

Wiper Kits with Disinfectants

When used according to label directions, our Wiper Kits are ideal for quick and effective removal of pathogenic microorganisms. All available kit options use a disinfectant found on the EPA's List N. List N disinfectants are recommended for use against SARS-CoV-2, the virus that causes COVID-19.

Apply disinfectant with the perfectly-sized disposable towels to distribute disinfectant over hard surfaces. Allow proper dwell time according to label instructions. Disposable towels do not deplete cleaning solutions like cotton and microfiber towels. Follow all label directions for safe and proper use of disinfectant.

(rec. Sporidicin ready to use Disinfectant, 1 gal. # 57643)

2619-0443

Step 1:
Wearing appropriate PPE, add gallon of ready-to-use disinfectant to pail

Step 2:
Place towel roll in bucket and wait 5 minutes for towels to properly soak up solution

Step 3:
Feed wiper through spout

Refill rolls of towels available
#2650-0431

Store in a cool dry area with container tightly closed.
Follow all label directions. Now you are ready to start wiping and disinfecting.

*Bleach based products not recommended as solution only effective for disinfection up to 24 hours. DO NOT use or mix products containing bleach with other household chemicals or cleaners.
