.

3M™ Versaflo™ Headcover S-133

Head and face coverage. Integrated Comfort suspension. General purpose fabric.

3M™ Versaflo™ Headcover S-133B

Head and face coverage. Integrated Comfort suspension, blue Tychem® QC fabric.

3M™ Versaflo™ Economy Hood S-403

Head, face, neck, and shoulder coverage. Fabric suspension, inner shroud.

3M™ Versaflo™ Hood S-533

Head, face, neck, and shoulder coverage. Comfort suspension. Durable, soft, quiet, low-linting fabric that drapes more comfortably over the wearer.

COMFORT SUSPENSION MODELS

Integrated suspension models S-133, S-133B and S-533 also feature a wide face seal with soft elastic for improved comfort and reduced noise. The new airflow distribution minimizes the potential for air whistling past the wearer's ears, allowing for better worker communication and improved comfort. A new exhalation panel vents the headtop without the traditional vent hole pattern or exhalation valve.

FABRIC SUSPENSION MODELS

Economy suspension models S-103 and S-403 provide a lower cost alternative to value-conscious customers while still offering comfort and protection.

Product #	Description	Size	Qty
Integrated Suspension Accessories†			
S-920S	3M™ Peel-Off Visor Cover for use with Integrated Harness Products	Sm/Med	40/case
S-920L	3M™ Peel-Off Visor Cover for use with Integrated Harness Products	Med/Lg	40/case

†3M recommends S-922 Peel-Off Visor Cover for S-103 Economy Headcover and S-403 Economy Hood.

Premium Reusable Suspension Hoods

Premium reusable suspension hoods can be a very cost-effective choice for some high disposal rate environments—just the soiled hood fabric is replaced, while the suspension and air ducting can be reused. The new design permits significantly faster user assembly of the entire headtop.

The suspension's new rigid ducting provides a consistent air path. An externally-adjustable airflow control allows wearers to modify the airflow distribution to suit personal comfort needs. While wearing, the airflow may be directed primarily to the front visor or split to provide more airflow to the top of the head.

The suspension has independent adjustments for the crown and head circumference, allowing a comfortable, custom fit for a wide range of head sizes. An optional size-reducing comfort pad is provided to further extend the range of compatible head sizes.

3M™ Versaflo™ Hood Assembly S-655

Head, face, neck and shoulder coverage. Its respiratory seal is a comfortable, knitted inner collar that is shorter and thinner than previous models. General purpose, cost-effective fabric.

3M™ Versaflo™ Hood Assembly S-657

Similar to S-655. The S-657 uses a double shroud design for its respiratory seal; wearers can select their preferred seal design. The S-657 is worn by tucking the inner shroud into a shirt or protective coverall, allowing excess air to be channeled over the body.

3M™ Versaflo™ Hood Assembly S-757 / 37301

Similar to S-657 but with a fabric specifically intended to help capture paint overspray, minimizing the potential for paint to flake off the wearer and onto the work piece. Fabric has an internal film barrier to help prevent paint contact with skin or clothes.

3M™ Versaflo™ Hood Assembly S-855

Similar to S-655 but made with Kappler® Zytron® 200, a polypropylene fabric with a multi-layer barrier film. Features sealed seams, making it suitable for environments where certain liquid splash hazards may be present. Includes a comfortable inner collar.

3M™ Versaflo™ Hood Assembly S-857

Similar to S-657 but made with Kappler® Zytron® 200 and sealed seams. Features a double shroud design for its respiratory seal. Both the S-855 and S-857 hood assemblies include ties to help keep the shroud in place.

New Breathing Tubes

All S-Series compatible breathing tubes feature the innovative 3M™ Quick Release Swivel (QRS) connection. The QRS connects quickly to the headgear and swivels to minimize loops and kinks in the breathing tube.

BT-20S

3M™ Versaflo™ Breathing Tube, Small/Medium

Approx. 28"; features steel core coils for durability. To improve comfort and reduce the potential to catch on the wearer's surroundings, BT-20 tubes are available in two sizes.

37309

BT-20L

3M™ Versaflo™ Breathing Tube, Medium/Large

Approx. 38"; features steel core coils for durability. To improve comfort and reduce the potential to catch on the wearer's surroundings, BT-20 tubes are available in two sizes.

37310

BT-30

3M™ Versaflo™ Length-Adjusting Breathing Tube

Self-adjusting length results in an approved fit for most wearers and reduced risk of catching and snagging.

BT-40

3M™ Versaflo™ Heavy Duty Neoprene Rubber Breathing Tube

Features a durable, heat-resistant neoprene rubber material for rugged applications.

BE-324

3M™ Breathing Tube

Approx. 36"; for use only with Breathe Easy™ systems.

3M Automotive Aftermarket Division (AAD) Product Numbers are found in blue type on selected products.

Solutions for Many Applications

3M™ VersaFlo™ S-Series Hoods and Headcovers are designed for versatility. S-Series products can be effectively used in a wide variety of industries and applications.

Build your own Versaflo™ system or choose from one of our complete system kits. These kits offer the convenience of a complete system tailored to your application — all in one box.

EASY CLEAN PAPR KIT

TR-300-ECK

Perfect for many pharmaceutical, healthcare, and food and beverage applications, the TR-300-ECK Kit includes an S-655 Hood, a TR-307N PAPR with Easy Clean Belt, and a BT-30 Breathing Tube. A battery charger, TR-3710N filter and prefilter are also included as part of the TR-307N Assembly.

HEADCOVER PAPR KIT

TR-300-HKS (Small Headcover Kit) TR-300-HKL (Large Headcover Kit)

The easiest way to select a complete system for hospital, healthcare, and pharmaceutical applications where an S-133, APF 25 Headcover is preferred. Includes an S-133 Headcover, a TR-307N PAPR with Easy Clean Belt, a BT-30 Breathing Tube, charger, TR-3710N filter and a storage bag. Available in two sizes: Small/Medium and Medium/Large.

⚠WARNING

These respirators help protect against certain airborne contaminants. Before use, the wearer must read and understand the User Instructions provided as a part of the product packaging.

A written respiratory protection program must be implemented meeting all the requirements of OSHA 1910.134 including training, fit testing and medical evaluation. In Canada, CSA standards Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate. Misuse may result in sickness or death. For proper use, see packaging instructions, supervisor, or call 3M OH&ESD Technical Service in USA at 1-800-243-4630 and in Canada at 1-800-267-4414.
