

**FLOOR DRYING PACKAGES**

Dry hardwood, subfloor, tile and concrete with our HP systems. Choose between the HP-60, HP-PLUS & the new HP-PLUS-240V systems.

The HP-PLUS & HP-PLUS-240V systems use the Variable Frequency Drive (VFD) technology to control the back pressure the unit may experience. These systems are significantly quieter than the HP60 which will result in less occupants turning off the equipment. The VFD is constantly assessing and adjusting for changing parameters it is therefore more effective than the HP60 (especially in floor drying).
